### Department of the Navy Operation and Maintenance, Navy

Activity Group:

**Leased Communications** 

Budget Activity: III - Intelligence & Communications

#### I. Description of Operations Financed

This activity group provides for the continuing financial support for leasing, acquisition and implementation of communications services and related systems and facilities. The Naval Telecommunications Command (NAVTELCOM) implements approved telecommunications requirements in response to tasking from designated, validating authorities. With minor exceptions, all requirements are first reviewed by NAVTELCOM and then considered for approval by the appropriate authority. Implementation is accomplished in the most cost-effective manner possible. The submitted requirements are analyzed, evaluated and necessary amplifying information obtained as follows: ensure that requestor has properly stated the requirement; review Navy and DOD data bases and coordinate to determine the availability of uncommitted resources; ascertain status of any planned facilities which will become available within the required operational time frame; prepare recommendations, as necessary, leading to validation and subsequent programming and budgeting. All circuits, both leased and government-owned, are under periodic review with the requiring activities to determine continued need.

#### II. Financial Summary (Dollars in Thousands).

| 4. | Pro | gran | n Increases   |                    | 11,151  |
|    | Α.  | Ann  | ualization of FY 1985 Increases   | (2,183)            |         |
|    |     | 1)   | Defense Data Network (DDN) provides cost effective, survivable and secure packet switching service for critical ADP query/response (interactive and bulk) communications and transport of record communications. Increase represents that portion of DDN increased network capacity to serve Navy subscribers. Specifically, O&M,N is used by DCA to lease network trunks (between DDN switches) and subscribers access lines to the DDN. DDN will provide data communications support to about 700 Navy ADP systems. | 2,163              |         |

Activity Group: <u>Leased Communications (Cont'd)</u>

- B. Reconciliation of Increases and Decreases (Cont'd)
- B. Other Program Growth in FY 1986
  - 1) COMNAVTELCOM Office Productivity 256
    Enhancement (COPE): This satisfies
    the needs of ADP/WP requirements,
    including office automation. This
    connectivity will provide the
    capability for rapid and accurate
    collection, processing, transmission,
    storage and retrieval of large volumes
    of information to support the
    requirements for control, coordination
    and decision making.

(8,968)

- 2) Digital Conversion WW: Continued 1,949 replacement/improvement of microwave systems in conjunction with overall DCA strategy of conversion of the DCS to an all digital transmission medium. A yearly schedule of procurement and installation envisions Digital Radio & Multiple Acquisition (DRAMA) equipment to provide standard DCS equipment. These funds will convert two sites, NAVCOMMSTA Philippines and Puerto Rico.
- 3) Assumption of Existing Leases:
  Increased funds support additional
  telecommunications requirements which
  have been implemented and funded in
  prior years by users for 2 or 3 years,
  after which budgeting becomes a
  COMNAVTELCOM responsibility.
- 4) Urgent Tactical Connectivity:
  Provides leased connectivity in
  support of urgent Fleet operational
  requirements for the following:
  Alternate Broadcast Keying Lines
  (ABK) for NAVCAMS EASTPAC/STOCKTON/
  SAN DIEGO; Charger Horse circuits
  EASTPAC/JAPAN; Orderwire NTC
  NTCOC/STOCKTON, STOCKTON/ROOSEVELT
  ROADS, PUGET SOUND/STOCKTON and
  PUGET SOUND/JIM CREEK; LF/VLF for
  ROTA/GUARDAMAR.

#### B. Reconciliation of Increases and Decreases (Cont'd)

- 5) CINCPAC Lease Requirements I: Provides 151 funding of various circuits in support of TACAMO, i.e., AUTOVON, Voice Teletype and CVAN funded by CINCPAC in prior years, with funding shifting to COMNAVTELCOM.
- 6) To provide for new leased circuit
  requirements in support of the European
  Telephone System. This program replaces
  all existing switches under Navy shore
  administrative control with digital
  software controlled switches to meet DCA/
  USCINCEUR criteria. Naples, Sigonella,
  Rota and London switches are scheduled
  for replacement during FY 86.
- 7) Voice Circuit Leases: Fourteen (14) 576 circuits approved by the Fleet CINCS and CNO which relate to Command and Control functions, contingency situations and Safety of Flight for aircraft operations.
- 8) Special Data Circuit Leases: TwentyTwo (22) leased data circuits (75
  Baud to 56 KBPS) to satisfy
  operational requirements. The
  services involved related to
  Personnel Data Bases (Remote Inquiry
  System), merging of Personnel and
  Pay Record data bases, Command and
  Control (ASWCCCS/WESTPAC PSW),
  Intelligence, Special Classified
  Projects, Upgrade of existing Data
  circuits and Management Information
  Systems.
- 9) Improved CONUS AUTOVON: Adds new 2,315
  AUTOVON lines as part of a program
  to approach the OSD/JCS mandated
  grade of service and to reduce
  dependence on use of commercial
  toll service resulting from
  inadequate AUTOVON.

# III. <u>Performance Criteria</u>. <u>FY 1984 FY 1985 FY 1986</u> 1. AUTOVON 48.912 54.909 59.042

Access to and use of the unsecured direct dialing service worldwide through the system of government—owned and leased automatic switching facilities of the DOD. Some of these facilities are used in support of the transmission media required by the Automatic Secure Voice Communications (AUTOSEVOCOM) Network.

2. <u>AUTODIN</u> 16,803 20,421 20,838

Access to and use of the single, integrated, worldwide high speed, computer-controlled, general purpose secure communications network of the DOD.

3. <u>AUTOSEVOCOM</u> 1,919 2,161 2,262

Access to and use of the singly approved world-wide secure voice assets of DOD.

4. GAPFILLER 8.760 8.760 -0-

Access to and use of commercial leased satellite service pending availability of the Fleet Satellite Communications System. This system is used to provide communications between ship and shore stations.

Activity Group: <u>Worldwide Military Command and Control System (WWMCCS)</u>
Budget Activity: <u>III - Intelligence & Communications</u>

#### I. <u>Description of Operations Financed</u>.

The Worldwide Military Command and Control System (WWMCCS) offers the means for command and control of U.S Military Forces. The system provides rapid, reliable and secure Automatic Data Processing (ADP) systems at and between WWMCCS nodes throughout the world. Resources for this program support WWMCCS Engineering and Installation, WWMCCS Tactical Software Development and WWMCCS Station Operations. The WWMCCS Engineering and Installation program provides funds for engineering installation plans and installation of all WWMCCS ADP and associated communications support equipment. WWMCCS Tactical Software Development provides for design, development, maintenance and technical support of standard WWMCCS applications systems computer programs. The major functions of WWMCCS Station Operations are directed toward operation and maintenance of Automatic Data Processing Equipment (ADPE) to support Navy command authorities and subordinate commanders in carrying out command and control functional tasks. Included are monitoring current situations including the status of U.S. and non-U.S. forces, responding to warning and threat assessments, employing forces and executing operations plans, performing attack strike damage assessment, reconstituting and redirecting forces, and terminating hostilities and active operations.

#### Department of the Navy Operation and Maintenance, Navy

Activity Group: Other Communications

Budget Activity: III - Intelligence & Communications

#### I. <u>Description of Operations Financed</u>.

#### Station Operations

These funds support Naval Communications Area Master Stations, Naval Communications Stations, Naval Communications Units, and the ongoing efforts of the Naval Telecommunications Command Automation Software Program (ashore and afloat). In FY 1986, this program includes funds transferred from other Procurement, Navy pursuant to the proposed DoD initiative for elimination of \$3 thousand investment threshold and adoption of central management criteria as governing factor.

#### Equipment Installation

These installation projects provide operational commanders with reliable, secure, and rapid information transfer systems for effective command and control of the Navy. Supported in this program are Fleet Statellite Communications requirements and the Minimum Essential Emergency Communications Network (MEECN). In FY 1986, this program includes funds transferred from other Procurement, Navy pursuant to the proposed DoD initiative for elimination of \$3 thousand investment threshold and adoption of central management criteria as governing factor.

#### Communications Security

Communications Security (COMSEC) program functions include providing technical and engineering support in the development and operational evaluation of new equipment, subsystems and ancillary devices and performance of comprehensive instrumented tests (TEMPEST surveys) of shipboard and shore facilities handling classified information. The Signals Security program encompasses six basic operations including surveillance, training, vulnerability assessment, engineering and technical services, installation and de-installation, and overhaul/refurbishment. Operations financed under Navy Communications Security Material System include management and operation of the office of the Director, management of COMSEC material, a Central Office of Record to account for all COMSEC material, and development of procedures to be used in situations where the physical security of COMSEC material has been violated. This submission includes a significant FY 1986 increase for installation of encryption equipment procured in prior fiscal years by DON and NSA and intended to ensure the security of DON classified communications.

#### Other Communications

Funds finance the administration of communications functions including operation and maintenance of rapid communications systems, telegraph, administrative telephones and service, and operation of message centers at COMNAVAIRLANT, COMSUBLANT and Headquarters, Naval District Washington. In FY 1986, this program has been realigned to the Naval Command and Control System in O&M.N BA-2.

3,434

a) Expense/Investment Criteria
Revision - Amounts transferred
from Other Procurement, Navy pursuant
to the proposal DoD initiative for
elimination of \$3 thousand investment
threshold and adoption of central
management criteria as governing
factor (3,434)

4. Program Increases

33,176

A. Annualization of FY 1985 Increases

(1,812)

1) Provides additional HF communications capability at Diego Garcia for expanding Naval Operations in the Indian Ocean; at Naval Community Unit (NCU) Key West, Fla. to improve operational readiness, and on Ascension Island to improve communications in South Atlantic. In addition upgrades Northern United Kingdom communications by converting the obsolete analog microwave system to a digital system with increased capacity, realiability and security.

760

2) Increase provides for Sigonella/Mt Vergine Tropu Upgrade to improve USN and USAF communications from Sigonella to the DCS backbone in southern Europe; provides for installation of Parkhill/Autosevocom Interface's to extend tactical HF circuits to operational Commander's ashore; provides Navy share of the High Frequency Regency Network to support Theater Nuclear Force Communications in response to OSD policy direction validated by JCS.

972

3) CINCUSNAVEUR SECVOX - This effort will install two Secure Voice Contingency Radio Terminals. This equipment replaces the existing assets which are not compatible with the FLTSATCOM Secure Voice Subsystem. This is a one time installation requirement.

B. Other Program Growth in FY 1986

#### B. Reconciliation of Increases and Decreases (Cont'd)

1) European Telephone System (ETS).

Provides funds to begin to replace all existing switches with digital controlled switches to meet DCA/USCINCEUR criteria.
Funds support lease and contract maintenance for (OPN) acquired switchboards at four locations.

(31,364)

- 2) Surveillance Towed Array Sensor
  Sys (SURTASS) Provides funds to
  support HF communications backup
  capability for TAGOS ships. FY 85
  baseline amount is \$170K for minimum essential (SURTASS I). SURTASS
  II in FY 86 adds more terminations
  to the minimum essential.
- 3) Ascension Island HF Comm. Provides select fleet operations support to protect specified sea lines of communication where coverage is presently extremely limited. Includes engineering support and special antenna requirements.
- 4) Technical Control Improvement Program 95 (TCIP) Joint Program Annualized cost to operate and maintain semi-automatic, quality monitoring equipment, fault isolation and remote control of technical control functions. Supports DCS conversion from analog to digital operation consistent with ASD C<sup>3</sup>I direction.
- 5) Low Speed Time Division Multiplex (LSTDM)
  Operational costs associated with replacement of obsolete Voice Frequency Carrier
  Terminals (VFCT) with LSTDM digital conversion program which is to provide a standard submultiplex for the DCS as per ASD C<sup>3</sup>I direction to proceed with conversion.

#### B. Reconciliation of Increases and Decreases (Cont'd)

- S) Navy Modular Automated Communications
  System (NAVMACS) systems provide secure
  timely and reliable processing of Naval
  messages aboard 250 ships. Systems also
  serve as an automated shipboard terminals
  for a satellite link interfacing ashore
  with the Common User Digital Information
  Exchange System (CUDIXS). Required
  funds provide for:
  - 420K Start design work on Release 1.0 software to correct CUDIXS link interface problems with NAVMACS(V)3
  - 255K Re-integrate NAVMACS(V)2 and (V)1 assembles with (V)3 baseline.
  - 130K Develop and incorporate "in-line"
     coding for (V)3 software self documenting.
  - 80K (V)5 Baseline test.
  - 360K (V)5 software maintenance
- 7) Demand Assigned Multiple Access (DAMA)
  provides fleet satellite communications
  utilizing fewer satellite channels.
  Funds will provide design work on DAMA
  Front End Processer (FEP) on the Navy
  Modular Automated Communications System
  (NAVMAC) interface to the Common User
  Digital Information Exchange system
  (CUDIXS).
- 8) Common User Digital Information Exchange System (CUDIXS) software change to interface with Demand Assigned Multiple Access (DAMA).
- 9) Management of Administrative Telephone. 1,35/ Architecture and Engineering support.

#### B. Reconciliation of Increases and Decreases (Cont'd)

- 10) Provides on-orbit support of the five
  FLTSATCOM spacecraft during operational
  life of the satellites. Increase provides
  for higher cost of USAF contract for general on-orbit tracking and monitoring support. This support allows continuous
  monitoring of electronics and communications
  systems aboard the four FLTSATCOM spacecraft
  as well as correction of on-orbit anomalies
  and equipment malfunctions.
- 11) OTCIXS (Officer-in-Tactical Command Information Exchange Subsystem) provides Battle Group with a two-way, tactical UHF satellite link for ship-to-ship exchange of command and control teletyse information. Increase is needed to provided field support for the hardware and software life cycle support of OTCIXS equipment. This will include modification of hardware and software to interface with Demand Assigned Multiple Access (DAMA).
- 12) Tactical Data Information Exchange Subsystem (TADIXS) will provide mission critical targeting data broadcast from shore sites to TOMAHAWK cruise missile platforms and Tactical Flag Command Center Command Ships. Increase provides for the installation of prototype TADIXS Gateway Facility Processors (TGFs) at selected shore sites. Through the use of TGFs installed at the NAVCAMS, the TADIXS shore sites will be capable of automatically routing and broadcasting targeting data to support naval forces.
- 13) Super High Frequency (SHF) Satellite
  Communications (SACOM) will provide general
  support and maintenance of SHF equipment at
  ship and shore sitis. FY 86 increase is
  due to increased cust to support aging
  AN/SSC-6 terminals, support of installation
  and continuing requirement for life cycle
  support for newly installed AN/WSC-6 SHF
  shipboard terminals, and preparation and
  maintenance of shore site interface
  terminals.

#### B. Reconciliation of Increases and Decreases (Cont'd)

- 1,061
  Subsystem (TACINTEL) provides for the support of two additional shipboard installations and one additional TACTINTEL Line Control Facility (TLCF) system. FY 86 increase is due to additional TACTINTEL software support, program management support, BESEP preparation and installation at TLCF's including replacement of AN/USH-23 units at TACTINTEL shore sites and for support of the conversion of TACTINTEL to a new crypto device.
- Special Intelligence Submarine Satellite Information Exchange Subsystem (SI SSIXS) -SSIXS provides the capability to broadcast Very low Frequency (VLF)/VERDIN (VLF/LF Multi-Module Multi-Channel Broadcast System) and Ultra High Frequency (UHF). The Operational Requirement for SI SSIXS was validated to procure four SI SSIXS shore suites and 100 additional memory boards for the submarine SSIXS. SI SSIXS suites of equipment will be installed at all the General Service (GENSER) SSIXS shore sites to provide an off-the-air monitor for quality and crypto checks. The increase is due to new requirement for Field Maintenance Activity support, software maintenance support, new hardware maintenance support requirements, and new equipment installations.
- Submarine Satellite Information Exchange Subsystem (SSIXS) II SSIXS provides increased capacity to the shore computers, printers disk and tape recorder and keyboard displays to accommodate software expansion, increase storage capacity, provide additional input/output ports on the computer and increase reliability. This effort will modify the SSIXS shore and submarine software included in this capability. The increase is due to new requirements for software maintenance support, new hardware maintenance support requirements, and new equipment installations.

1.083

B. Reconciliation of Increases and Decreases (Cont'd)

17) SATCOM Signal Analyzer (SSA) provides real-time monitoring of all Navy UHF satellite links enabling identification and elimination of link related problems. This monitoring function will provide link management capabilities required but not available with use of current equipment. This effort will provide for field Maintenance Support, depot support, software maintenance support, depot spares support, and installation support.

Multiple (Continuing) Installations provides for the design, engineering and installation of Navy digital communications systems. This effort is important because it results in a higher capacity system that makes more efficient use of leased and government owned circuit capacity, allows easier cryptographic protection of information, and results in improved circuit quality. Completion of this effort is required to implement the Navy portion of programs such as DDN, Hawaii Area Wideband System, and Digital Radio and Multiplexer Acquisition. Navy has a very substantial investment in these programs which will be wasted without completion of the digitization effort, which will enable

19) Multiple (Continuing) Installations provides for HF chirpsounder installations at shore sites. Chirpsounders are needed to increase the reliability of High Frequency radio circuits with deployed Navy forces by allowing prediction of when frequency changes are needed. Completion of planned chirpsounder installations at shore stations worldwide is essential in providing adequate HF communications for command and control of naval forces.

Navy circuits to interface with DCA long

haul transmission facilities.

130

851

1,300

#### B. Reconciliation of Increases and Decreases (Cont'd)

- 203 Replaces two unserviceable Ashore Mobile 203 Contingency Communication Van (AMOC) shelters with new standard shelters. Equipment must be installed in the new shelters and integrated into a usable configuration. AMCC vans are CINC controlled air mobile assets capable of rapid relocation to crisis areas requiring HF radio and satellite communications support on short notice, and comprise a key communications asset for support of combat operations in contingency situations.
- 21) Installs Remote Information Exchange
  Terminals (RIXT) to provide users separate
  from large Navy shore activities with
  responsive reliable message service.
  Present equipment is inadequate in capacity,
  obsolete, and must be replaced.
- 22) Installs equipment procured to replace 381 obsolete equipment and implements planned system improvements at Navy command and control facilities in Italy. These improvements are required to provide adequate communications capacity and reliability.
- 23) Installs equipment being procured to 192 provide adequate HF radio capacity and technical control functions at the facility recently consolidated into Naval Communications Station, Jacksonville, FL.
- 24) Provides for site surveys and minor site
  preparation needed to complete improvements
  at Naval Communications Station Sigonella,
  Italy. These improvements will allow needed'
  flexibility in providing communications
  coverage in the Mediterranean area.

#### B. Reconciliation of Increases and Decreases (Cont'd)

| 25) | Other Long Haul Communications Program Increase - Provides for implementation of programs which will increase the degree to which the Navy portion of the DCS is "digitized." Without accelerated progress in accomplishing this conversion of Navy long haul communications paths to digital operation, numerous communications projects will not be implemented in time to provide required long haul connectivity and capacity. These increases fund implementation of the programs detailed | 2,131 |
|-----|---|-------|
|     | below:  |       |

| a. | DCS Quality Assurance/Technical Evaluation |       |
|----|--|-------|

| b. | NATO Interconnects                         | (123) |
| С. | Low-speed Time division Multiplex          |       |
|    | Program                                    | (51)  |
| ď. | Secure Voice Improvement Program           | (209) |
| е. | Jam Resistant Secure Communication         | (790) |
| f. | Projects less than 50K                     | (851) |

- 26) The Secure Conferencing Project (SCP)

  1s a joint program which will provide a secure voice and graphic capability for CINC commanders and subordinate commands. Funding will provide for site preparation, design, and integration of SCP installations at USCINCPAC and CINCPACFLT.
- 994 27) The Secure Voice Interoperability Program (SVIP) replaces AUTOSEVOCOM and will provide for secure voice telephone communications at 3,500 sites worldwide. This program will install KY-72 secure voice terminals, key distribution centers and radio wireline interfaces (RWI). FY 1986 funding will provide for site surveys and long-lead materials required for six RWI installations (3 in FY 1987 and 3 in FY 1988), and SVIP transmission study, and site surveys, long-lead materials and preparation of standard installation plans for 350 secure voice terminals at 300 sites.

#### B. Reconciliation of Increases and Decreases (Cont'd)

The Advanced Narrowband Digital Voice Terminal (ANDVT CV-3591) is a ship, airborne, shelter, or vehicle mounted subscriber terminal that provides for the transmission of digital data over narrowband circuits. To provide cryptographic protection, the CV-3591 is used in conjunction with a plug-in communications security module (KYV-5). The ANDVT/KYV-5 will augment and eventually replace PARKHILL and will fulfill the requirement for communications security of tactical high-frequency circuits. Funds are required over the life cycle of ANDVT for site surveys. installations, software support and integrated logistics support.

816

- 29) VINSON (KY-57/58) will provide secure voice communications over very high frequency and ultra high-frequency radios in ship, air, shore and Marine Corps environments. VINSON replaces KY-8, KY-28, and KY-38 equipment. Funding provides for installation of VINSON ashore at 79 sites in FY 1986. Installations will continue through FY 1994 at 100 sites per year.
- The KG-81 is a bulk encryption device 199 for DCS wireline and microwave links required for the Digital Radio and Multiplex Acquisition (DRAMA) project, associated wideband projects and weapons test ranges. Without installation of the KG-81's, unsecured wideband channels are subject to hostile intercept. Funding provides for two installations in FY 1986. Installations will continue in outyears.
- 31) The KW-46 replaces Navy Fleet Broadcast 2,681 crypto, KW-37 and KG-14. The KW-37 has become increasingly hard to maintain (vacuum tubes) and the KG-14 is approaching the end of its useful life per NSA with a directed replacement data of 1990. Funds provide for installation of KW-46's at ten sites in FY 1986.

# B. Reconciliation of Increases and Decreases (Cont'd)

- 32) The KG-84 is a general purpose high—
  capacity microminiature key generator
  to process synchronous and asynchronous data.
  The KG-84 replaces the KW-7, KG-13, KW-26,
  and selected KG-30 series equipment. It
  is also designated as the general purpose
  encryption device for OTCIXS, TADIXS, DDN,
  MILSTAR, WSC-6, Naval Wargaming System,
  SURTASS, WWMCCS/WIS, and other communications
  circuits. Funding provides for installation
  of 30 KG-84's in FY 1986 and for beginning
  site surveys for installations scheduled for
  FY 1987-1990.
- The Navy Telephone Security Project (NTSP) 4,734 will provide secure voice telephone capability for Navy headquarters activities and selected navy laboratories and contractors. The final system will provide a fully connected secure telephone service to these installations. The system combines available telecommunications and COMSEC technologies with physical security measures to provide secure communications in three configurations: deploying secure subscriber terminals, installing a telephone PABX switch in a protected enclave and establishing a network of PABX protected enclaves connected by encrypted trunks. FY 1986 funding will provide for facility modifications at four Crystal City locations, improved physical security measures and installation of KY-71 secure telephones at 12 facilities.

### 5. Program Decreases

-17.593

### A. Other Program Decreases in FY 1986

(-17,593)

1) East Africa Communications

-20

2) ADP Security

-800

# B. Reconciliation of Increases and Decreases (Cont'd)

- 3) Demand Assigned Multiple Access (DAMA) -2,762
  DAMA provides for continued installation
  test support to continue phased integration
  of additional baseband systems and provides
  for depot repair training. Decreases
  reflects completion of hardware support,
  a gradual decrease in supply support,
  maintenance support, and operational
  support for UHF DAMA.
- 4) KG-84 Compatability This effort provides for transition from the KG-36/35 to the KG-84A crypto device hardware used with existing Officer-in-Tactical Command Information Exchange Subsystem (TADIXS) Fleet equipment. Decrease reflects completion of software maintenance upgrade in FY 1985.
- 5) Aircraft SATCOM provides for Ultra High
  Frequency (UHF) Satellite Communications
  (SATCOM) Secure Voice and teletype on aircraft
  used by CNO. This equipment permits secure
  voice and teletype communications via UHF
  SATCOM links to ship and shore terminals
  with connectivity to Automatic Digital
  Information Network and the Fleet Command
  units afloat. Decrease reflects completion
  of site survey and preparation in FY 1985.
  The actual installation and checkout will
  occur in FY 1986.
- 6) CUDIXS/NAVMACS provides for the continued viability of Common User Digital Information Exchange Subsystem (CUDIX)/Naval Modular Automated Communications System (NAVMACS) as the workhorse subsystems for GENSER record traffic communications via satellite. This effort will complete the software modifications for DAMA compatibility in FY 1985. Installation and hardware support will begin in FY 1987.
- 7) Field Maintenance Activity (FMA) SupportDecrease in FMA support for Fleet SATCOM
  Monitor (FMS) which will be replaced by
  the SATCOM Signal Analyzer (SSA)

# B. Reconciliation of Increases and Decreases (Cont'd)

- 8) General Satellite Communications (SATCOM) -1,495
  This decrease is due to the completion
  of UHF portable suitcase SATCOM terminals
  portion of the Joint Crisis Management
  Capability (JCMC) effort in FY 1985.
- 9) LEASAT NAVELEX This decrease in support of AFPRO TRW for MD-942() and OM-51() represents a gradual reduction of requirements as the spacecraft are launched. Inspection and Repair As Necessary (IRAN) for OM-51 and engineering and clerical support for overall LEASAT effort will continue in the outyears.
- 10) OM-55 Support Decrease is due to -465 completion of initial check out and on line testing in FY 1985. Maintenance and support costs start up in FY 1986 and will be continuous in the outyears.
- 11) Surveillance Towed Array Sensor System -1,490 (SURTASS) Decrease results from completion of installation of SURTASS modems at SURTASS shore sites in FY 1985.

  Maintenance and support costs will be required on a continuous basis for this equipment.
- 12) Reduced installation of satellite -3,693 communications tracking systems and other telecommunications outfitting support.
- 13) Burst Error Coder (BEC) Decrease is due -610 to the bulk of installations completed in FY 1985. Maintenance and support is required on a continuous basis.
- 14) Adaptive Multiplex The decrease is due to -610 fewer installations scheduled for FY 1986 than accomplished in FY 1985. Maintenance and support is required on continuous basis.
- 15) Reduction reflects reduced contractor workyears due to development efforts and
  implementation of MMPM in ISABPS and
  Enhanced VERDIN.

# B. Reconciliation of Increases and Decreases (Cont'd)

| 16) | Reduction in the advice and assistance program and SIGSEC training.  | -112 |
|-----|--|------|
| 17) | Software support for the SIGSEC TEMISS system located at Headquarters, Naval Security Group.   | -161 |
| 18) | Decrease of nine workyears associated with reduction of civilians resulting from implementation of more efficient vulnerability assessment procedures. | -297 |
| 19) | Reduction of one ASCOT installation in FY 1986.  | -21  |
| 20) | Decrease in telecommunications spare parts requirement.  | -54  |

### Department of the Navy Operation and Maintenance, Navy

Activity Group: <u>Environmental/Prediction Support</u>
Budget Activity: <u>III - Intelligence and Communications</u>

### I. Description of Operations Financed.

Environmental/Prediction support is provided for programs under Strategic Systems, Tactical and Surveillance Systems, Navigation and Charting, and Command and Control. This support requires the collection and processing of ocean environmental data and the provision of specific products to satisfy:
(a) Chief of Naval Operations (CNO) and Defense Mapping Agency (DMA) requirements; (b) CNO, fleet and Systems Command requirements for Naval air, surface and sub-surface (SSN) operations; (c) DMA requirements for Unified and Specified Command nautical chart deficiencies; and to provide general meteorological and oceanographic services to the Navy.

Environmental surveys are conducted from 12 ships operated by the Military Sealift Command and 3 aircraft operated by Oceanographic Development Squadron EIGHT.

In FY 1986, this program includes funds transferred from Other Procurement, Navy pursuant to the proposed DoD initiative for elimination of \$3 thousand investment threshold and adoption of central management criteria as governing factor.

- A. Operations in Support of Strategic Systems Details are classified.
- B. Operations in Support of Tactical and Surveillance Systems
  Oceanographic and geophysical data which influence the performance of active
  and passive sensor and weapon systems are collected over broad ocean areas
  to: (1) assist in placement and installation of acoustic arrays and cables
  for the underwater surveillance network; (2) optimize the Anti-Submarine
  Warfare (ASW) sea control mission (including offensive and defensive mining
  and mine countermeasures); and (3) identify the effects that discontinuity
  areas (fronts and eddies) have on fixed and mobile ASW systems in regards to
  ASW/USW tactics. Products include computer assisted ASW prediction products,
  Planning Guides, Area Environmental Assessment, Mine Warfare Pilots and inputs
  to Fleet tactical manuals and sonar operating doctrine. Also, in FY 1986,
  this activity group includes the DoD share of fixed costs for Polar
  Icebreakers operated by the US Coast Guard in support of DoD missions.
- C. Operations in Support of Navigation and Charting (1) Hydrography. Hydrographic data are collected in nearshore areas to support the production of coastal, combat, approach, harbor and special purpose nautical charts in satisfaction of DMA requirements. The data are principally collected from two (385 ft.) coastal survey ships. Additional data are collected through commercial contracting, national and international cooperative surveys (National Ocean Survey, United Kingdom Navy Hydrographic Department and the Hydrographic Survey Assistance Program (HYSAP)). (2) Magnetics. A specially configured aircraft is used to measure the earth's magnetic field. The collected magnetic data is the primary input for development of the United States World Magnetic Model and is incorporated by DMA onto world charts.

D. Operations in Support of Command and Control This activity group encompasses resources for the operation of 60 Naval Oceanography Command Activities. It also provides for centralized technical direction of meteorological and oceanographic prediction functions on naval ships, fleet staffs and Unified staffs including: forecasts and prediction of environmental effects on shipboard weapon sensor systems; optimum track ship routing; surface and sub-surface ice forecasting support for polar areas; Naval Environmental Display Station (NEDS) for Automated Environmental and Weather Network; the Satellite Data Processing and Display System (SPADS); and the Navy Oceanographic Data Distribution and Expansion System (NODDES).

Activity Group: Environmental/Prediction Support (Cont'd) Reconciliation of Increases and Decreases (Cont'd) 3. Functional Program Transfers 27.058 Transfers In (27.058)Inter-Appropriation 27,058 a) Expense/Investment Criteria Revision - Transfer from Other Procurement, Navy pursuant to the proposed DoD initiative for elimination of \$3 thousand investment threshold and adoption of central management criteria as governing factor. (14,608) b) Stock Funding of Aviation Depot Level Repairables -Change in obligational authority resulting from fullyear implementation of AVDLR stock funding initiative, begun 1 April 1984. (1,950) c) Polar Icebreakers - DoD share of fixed costs for Polar Icebreakers operated by the US Coast Guard in support of DoD missions. (10,500) Program Increases 14,911 One-Time FY 1986 Costs (175)Contractor assistance for digitizing and automating oceanographic geophysical parameters, such as subsurface currents, magnetics, sound velocities, visability and acoustic reflectivity. 109 Additional resources for the

66

maintenance and refurbishment of the telemetry and sidescan sonar survey subsystems which are part of the TELEPROBE survey system. TELEPROBE is a highly efficient towed data acquisition system consisting of various sensors.

- B. Reconciliation of Increases and Decreases (Cont'd)
- B. Other Program Growth in FY 1986 (14,736)
  - 1) Increased emphasis on providing Arctic environmental support focuses on the use of satellites and expendable probes to expand present efforts to collect real time data on ice thickness, ice drift, Arctic bathymetry, under ice currents, ice structure, and acoustic, geodetic and magnetic characteristics. Funding supports the purchase of buoys and expendable probes to collect data and processing and conversion of data from the Arctic ice cap area and the marginal ice zone. Additional Arctic environmental support is necessary to meet existing and emerging Defense Mapping Agency and Fleet requirements.

1,960

2) Contractor assistance for the collection, analysis, processing and reporting of a newly identified requirement, low frequency transmission loss, for inclusion into existing mine warfare pilot products and data reports for the successful mine sweeping of pre-selected wartime ingress/egress routes (Q-Routes) of strategic U.S. harbors and their approaches.

542

3) Increased level of effort required from the U.S. Coast Guard for the collection of acoustic bottom reverberation data for support of the Mine Warfare Program.

61

4) Increased resources for two additional mine warfare pilots required due to newly established and accelerated schedules issued by the Mine Warfare Command for effectiveness of mining, mine hunting and mine sweeping operations.

- B. Reconciliation of Increases and Decreases (Cont'd)
  - 5) Contract software support for the integration of additional geophysical parameters into existing mine warfare data acquisition and processing systems.
     65
  - 6) Increase for purchase of expendable bathythermograph (XBT) probes utilized in collection of acoustic survey data as well as in ASW detection/prediction systems.
  - 7) Contractor assistance for implementing new Automated Data Processing
    (ADP) procedures and technologies.
    Specific tasks include TEMPEST
    testing, security test and
    evaluation, contingency planning
    and testing, and incorporating
    security features in applications
    software.
    340
  - 8) Increased spare part requirements for maintenance/repair of the navigation and sonar systems supporting the Mine Warfare Program and for geodetic distance measurement and depth sounding equipment utilized in conducting coastal hydrographic surveys.
  - 9) Contractor assistance for implementing software for processing and
    display of satellite derived data
    to provide real-time ASW tactical
    decision aids to fleet ASW forces.
    71
  - 10) Contract for the processing and analysis of non-acoustic oceanographic parameters (such as, chemical, optical, and dynamic field) to support operational requirements of the Ocean Measurements Program (SSBN Security).

# Activity Group: <a href="mailto:Environmental/Prediction Support (Cont'd">Environmental/Prediction Support (Cont'd)</a>

- B. Reconciliation of Increases and Decreases (Cont'd)
  - ll) Increased support for an expanded level of effort of compilation and production of critical Submarine Oceanographic Notebooks (2) required by Commander Submarine Force U.S. Pacific Fleet (COMSUBPAC) and Commander Submarine Force U.S. Atlantic Fleet (COMSUBLANT). This data will greatly reduce SSBN's detectability by enemy ASW forces while on patrol.

202

12) Resources are required to provide for implementation, training, maintenance and logistic support of the Enhanced Geophysical Fleet Mission Program Library System (EGS), to increase the capabilities of geophysical units for providing oceanographic, meteorological and acoustic support aboard CV/CVN, BB, LCC, LHA and other platforms.

400

13) Increased level of effort to support the geophysical satellite function of the Naval Oceanography Command.

58

14) Contractor assistance for software preparation and digitizing of acoustic measurements of propagation/bottom loss, ambient noise, and volume reverberation data (BLUG) for incorporation into shore-based and on-scene acoustic ASW prediction models.

614

Increased level of maintenance support for depot level repairables associated with the acquisition and operation of additional inertial measurement units (IMUs) on the Ocean Survey Program (OSP) ships.

183

16) Increased overhaul costs associated with major overhaul, including dome drop, of the sonar array survey system on the USNS BOWDITCH.

- B. Reconciliation of Increases and Decreases (Cont'd)
  - 17) Provides for the correction of existing deficiencies and establishes a project for the continued support of the operation of the magnetic tape library for the Central Computer Center. Services provided will include both on and off site tape storage, labeling, accounting, and the cleaning and certification of tapes utilized both on the data collection platforms and for in-house data processing.

252

18) Increase to reduce backlog for digitization of bathymetric and magnetic survey data in support of the Ocean Survey Program (OSP) and to establish a productivity level to prevent backlog increase.

110

19) Provides for new/additional technical services required for the integration of new software for the processing of magnetic survey data on the Magnetics Automated Information Systems (MAGAIS).

115

20) Establishes a program for the standardization of special purpose software, software integration, software conversion and documentation for the majority of existing applications programs in accordance with the Five-Year Software Improvement Program.

1.051

21) Increased cost associated with sponsor reimbursables (55) and overhaul of survey systems equipment on the USNS DUTTON, HESS and WYMAN (300)

- B. Reconciliation of Increases and Decreases (Cont'd)
  - 22) Additional field support resources to provide for expansion of the Worldwide Regional Hydrographic Survey Assistance Program (HYSAP).

168

23) Increase to support outfitting of Oceanographic Units aboard the USNS platforms which support the Ocean Survey Program (OSP).

1,706

24) Increase for accelerating contractor assistance in the collection, processing and analysis of coastal hydrographic survey data in priority Atlantic Command (LANTCOM) and Central Command (CENTCOM) areas. Data collected provides the information for the production of new or revised port/harbor, approach, coastal, combat, and special purpose nautical charts by the Defense Mapping Agency (DMA)

2,939

25) Contract digitization of airborne vector and shipboard collected magnetic data for inclusion into the DoD Geomagnetic Library.

52

26) Increase to the Typhoon Haven Program at FLENUMOCEANCEN for formatting and developing additional Navy Technology Application Guides.

69

27) Increase to Midway Contract to furnish radison instrument package hydrogen and helium for Naval Western Oceanography Center (NAVWESTOCEANCEN).

27

28) Increase to acquire 78 replacement alphanumeric printer terminals in support of the Optimum Path Aircraft Routing System (OPARS) used to optimize fuel consumption on missions.

- B. Reconciliation of Increases and Decreases (Cont'd)
  - Increased cost to support software development and software conversion, equipment installation and training for Satellite Processing Center Upgrade (SPUC) at FLENUMOCEANCEN. Current system processes data from the Defense Meteorological Satellite Program (DMSP) and NIMBUS Satellite. Additional satellite data from GOES. TIROS. GEOSAT satellites. new sensors on DMSP Satellites and data from shared METSAT (joint agreement among Air Force, Navy and NOAA) are required to improve the initial state from which ocean/atmospheric analyses and predictions evolve (e.g. high wind and sea warning, optimum path aircraft routing. optimum track ship routing, tactical ship routing, tropical cyclone analysis, etc.).

722

30) Increase associated with equipment maintenance cost of purchased mainframes on Primary Environmental Processing System Replacement (PEPSR), Satellite Processing Center Upgrade hardware, the expanded version of the PEPS upgrade and a partial year NODDES/SPADS support of the regional oceanography centers.

1.050

31) Increase in level of effort of the climatology program at Asheville, NC includes initiation of the coastal zone program to provide climatology data on areas of unusual concern. continuous updating of tropical cyclone information to assist in forecasting Pacific typhoons, upgraded support to meet requirements of FICEURLANT, NAVOCEANCOM, NAVENPREDSCHFAC, NSWC Dahlgreen. Va and PNTC, upgrading of software to take advantage of increased computer capabilities and development of improved upper air climatology program in conjunction with USAF.

- B. Reconciliation of Increases and Decreases (Cont'd)
  - 32) Increased flying hours to reflect full availability of aircraft with no scheduled depot level maintenance downtime.

249

5. Program Decreases

-2,659

A. Other Program Decreases in FY 1986

(-2,659)

 Change in consumption rates and type of aircraft utilized reduce the average cost per flight hour.

-955

2) Savings generated by economic purchase of leased ADP equipment central processing units and associated memory.

-1,517

 Reduction in level of NODDES/ SPADS system software development and documentation purchased during FY 1985.

-187

# Department of the Navy Operation & Maintenance, Navy

Activity Group: Naval Observatory

Budget Activity: <a href="III - Intelligence and Communications">III - Intelligence and Communications</a>

# I. Description of Operations Financed.

This budget request covers operating costs for the Naval Observatory (NAVOBSY) which is located in Washington, D.C. The mission of the NAVOBSY is to make observations of and predict the positions of the sun, moon, planets and stars and to provide precise time, for use in navigation and positioning. Typical star and planet observing programs last between seven and ten years. The only two countries doing fundamental positional astronomy are the United States (NAVOBSY) and the Soviet Union observatories.

This effort has many applications, both military and civilian. Some of the Department of Defense (DoD) applications are: calibration of satellite navigation systems, orbit calculations and predictions, precise guidance in space, precise positioning using time-synchronized systems, secure communications, sun and moon phenomena (rise and set, azimuths and altitudes) and earth rotation. Observations are taken at permanent sites in Washington, D.C., Richmond, Florida, Flagstaff, Arizona and the Black Birch Astrometric Observatory, New Zealand. The NAVOBSY also uses the Radio Astronomical facility at Green Bank, WV for the real-time determination of Universal Time and polar motion under a memorandum of understanding with the National Science Foundation.

The NAVOBSY sets the Time Standard for the DoD and the United States. As single manager of Time for DoD, the establishment, maintenance and improvement of a clock system of high stability, reliability, and precision is required. NAVOBSY developed the Precise Time and Time Interval (PTTI) Program to disseminate, distribute and transfer continuous time synchronization on a worldwide basis. This time synchronization is accomplished by portable clocks to reach the highest feasible accuracy and by many other systems such as satellites for users with less stringent requirements. The NAVOBSY maintains Precise Time Reference Stations around the world and monitors all radio navigation systems.

The NAVOBSY calculates and publishes the various astronomical and navigational almanacs as well as special data required by the Navy, Defense Department, other Government agencies and the general public. Strategic organizations of DoD are routinely supported. NAVOBSY is the sole source of certified computation for legal and civil use. The NAVOBSY is the only observatory in the U.S. providing fundamental astronomical data and serves as the central source of such data for the Government.

In FY 1986, this program includes funds transferred from Other Procurement, Navy pursuant to the proposed DoD initiative for elimination of \$3 thousand investment threshold and adoption of central management criteria as governing factor.

# II. Financial Summary (Dollars in Thousands).

Navy pursuant to the proposed

DoD initiatives for the elimination of \$3 thousand investment threshold and adoption of central management criteria as a governing factor.

# B. Reconciliation of Increases and Decreases (Cont'd)

# 4. Program Increases

363

A. Other Program Growth in FY 1986

(363)

The Department of Defense Program Office and Defense Mapping Agency have tasked NAYOBSY with extensive new requirements related to the operation of two Global Positioning System (GPS) time monitoring receivers. NAVOBSY is tasked with setting the precise time for the GPS system and predicting earth rotation positional data for the GPS and other satellite systems. In order to accomplish these additional requirements, four astronomers and three electronics technicians are required. The information obtained will provide more accurate communication and navigation information to the fleet. Funds support the salary and fringe benefit costs of 3 civilian workyears.

88

2) Increase supports the expansion of the NAVOBSY's maintenance contracts to cover replacement clocks (Cesium Beam/Mercury Ion-Storage devices) and associated electronics to be acquired in FY 1985 with warranty to expire in FY 1986. These clocks contribute to the Master Clock System and will provide a higher level of accuracy than is possible with current clocks.

B. Reconciliation of Increases and Decreases (Cont'd)

37

46

- 3) Increase supports the start-up of a multi-year program to put tables of star positions in machine readable form (keypunching) through a contract with the Federal Prison Industries. These star tables will be used in conjunction with the New Zealand/Washington 10-year observing program to calculate considerably improved star positions and motions for navigation, positioning and guidance.
- 4) Increased technical support is required for NAVOBSY Flagstaff Station in Arizona. Limited technical support is presently contracted out for new development as well as repair of scientific observational equipment. Recent expansion of operations, including purchase of telescope control and data acquisition equipment, and sophisticated auxiliary machinery reguires increased technical support. Improvement as well as technical quality control of this equipment is essential for continued star position measurements in support of navigation, guidance and positioning.
- 5) Increase supports operation of the Maryland Point Radio Telescope belonging to the Naval Research Laboratory (NRL) for the once a week transfer of precise time from Washington to the NAVOBSY Time Service Alternate Station in Richmond, Florida. Experiments supported by RDT&E funds have shown that using two radio telescopes (one at Richmond, Florida substation and one at the NRL) looking at the same celestial object allows extremely precise synchronization of clocks. In

# B. Reconciliation of Increases and Decreases (Cont'd)

60

58

FY 1986 a segment of this program will become operational, tying the standby clock in Florida to the NAVOBSY master clock with nanosecond precision.

- 6) The lack of maintenance on trees located at the Washington DC Observatory, the Richmond, Florida substation, and the Flagstaff, Arizona station has resulted in the lack of barriers to incidental light and unacceptable ground level turbulence thereby seriously hampering astrometric observations. A major effort to prune, remove, and plant trees at these locations will begin in FY 1986 and will be accomplished by contractual procurement. Restructured tree groupings will act as a barrier to incidental light, prevent ground level turbulence to facilitate still air, and prevent the growth of physical obstacles to astrometrics observations.
- 7) The construction of a new transit circle at the New Zealand observation site has resulted in the influx of a large amount of data relating to star positions. Four additional Astronomers are required in order to collect and collate this data for further use. The increased amount of star positioning data will allow fleet units to directly access computer facilities in order to obtain positional information. The additional data will also result in the increased accuracy of all almanacs published by Naval Observatory, thereby allowing fleet units to more precisely ascertain positional information. Funds to support the salary and fringe benefit costs of 2 civilian workyears.

### III. Performance Criteria.

Accurate stellar positional data is published in Naval Observatory publications and provided to Navy and Department of Defense (DoD) programs (such as Polaris and Trident, Defense Mapping Agency (DMA), Global Positioning System (GPS) and Tracking Stations) on request.

Precise Time and Time Interval (PTTI) accomplishments include maintaining, operating and improving the U.S. Master Clock, controlling PTTI transmissions and disseminating time and phase corrections. Information is sent regularly by mail for 800 addressees and daily by teletype for rapid services for high priority information. Time ordered systems such as Loran "C", TRANSIT, GPS, and the Defense Satellite Communication system are kept on NAVOBSY time within very small tolerances. A computer-based data dissemination system has been developed which allows direct readout via telephone lines by DoD users of the NAVOBSY monitoring data. As a result, response to needs for calibration and control by platforms around the world is now immediate. The Naval Observatory maintains Precise Time Reference Stations around the world.

The major publications in support of safe navigation are:

- (1) The American Ephemeris and Nautical Almanac: basic reference for all work in astronomy, astronautics and geodesy.
- (2) The Nautical Almanac: used for celestial navigation on the Earth's surface.
  - (3) The Air Almanac: used for celestial navigation by aircraft.
- (4) <u>Publications of the U.S. Naval Observatory</u>: contains tables of star position, planetary coordinates, double stars and other fundamental data.

Program Package: Naval Observatory (Cont'd)

# III. Performance Criteria (Cont'd)

- (5) <u>Time Service Publications Series 1-17</u>: daily, weekly, monthly and irregular; contains data on time, polar motion, all time-ordered systems including satellites, and advance predictions of Earth rotation.
- (6) <u>Special Military Program</u>: developed for Navy, Defense Mapping Agency, other DoD, NASA, and other U.S. and international use as required, including tables of sunrise, sunset, sun angles and azimuths.
- (7) <u>Astronomical Phenomena</u>, <u>Bureau of Land Management Ephemeris</u>, and other publications for U. S. Government agencies and the general public.

The Naval Observatory strives to respond in a timely manner to Navy and DoD requirements for astronomical data and precise time and for increased accurancy in these quantities.

# Department of the Navy Operation and Maintenance, Navy

Activity Group: Maintenance of Real Property

Budget Activity: <u>III - Intelligence and Communications</u>

# I. Description of Operations Financed.

This program provides maintenance, repair and minor construction of all buildings, structures, grounds and utility systems required at Naval Oceanography Command facilities, Naval Investigative Service activities, Naval Telecommunications Command facilities, the Naval Observatory and other ancillary activities to permit assigned forces and tenants to perform their mission.

The major elements of this program are:

- o Facilities Maintenance finances scheduled, day-to-day recurring maintenance, and emergency service work needed to preserve facilities.
- o Major Repairs provides major repairs necessary to bring existing facilities into adequate condition to support assigned missions.
- o Minor Construction finances the erection, installation or assembly of real property facilities; the addition, extension alteration, conversion or replacement of existing real property facilities; the relocation of real property facilities; and the installation of equipment which becomes part of a facility.

# II. Financial Summary (Dollars in Thousands).

# Department of the Navy Operation and Maintenance, Navy

Activity Group: Base Operations

Budget Activity: III - Intelligence and Communications

# I. Description of Operations Financed.

This program group provides the base support services and material required for Naval Oceanography Command facilities, Naval Investigative Service activities, Naval Telecommunications Command facilities, The Naval Observatory, and other ancillary activities to permit assigned forces and tenants to perform their mission.

The major elements of this program are:

- Base Communications Includes costs for administrative telephones, telecommunications centers, industrial security networks, and paging networks.
- o <u>Utility Operations</u> Includes operating expenses for purchased electricity, electricity generating plants, purchased steam and hot water, heat plants, utility distribution systems, waste systems, air conditioning and refrigeration plants.
- o <u>Personnel Operations</u> Support required for personnel related functions including expenses for:
- <u>Bachelor Housing Operations and Furnishings</u> provides support for the operation of barracks and the purchase and maintenance of personnel support equipment related to this housing.
- Other Personnel Support provides for mess halls, sales activities, laundry and dry cleaning facilities.
- Morale Welfare and Recreation provides authorized appropriated fund support for shore based recreation activities.
- Station Hospitals, Medical and Dental Clinics direct and indirect health are costs for Health Care Facilities not under the financial control of the Navy Medical Command.
- Human Goals provides support for programs which focus on improving organizational and individual effectiveness and the administrative support of the Alcohol and Drug programs.
- o <u>Base Operations Mission</u> Support for those Base Operations functions which are required in direct support of the mission of the base. For example, Fleet Training Support, Logistics Support, etc. Expenses are included for the following functions:

# I. Description of Operations Financed (Cont'd)

- Retail Supply Operations In addition to standard supply functions, this item includes the procurement, receipt, storage and issue of bulk liquid fuel, including operating aircraft fuel servicing facilities. Additionally, waterfront operations such as handling incoming and outgoing cargo and loading/unloading live ammunition onto and from combatant vessels are included.
- Maintenance of Installation Equipment provides for maintenance of major shore based equipment including: service and miscellaneous craft, construction equipment (non-deployable), weapons, electronics, electronic engineering, and fleet moorings.
- Other Base Services provides for the maintenance and operation of vehicles/other transportation equipment, port services (includes navigational assistance to ships, operation of service craft, degaussing operations, and oil spillage cleanup).
- o <u>Base Operations Ownership</u> Support required at shore bases regardless of type of mission being performed which must be sustained to have a functioning base. Expenses are included for the following functions:
  - Other Engineering Support Public Works Department Administration, engineering services, custodial services, refuse/garbage collection and disposal, snow removal, rental and leasing of real property, and fire protection and firefighting for Naval activities and their tenants.
  - Administration provides support related to financial/resource management, civilian manpower management, and maintaining military personnel records.
  - <u>Automated Data Processing</u> provides analysis, programming, equipment rental, operations and maintenance, contractual services and supplies.
  - Hazardous Waste Material Handling includes personnel, supplies and training associated with the identification and disposal of hazardous wastes.
  - Audiovisual provides supplies and services required for audiovisual support.

0&M,N 3 - 64

communications Network at Farfan, Panama to O&M,N BA-2 CINCLANTFLT

# B. Reconciliation of Increases and Decreases (Cont'd)

# 4. Program Increases

1,657

A. Annualization of FY 1985 Increases

(25) 25

- 1) This increase reflects the annualization costs for the salary of six Security Guards (1 Man Year) authorized in FY 1985. Increased staffing will allow the Observatory to fill its four post requirements 24 hours per day 7 days a week.
- B. One-Time FY 1986 Costs

(214)

 Increased base services requirements for shielding of special equipment spaces in Top Secret vault area in compliance with TEMPEST security regulations.

91

2) Increased base services requirements for installation of communication lines/equipment and for contract movers/ vehicles associated with initial relocation and occupancy of the new Oceanographic building in FY 1986 (MILCON Project P-004).

123

C. Other Program Growth in FY 1986

(1,418)

 Increased recurring base services costs for physical security associated with various Telecommunications sites and full time occupancy of new Oceanography building. 586

2) Increased utility cost associated primarily with acquisition, installation and/or upgrade of large scale automated data processing equipment and associated peripherals including:

- a) Primary Environmental Processing Systems (PEPS) - 3 CDC 6500s
- b) Oceanographic Information System (OCEANIS) - 1 UNIVAC 1100/83
- c) Satellite Processing Center (SPC 1 CDC CYBER 170/175

- B. Reconciliation of Increases and Decreases (Cont'd)
  - d) Naval Environmental Display Station (NEDS-1) - 11 (Special Government Design)
  - e) Consolidated Communications System (CCS) 2 CDC MP-32s
  - f) Primary Environmental Processing System Upgrade (PEPSU) - 1 CDC CYBER 205 and 1 CDC CYBER 170/730
  - g) NEDN Oceanographic Data Distribution & Expansion System (NODDES)/Satellite Processing & Display Systems (SPADS) -12 Data General MV-8000II.
  - h) Hydrographic/Oceanographic Data Acquisition Systems (HODAS) - 12 DEC PDP-11/34A.

Also, related additional areas occupied and new buildings in Rota, Spain and at the Naval Oceanographic Office.

# 5. Program Decreases

-2,343

- A. One-Time FY 1985 Costs (-550)
  - 1) COMNAVTELCOM Office Productivity -300 Enhancement (COPE) Program
  - 2) One-time initial support costs -250 for establishment of NAVCOMMSTA's Jacksonville and Puget Sound
- B. Other Program Decreases in FY 1986 (-1,793)
  - 1) Savings generated from Energy -1,711 Conservation program.
  - 2) Savings generated from Efficiency -53 Review program.
  - 3) Net reduction in rental savings -29 associated with exercising lease-to-purchase option on administration equipment.
- 6. FY 1986 President's Budget Request

100,296

#### Department of the Navy Operation and Maintenance, Navy

Budget Activity: 8 - Training, Medical and Other General Personnel Activities 0512g/2

#### I. Description of Operations Financed

This Budget Activity incorporates three personnel of inted programs: (1) Training, (2) Health Care and (3) General Personnel Sur int from recruitment to retirement. In addition, base operations costs to support these programs are included.

For Training, \$986 million is requested for facilities, equipment, staff and curricula to support the training and educational requirements of an active duty manpower end strength of 605,725 naval personnel along with members of the Naval Reserve, other services and foreign and civilian students. The principal effort of Training and Education is to maintain a trained force of personnel able to man and support our active fleet of ships, aircraft and installed complex weapons systems. In recent years, the complexity of our weapons systems has increased dramatically necessitating a proportionate increase in required training. It is an integral part of every sailor's career beginning with recruit training and continuing with the specialized training necessary to provide the unique skills required of a chosen speciality. Unless updated through continuing training, skills quickly become obsolescent in the face of our rapidly improving technology and changing Fleet needs. Education is provided where considered necessary to enable our managers to remain current in their respective professional areas and to enhance their leadership and managerial abilities.

Health care is administered to all active duty personnel with the FY 1986 average strength numbering 796,307 and where facility and staff capacity permit, care is provided to retired and dependent personnel numbering approximately 2,445,315. About 20.6% or \$519 million of the budget request is for medical support. The need for care of retired and dependent personnel while not directly related to combat readiness impacts significantly on the mental attitudes of our active personnel as their perception of our care of their dependents and former Navy comrades can have a positive or negative activational effect.

General personnel support of approximately \$266 million includes the numerous functions necessary to the maintenance of well ordered combat and support forces. Recruit advertising, recruiting, career counseling, morale, welfare, and recreation, human resource management, off-duty and voluntary education, civilian education and the Navy Junior Reserve Officers Training Corps are included in this category.

Base operations support for all of the above totals \$748 million and includes such costs as maintenance and repair of real property, operation of utilities, engineering support, administration, base communications and other base services.

This budget activity contains programs necessary to ensure the healthy, well trained and highly motivated personnel required for the successful pursuit of naval warfare.

#### I. <u>Description of Operations Financed.</u>

Recruit Training indoctrinates recruits in basic military principles and basic naval skills, and provides a realistic understanding of fleet environment and shipboard life.

Operations are conducted at the Navy Recruit Training Commands located at Great Lakes, IL, San Diego, CA, and Orlando, FL. The Recruit Training program accomplishes its purpose through integration of an individual into a structured environment that stresses order and discipline, teamwork, responsive behavior, loyalty, and pride in service. Resources support costs associated with administrative staff travel, classroom supplies, and other training materials and equipment.

The recruit training syllabus is structured to provide the required training to meet the program's objective in a minimum of time. The FY 1977 syllabus was nine weeks. To shorten time spent in a training status prior to reporting to initial duty assignments, the FY 1978 program was based on a reduction to eight weeks. The period was further reduced to 7.7 weeks in FY 1979 and is currently at that level. Although the 7.7 weeks period remained, Recruit Training under arms was instituted on 1 October 1981. That change requires drill with rifles, guard belts and leggings. Time for this training was accommodated by cancellation of certain "free" periods and lower priority (but desired) classes in non-military subjects.

The request includes funds for continued operations of the Academic Remedial Training (ART) program. The program provides basic skill training in order to increase the number of successful recruit graduates. A standardized ART curriculum has been developed for all three Recruit Training Centers. The curriculum is five weeks long – with four weeks of individualized language arts training, and one week of study skills. To a large extent the curriculum is based upon commercially available basic skill training materials.

#### Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Specialized Skill Training

Budget Activity: 8 - Training, Medical, and Other General Personnel Activities

1054g/1-8

### I. <u>Description of Operations Financed</u>.

Specialized skill training resources are used to maintain a trained force of personnel able to man and support surface, sub-surface, and aviation operating forces and their installed complex weapons systems. Navy specialized skill training is conducted at schools located at the Naval Training Centers, Great Lakes, IL, San Diego, CA, Orlando, FL, Newport, RI, and at the Naval Technical Training Centers Corry Field, Pensacola, FL and Treasure Island, San Francisco, CA. These activities are under the command of the Chief of Naval Technical Training, Millington, TN. Specialized Training is also conducted at other schools managed by Commander Training Command Atlantic (COMTRALANT) and Pacific (COMTRAPAC). In addition, specialized training is obtained by contractual services.

Funding for the Specialized Training Program finances the cost of civilian labor, travel, supplies and materials consumed in conducting training courses, factory or contractor training, and general administrative expenses. Funding is also provided for contracting out instructor effort to augment military instructors to support training loads, and funds are provided for contractor maintenance in support of training programs.

In addition, the Job Oriented Basic Skills (JOBS) program is funded in Specialized Skill Training. JOBS was developed to provide career field basic skills and knowledge to assist marginal and sub-qualified service members to successfully complete "A" schools.

1) Modification to Surface Warfare

Officer Career Training - Funds will
support major additions to Surface
Warfare Officer training including
Professional Development, Combat
Systems, and Engineering;
Specialized Engineering Officer
of the Watch for junior officers;
advanced Amphibious and NLSF
training for department heads;
specialized engineering and combat
systems training for prospective
Executive Officers; and increased
tactics training for prospective
Commanding Officers.

+420

Special Warfare and Basic Underwater 2) Demolition (BUDS) - Resources will provide additional consumable materials to support maintenance of additional swimmer and diving equipment required to support an increase in student loading in the Special Warfare program. TAD support will be provided for special weapon system mobile training teams. Substantial increases in Basic Underwater Demolition (BUDS) student loads (360 to 500 students per year) will require additional classroom supplies and consumable diving equipment. The increased load at the RUDS and EOD training site will require additional support of boats and vehicles used to train and transport students to remote sites,

+100

3) Establish Submarine Training
Department at NAVGMSCOL - Resources
will support newly established
submarine training department of
the NAVGMSCOL located at D&S Piers,
Norfolk, VA. Training conducted at
this site will consist of 71 new
course starts.

- B. Reconciliation of Budget to Current Estimate (cont'd).
  - 4) Aviation "A" Schools Resources for several Aviation "A" Schools are required to correct existing deficiencies and to support mandated expansion. Funds will provide for curriculum expansion in support of new equipment/systems as well as associated consumables, laboratory materials and supplies for the following ratings: AO, AT, ABE, ABF, ABH, AME, AD and basic helo school.

+1,918

5) Aviation "C" Schools - Resource requirements for 13 Aviation "C" Schools are included in this submission to support substantial student increases, accelerated course implementation, and curricula improvement required to correct operating and maintenance deficiencies reported by fleet review. These resources are required to meet Congressionally approved fleet manning increases and modernization and include: instructor manning increases, consumables, lab supplies, texts, classroom furniture, spare parts, and a site preparation. Requirements include: upgrade of Naval Parachutist course, upgrade of CV Air Compressor course to meet fleet need in O2N2 training. implementation of ABH course, 200 student expansion of AEI/AVI course. accelerated implementation of Photo Equipment course, student expansion of MDI school, introduction of new equipment/expansion of metrological course and implementation of Marine

Air Traffic Controller course.

+413

- B. Reconciliation of Budget to Current Estimate (cont'd).
  - 6) <u>EOD Training</u> Resources will provide additional consumable materials to provide maintenance support of the newly received MK-16 Underwater Breathing Apparatus and new transportation equipment. Additionally, the new breathing apparatus requires a modification to the storage and workshop facilities to properly handle and maintain these new stateof-the-art devices.
  - 7) Submarine Advanced Signals Training +150 System (SASITS) - Resources will be provided to continue operation of the Surmarine Advanced Training System (SASITS) at NAVSUBSCOL New London, Connecticut and NABSUBTRACENPAC Pearl Harbor, Hawaii. These computeraided systems provide simulated signals for training on several Electronic Support Measure (ESM) systems. Training provided includes initial operator and maintenance training as well as refresher and team training for fleet units.
  - 8) Legal Training Increase will support the printing of textual material for three additional courses which will be developed and implemented at the Naval Justice School in FY 1986. These courses are Law of Naval Warfare, Senior Legalman Management and Prospective Commanding Officer/Executive Officers/Department Head Courses.

#### III. Performance Criteria.

Accomplishments are measured in terms of producing sufficient number of well trained personnel to meet skill inventory requirements generated by the introduction of new weapons systems and ship classes and losses of trained personnel by retirements and other separations.

Performance is evaluated by the ability to sustain the required level of student output while meeting Fleet requirements in training quality with no excess in numbers of instructors and support personnel and achieving increased efficiency in training operations.

#### Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Officer Acquisition

Budget Activity: 8 - Training, Medical, and Other General Personnel Activities

1065g/1-8

#### I. Description of Operations Financed.

Officer Acquisition supports operations of the U.S. Naval Academy and other officer acquisition programs.

The funds for the Officer Candidate School (OCS), Officer Candidate Preparatory School (OCPS), Broadened Opportunity for Officer Selection and Training (BOOST), Naval Academy Preparatory School (NAPS), and the Merchant Marine Reserve support the instructor and student manpower and the operating expenses to administer the courses of instruction. Training for the Officer Candidate School and Naval Academy Preparatory School is conducted aboard Naval Education and Training Center, Newport, RI, and at Service School Command, San Diego, CA for the Broadened Opportunity for Officer Selection and Training. The Officer Candidate Preparatory School is conducted at the NROTC Unit, University of North Carolina, Chapel Hill, NC. The Merchant Marine Reserve. United States Naval Reserve Midshipmen program is conducted at the United States Merchant Marine Academy and the following maritime academic institutions: Maine Maritime Academy, Chastine, Maine; State University of New York Maritime College, Fort Schuyler, Bronx, New York; Calhoon MEBA Engineering School, Easton, Maryland; California Maritime Academy, Vallejo. California; Massachusetts Maritime Academy, Buzzards Bay, Massachusetts; Texas Maritime College, Galveston, Texas; and the Great Lakes Maritime Academy, Traverse City. Michigan.

Included within Officer Acquisition are various programs which require no O&M,N fund support. The associated military manpower, however, is reflected in the personnel summary. These programs are:

Civil Engineer Corps Collegiate Commissioning Program (CEC) Enlisted Commissioning Program (ECP) Enlisted Education Advancement Program (EEAP) Nuclear Propulsion Officer Candidate Program (NUPOC)

Officer Acquisition supports the academic operating costs of the U.S. Naval Academy. The U.S. Naval Academy is an accredited four year undergraduate level educational institution which awards baccalaureate degrees in eighteen major programs. There is also a technically oriented "core curriculum" which every midshipman must take regardless of major.

In providing academic, professional and physical instructions, the Naval Academy maintains the programs, facilities, support organizations, and staff which constitutes all the essential ingredients to meet its unique mission of preparing midshipmen to be professional officers in the naval service. These are:

## Activity Group: Officer Acquisition (Cont'd)

- Berthing and messing of midshipmen.
- Initial acquisition of midshipmen.
- The academic program.
- The academic faculty and staff.
- Professional training operations (summer cruise, physical education, and midshipmen training/counseling operations).
- Instructional resources and facilities (library operations, instructional facilities, educational resources center operations, and academic computing center operations).

Activity Group: <u>Professional Development Education</u>

Budget Activity: 8 - Training, Medical, and Other General Personnel Activities

1058g/1-9

#### I. Description of Operations Financed.

This program supports professional education necessary to provide training and education for career officer personnel to prepare them for more demanding assignments, particularly for higher command staff positions, as they progress in their military careers. It is concerned with the broad professional goals in such subjects as military science, engineering, and management.

With relatively few exceptions, the types of expenses incurred and operations of Service Schools financed are similar in nature. The Naval Postgraduate School is organized along a matrix plan of both academic departments and curricular offices. Instruction is accomplished by a faculty of military and civilian members. The faculty, however, is primarily civilian with many holding scholarly positions in their respective technical societies.

At the Armed Forces Staff College, the Navy is responsible for providing logistic support and the Commandant is responsible directly to the President, National Defense University. The faculty consists of all military personnel.

The North Atlantic Treaty Organization (NATO) College is a joint NATO effort staffed by the various military services of the participating countries. Funding in this program supports the administrative cost of the U.S. Navy element and travel of assigned U.S. students.

The Defense Resources Management Education Center is a tenant organization of the Naval Postgraduate School, Monterey, CA. The direct funding request supports only the net difference between reimbursable income and total operating costs for civilian salaries, travel, and cost of support provided by the Postgraduate School.

The civilian institution program primarily finances the cost of tuition for personnel attending courses in civilian institutions. This program also covers reimbursement to foreign countries for students attending War Colleges of those countries requiring tuition payments for such attendance. Reimbursement, up to \$150 per student, in addition to tuition, is also provided to cover the cost of textbooks for those students under the Law Education Program. Additionally, funding for officer short courses supports travel, and per diem related to travel, required by curriculum.

The Naval War College is organized into several distinct colleges and centers. The College of Naval Warfare is the Navy's senior service college, whose students are Commanders and Captains and equivalent grades from other services and agencies; the College of Naval Command and Staff is the intermediate service college attended by Lieutenant Commanders and equivalent; the Center for War Gaming conducts war games in support of the various courses of the school as well as for Naval Operations, Naval Material Command and the Fleets. Other centers and colleges offer correspondence programs, conduct advanced strategic and tactical research, and provide resident education for senior and intermediate international naval officers that is similar to the work of their U.S. counterparts. The faculty of the Naval War College is composed of civilian and military teachers. Most have advanced degrees in their areas of specialization. The faculty is not assigned to any particular college or center, but teaches all resident students on a rotational trimester system. It is organized in three academic departments: Strategy, Defense Economics and Decision Making, and Naval Operations.

most navies and to stimulate Navyto-Navy discussion and cooperation. The increase supports costs (accommodations, printing, vehicle rental, guest lecturers, etc.) associated with hosting the EIGHTH International Seapower Symposium in FY 1986.

B. Other Program Growth in FY 1986

(+939)

1) Computer Aided Design/Computer Aided Engineering (CAD/CAE) <u>Software Support</u> - Computer aided engineering/design and manufacturing are becoming the norm in industry and the Department of Defense. Software packages are required in support of the programmed Naval Postgraduate School laboratory to enable teaching CAD/CAE principles and support course work for about 100 officers annually in the naval engineering curriculum, 60 officers annually in the aeronautical curriculum, and 20 officers annually in the weapons system curriculum.

+120

2) <u>Curriculum Support</u> - The Naval Postgraudate School will initiate and operate two new curricular programs in FY 1986 as follows:

+262

The Technical Transition Program (TTP) - TTP will address the mismatch between officer accessions without technical backgrounds and requirements for officers with technical graduate education and subspecialities. This is a new program of six months duration and will have an estimated flow of 125 new students to the School annually. Total variable costs of providing this program will be \$262 thousand annually. Navy requirements for technical subspecialists cannot be met without initiating this program.

- B. Reconciliation of Increases and Decreases (cont'd).
  - b) The System Acquisition (SA) Program - SA will be initiated to support the development of officer expertise for improved project management. This graduate level program of 15-18 months duration will graduate approximately 30 subspecialists in System Acquisition annually. Total variable costs of offering this program will be \$165 thousand annually. Navy is committed to improving the weapons acquisition process and this program is essential to that objective.
  - 3) Civilian Personnel Support Increase funds the salary and
    fringe benefit costs of 24 additional
    civilian positions (10 workyearts)
    at the Naval Postgraduate School
    as follows:
    - a) NPGS NWG Position Naval War Gaming support requires one position for architecture and data base/scenarios maintenance (1 workyear, \$33 thousand).
    - b) NPGS Faculty Increase Student enrollment increase, 50 more in FY 1986 over FY 1985, requires concurrent increase in faculty and support personnel to maintain adequate balance of students-to-faculty. Overloaded students-to-faculty ratios result in the decreased capability of faculty members to provide students with individual contact needed to fulfil education requirements of various curriculum (23 end-strength, 9 workyears, \$359 thousand).

#### Department of the Navy Operation & Maintenance, Navy Exhibit OP-5

Activity Group: Navy Reserve Officer Training Corps

Budget Activity: 8 - Training, Medical, and Other General Personnel Activities

1712g/1-4

#### I. <u>Description of Operations Financed</u>.

The Navy Reserve Officer Training Corps (NROTC) produces unrestricted line Navy and Marine officers. Training is conducted at civilian colleges and universities providing instruction to highly qualified baccalaureate degree students and results in commissions in the Navy, the Navy Reserve, the Marine Corps and the Marine Corps Reserve. NROTC is comprised of the Scholarship and College Programs conducted at selected colleges and universities. The budget includes resources for the expansion of the number of units from 63 in FY 1984 to 65 in FY 1985 and FY 1986. In addition, resources are included for an additional 2,000 scholarships phased over a four-year period, beginning in FY 1982 and reaching a total of 8,000 authorized end strength in FY 1985. The Scholarship Program is a long-range career officer accession program for the Regular Navy and Marine Corps. The College Program provides Naval Reserve and Marine Corps Reserve officers for active duty. Selectees enter either the two-year or four-year program as a College or Scholarship Program student and must attain a baccalaureate degree prior to commissioning. The funds requested represent the cost of educational subsidies for Scholarship Program students and administrative expenses for the units.

Educational subsidies consist of payments for tuition, fees, and books for college courses, required for a baccalaureate degree, taken by Scholarship or College Program students. The administrative expenses include unit operating costs, purchasing of Naval Science course textbooks, course references and training aids, and the costs associated with operating several summer training sites.

#### Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Flight Training

Budget Activity: 8 - Training, Medical, and Other General Personnel Activities

1069/1-8

#### I. Description of Operations Financed.

The Flight Training program provides undergraduate pilot and flight officer training for Navy and Marine Corps personnel. This training is also provided to Coast Guard personnel and selected Foreign Nationals on a cost reimbursable basis. In addition to undergraduate training, training for flight surgeons, midshipmen, jet transition, and refresher training are accomplished with funds provided within this program.

Flight Operations costs include fuel consumed, cost of flight gear issued, organizational and intermediate level aircraft maintenance, and contractor services for maintenance of certain training aircraft (T34C, TH57A, T2C, and T44A). Included are contractor services costs for aircraft maintenance and instructors for Cessna Navy Citation II (T47A) aircraft to replace the T39D aircraft in the Naval Flight Officer program. Additionally, parts supported for the TH57 aircraft has been transferred to CNET from the Naval Aviation Logistics Center, Patuxent River, Md. These factors are accumulated for each type, model and series of aircraft and converted to a cost rate per flight hour. The cost per hour is then multiplied by the number of flight hours required to produce the pilot and naval flight officer (NFO) training rates prescribed by the Chief of Naval Operations. There are 466,920 direct funded flying hours in FY 1986, generating direct dollar amount of \$247,995 thousand. Included therein are 7,725 flight hours and \$3,350 thousand for other than undergraduate pilot and naval flight officer training programs. In addition to the direct funded amounts shown, 38,320 flight hours will be required for support of reimbursable pilot and naval flight officer training for Coast Guard and foreign students.

An additional amount of direct funds, \$45,060 thousand, is for academic training and flight support. Funds for academic training finance the operation of the Naval Aviation Schools Command, including civilian salaries. Funds for flight support cover contractor services for maintenance of training simulators, contract flight instructors, squadron support costs, aircraft refueling/defueling operations, intermediate maintenance departments, aircraft operations departments, and training departments of the Naval Air Stations, including civilian salaries.

The remaining direct funds of \$1,252 thousand are for operation of the Naval Aircrew Candidate School and the Rescue Swimmers School located at Naval Aviation Schools Command, including initial issue of flight gear.

#### Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Training Carrier Operations and Routine Maintenance

Budget Activity: 8 - Training, Medical and Other General Personnel Activities

1905g/1:4

#### I. <u>Description of Operations Financed</u>.

This program funds carrier operations and routine maintenance of the USS LEXINGTON (AVT-16) in support of her role as a landing platform for pilot carrier landing qualifications. FY 1985 costs for ship operations and non-scheduled repairs are significantly lower than FY 1984 due to the restricted availability for the USS Lexington in FY 1985 for approximately eight (8) months. The FY 1986 costs are returned to the regular support level. It must be noted that Selected Restricted Availabilities (SRAs) and overhauls for the USS LEXINGTON are budgeted in Budget Activity-2.

#### I. <u>Description of Operations Financed</u>.

Other Training Support encompasses several programs which provide Navy-wide support for requirements of technical training activities and Command Headquarters. Program description of operations financed follows:

- A. <u>Simulator Acquisition Program</u>. Encompasses the responsibility of developing and acquiring air, surface and subsurface training materials and services to meet the training and education objectives and requirements of the Navy and Marine Corps. All simulator acquisition costs relate to the material and to the civilian personnel in support of the program.
- B. Organic Simulator Operation and Maintenance Program. Effects logistic support required for simulator/training devices throughout the Navy and Marine Corps for: organization and intermediate maintenance repair parts and services; maintainability, reliability, and safety modifications; rework and refurbishment; technical publication updates and retraining of Navy and Marine Corps maintenance personnel; services and materials for reinstallation and removal of trainers; Field Engineering Representative (FER) and Quality Assurance and Revalidation (QA&R) services; and salaries or other compensation for in-house logistic support personnel.
- C. <u>General Library Program</u>. Provides library services to Navy personnel aboard ships and to Navy/Marine Corps personnel and their dependents ashore. Funds for library materials are for books, sound recordings, films and paperback publications.
- D. Advancement in Rate and Procurement of Texts and References Programs. Provide textbooks for resident schools and reference material used to prepare for enlisted advancement examinations and specialized jobs for which there exists no formal schools. Personnel Qualification Standards printing is also supported by this program. Program funds are for distribution, composition, printing and procurement.
- E. <u>General Purpose Electronic Test Equipment (GPETE) End Item Replacement (GEIR)</u>. Provides for replacement of GPETE which is beyond the authorized repair capability of the end user. Since General Purpose Electronic Test Equipment is a 7Z cognizance Navy stock funded item, various technical schools having "end item replacement" requirements require funds to "buy out" of stock these items.

- F. <u>Training Support</u>. Finances planning, management, and installation of Technical Training Equipment and development/review/update of Navy Training Plans, periodic audits of specialized courses for technical accuracy, and depot level overhaul and calibration of Commander Naval Sea Systems Command and Commander Naval Electronics Systems Command Technical Training Equipment positioned in the Naval Education Training Command.
- G. <u>Command Headquarters</u>. Supports headquarters and associated operating costs for the Chief of Naval Education and Training (CNET) at Pensacola, Florida, and his functional headquarters commands: The Chief of Naval Air Training (CNATRA), Corpus, Christi, TX, and the Chief of Naval Technical Training (CNTECHTRA), Memphis, TN.
- H. Warfare Analysis and Research System. Simulates Naval strategy in tactical operations at the Navy War College, Newport, Rhode Island. Funds support system hardware, maintenance of system software, site preparation, engineering services, and logistics support management for the Naval Warfare Gaming System (NWGS).
- I. <u>Initial (Factory) Training</u>. Provides operating resources for training or instruction provided by a contractor in the operation, maintenance, or employment of a system, equipment, device, or training aid conducted at the contractors site or government facility. Initial (Factory) Training may be initial training of a cadre of instructors and other personnel needed to support a new item, or follow-on training. The Initial (Factory) Training program consists of course curriculum deliverables and instructor presentations.
- J. <u>Contractor Operation and Maintenance of Simulators</u>. Provides funds for contractor operation and maintenance of training simulators in direct support of training activities.
- K. <u>AEGIS Ship Training Support</u>. Supports combat system training of Navy personnel prior to assignment on AEGIS Cruisers to assure cruiser battle readiness and effectiveness under all operational conditions.
- L. <u>Training Equipment Installation</u>. Provides funds to install equipments procured for Navy Training Plan requirements developed by the Naval Electronic Systems Command and contained in the Technical Training Equipment Priority List at naval training sites.

- M. Other Training Equipment Maintenance. Supports overhaul and repair of aviation training equipment and trainers and other aviation support; training equipment installation for non-turnkey production programs, out-of-production programs, and modification kits to flight simulators and maintenance trainers. Provides: drone support services for maintenance and technical support of serviceable targets and drones which are available for Fleet use in anti-aircraft and air-to-air firing exercises; trainer/training effectiveness evaluations and Navy training plan development; trainer overhauls; Naval Material Command (NAVMAT) technical audit of training courses; software support services for normal life cycle maintenance of flight simulators and simulated maintenance trainers for both in-production and out-of-production aircraft; trainer peculiar equipment (8N COG) component repair; and stock funding on non-aviation depot level repairables which are integral to the operation of prime systems used throughout the training command.
- N. <u>Outfitting</u>. Provides non-aviation initial and follow-up outfitting support for training activities of the Naval Education and Training Command. This program was transferred from Operation and Maintenance, Navy Budget Activity 2 in the FY 1985 President's Budget.
- O. <u>Forces Afloat Maintenance Improvement (FAMI)</u>. Provides support for the establishment, retention and improvement of essential forces afloat maintenance capabilities at the organizational and intermediate levels. These efforts provide on-board assistance to forces afloat in support of the general Navy policy of accomplishing ship maintenance at the lowest level consistent with available resources in order to reduce maintenance costs and maximize the operational readiness of Fleet units. This program was transferred from Operation and Maintenance, Navy Budget Activity 2 in the FY 1985 President's Budget.
- P. <u>Defense Training Data and Analysis Center (DTDAC)</u>. Provides training related information and management support to the Office of the Secretary of Defense, the Military Departments and the entire Department of Defense training community. DTDAC collects, integrates, stores, and analyzes available training information and responds to analytical and specific information requests from the DOD manpower, personnel and training community. This program was established in the FY 1985 President's Budget.

B. Reconciliation of Increases and Decreases (cont'd)

#### 4. Program Increases

+27,544

A. Annualization of FY 1985 Increases

(+3.602)

Training Warfare Devices - Supports full year costs for Training Warfare Devices functional requirements for Simulator Acquisition (+23 end strength); Simulator Operations and Maintenance (+22 end strength); Quality Assurance and Revalidation (+5 end strength); and Defense Training Data and Analysis Center (+41 end strength). Total of \$3,205 thousand. Additionally full year non-labor support costs for the aforementioned personnel are requested. (\$39 thousand).

+3,602

B. One-Time FY 1986 Costs

(+3C3)

AEGIS Ship Logistic Support Training

 Increased funds support site activation of AEGIS Education Center at Dahlgren, VA.

+303

C. Other Program Growth in FY 1986

Torpedo ADCAP.

(+23,639)

+5,670

1) <u>Initial (Factory) Training</u> -Initial Training increases support instructional services, course deliverables, and training material for additional course requirements. Some of the additional courses supported are: Cryptological Equipment (Crypto CLASS "A", DIRSUP Augment, FES); Communications Equipment (AN/PRC-113, AN/USQ-9, AN/FRT-4; Navigation Equipment (AN/BRO-9, AN/SPN-42); and Undersea Surveillance Equipment (ABF IAD, WBAR) IAP II. Additionally, initial training will be employed to support the following: Theater Nuclear Warfare; Electro Magnetic Interference; MK-116 MOD 5 Maintenance; MCM Crew Familiarization: TERRIER GMLS MK-10 Maintenance; and MK-48

- B. Reconciliation of Increases and Decreases (cont'd)
  - 2) Aviation Maintenance Trainers -Funds are requested to support the increased number of Naval Aviation Maintenance Trainers scheduled for depot overhaul induction in FY 1986 (\$333 thousand) as well as a suite of F-14A Simulated Aviation Maintenance Trainers which are computer driven and require commercial repair (\$597 thousand). The F-14A suite of trainers is several years old and requires overhauling. These training devices are an integral part of the training curriculum for aviation maintenance personnel. Funds are also necessary to support increased Drone Support Service requirements (\$297 thousand) for the BQM-126 and BQM-127. An increase in the number of audits to be conducted on aviation maintenance training courses scheduled by the Naval Material Command is required also (\$57 thousand).

3) 8N Component Repair - Funds are required to support additional repair requirements necessitated by an increase in initial system stock and initial outfitting of trainer peculiar equipment for existing training devices, as well as an expanded population of trainer peculiar material for new aircrew training devices.

Aircrew and Maintenance Software Activities - An increase in funds is necessary to fully implement recently established software support activities for the F/A-18, AV-8B and P-3C as well as support for the S-3B Weapon System Improvement Program and the SH-60B. Aircrew and maintenance training devices must be kept current through software support to ensure that the training devices accurately reflect the aircraft weapon system in all respects.

+1,965

#### B. Reconciliation of Increases and Decreases (cont'd)

+1,101

- Support for Naval Reserve (AIR) NTP Development - Funds are required to support Naval Reserve NTP development (required by OPNAVINST 1500.8K) for the F/A-18, F-14, A-7E, E-2C, SH-3H and RH-53D weapon systems, Automatic Test Equipment (ATE) maintenance systems, and updating the Naval Training Plan (NTP) and Preliminary Squadron Manpower Document master programs (required in OPNAVINST 5310.21). This development includes considerations concerning Squadron Augmentation Unit implementation and its integration with Carrier Air Wing Composition (Notional Air Wing) and impact on training resource requirements assessments.
- 6) Training Support Request increase for major repair of various radar systems (including AN/SPN-42, AN/SPN-35, AN/SPN-48, and AN/TPX-42) and Ships Inertial Navigation System (SINS) equipment. An additional 27 repairs of technical training equipment will also be accomplished.
- 7) AEGIS Ship Logistic Support Training +2,512 Increase is to fund start-up of the AEGIS Education Center at Dahlgren, VA (\$2,154 thousand). Funding is also requested for training an additional 0.9 AEGIS crews (\$358 thousand).
- -8) Outfitting Funding supports +2,528 greater number of training sites.
  The requested support provides spare parts to keep training equipment operating at 3 additional electronic related training sites, 2 additional ordnance related training sites, and 5 additional HM&E related training sites.

- B. Reconciliation of Increases and Decreases (cont'd)
  - 9) Command Headquarters Funds support the Amended Arms Export Control Act which requires incrementally pricing training offered students under Foreign Military Sales Program.
  - 10) Advancement In Rate and Procurement
    of Text and Reference Funds support
    the increasing numbers of new candidates
    processed, correspondence applications
    and correspondence course assignments
    graded and posted, and increased
    printing costs. (\$198 thousand)
    Funds are also provided for new library
    collection materials. (\$41 thousand)
  - +2,253 11) Simulator Acquisition Taskings -Funding for Subsurface Ships functional taskings supports: a) 21B64 Software Baseline Maintenance for AN/BQQ-5 Training; b) Ocean Modeling CADB Technical Support for Combat System Team Trng (CSTT) and AN/BQQ-5 Training; c) CCS MK-1 PTR resolution for CSTT; d)15F12A Software DMA Compatibility for Submarine Piloting & Navigation Training: e) Attack Center Integration Plan for CSTT; and f) BSOT Curricula Change for AN/BQQ-5 Training.
  - Simulator Acquisition Software

    Updating Funds are required for subsurface ship software updating for SSN Class 594/637/688

    Submarine Combat System Team (SCST) trainers used to conduct operator and Command and Control team training on the MK 117/113 Fire Control Systems (FCS) located as follows:
    - a) Device 21A37/4
      b) Device 21A38A Pearl Harbor
      c) Device 21A39A Charleston
      d) Device 21A40 San Diego
      e) Device 21A41 Norfolk

This software updating impacts 91 fleet SSNs/SSBNs.

O&M,N 8-51 +712

- B. Reconciliation of Increases and Decreases (cont'd).
  - 13) Simulator Operator and Maintenance
    Materials/Services Increase supports
    SOM Program material/services for:
    a) Publications Updates, \$297
    thousand; b) Close-In Weapons System
    (Phalanx) Test Bed, Device 11G2, \$253
    thousand; c) Software Support Newtork,
    \$165 thousand; and d) COG 2 "O"
    Assumption of DD-993/CGN-38 Combat
    Systems Training System (CSTS),
    \$96 thousand.
  - Training Device Warfare CIVPERS Request half year funds for 17
    additional CIVPERS end strength
    supporting new training system
    acquisition tasks for: Tomahawk
    (several ship types); E6A
    (EW aircraft flight trainers);
    MH53 (Mine Hunting Helo Flight
    Trainers); 20A66 (Multi-Ship
    Surface Tactical Trainers);
    training device inventory; and
    Defense Training Data Analysis
    Center mission requirements are
    supported as well.
  - 15) Contractor Operation and Maintenance of Simulators (COMS) Funds support the surface COMS program operation and maintenance of training devices through the planned and continued substitution of contractor operations for military personnel.

#### III. Performance Criteria.

#### A. Simulator Acquisition Program

Supports programs through research, design, development, test and evaluation, procurement, fabrication, alteration, and conversion, in support of training devices and equipment. Workload can be used as the performance measure in the Simulator Acquisition Program. Workload has been summarized for a given year by grouping tasks using characteristics which identify the level of manpower required for that stage of the project which is in progress. The following tabulation shows this for the Simulator Acquisition Program.

| FIU | yram.   |  |  |              |
|-----|---|--|--|--------------|
|     |   | Number of                                    | Projects   |              |

#### 2. TAEG

The Training Analysis and Evaluation Group (TAEG) is a multidisciplinary source responsive to NAVTRAEQUIPCEN and CNO's analytic and evaluative needs in Navy training. Emphasis is placed on current or anticipated problems and issues significant to Navy training. The TAEG has a problem solving orientation geared to practical operational outcomes in order to provide Navy decision makers with recommendations to improve training effectiveness and cost effectiveness of the Navy Training System.

|                                  | <u>Number of Projects</u> |         |         |  |

#### B. Organic Simulator Operation and Maintenance Program and Mission

<u>Maintenance and Logistics Support</u> is provided by the Simulator Operations and Maintenance Program. This program supports:

- 1. Organization and intermediate maintenance logistic support.
- 2. Simulator reliability, maintainability, and safety modifications.
- 3. Modifications to related technical publications.
- 4. Rework and depot level maintenance overhaul of simulators and devices.

C. The General Library Program. The Library Support Program serves over 760,000 military personnel (Navy and Marine Corps) and an estimated 1,330,000 dependents as well as retired military and their dependents, reserves and overseas civilians. Performance measures ability to provide all varieties of library materials to all categories of libraries at optimum quantity levels and to provide on-site technical guidance services to afloat and shore commands.

| Other Program Data:  | FY 1984 | FY 1985 | FY 1986 |
|--|---------|---------|---------|
| On-Site Technical Guidance Visits  | 359     | 458     | 477     |
| Marine Corps Activities Supported*   | 177     | 179     | 179     |

|  | 401.7   | 405.3   | 408.9   |

<sup>\*</sup> Includes libraries and those activities/units receiving paperback reading support.

<sup>\*\*</sup> Activities receiving only paperback and reference books or paperbacks.

D. Advancement in Rate and Procurement of Text and Reference Programs. The Advancement Program annually develops, prints and administers advancement examinations for every enlisted person competing for promotion. This activity prepares for publication rate training manuals, nonresident career courses, and officer correspondence courses. Prepares approximately 55,000 pages of manuscript annually. Provides textbooks for reference materials to resident schools. Printing for Personnel Qualification Standards is also supported. Funds are used for development, composition, printing, distribution, and promotion.

| Other Program Data:                                | FY 1984   | FY 1985   | FY 1986   |

E. General Purpose Electronic Test Equipment (GPETE) End Item
Replacement (GEIR). This program provides for replacement of GPETE which is
beyond the authorized repair capability of the end user. Inadequate GPETE
causes a serious degradation in the efforts to train fleet personnel since the
electronic prime equipment cannot be properly maintained and students cannot
be taught proper operation and maintenance procedures. Since GPETE is a 72
cognizance Navy stock funded item, GEIR will be "bought out" of stock by end
user for a new price which is approximately 60 percent of the standard price.
Turn-in items will be restored and placed in stock, thus, greatly increasing
the availability of equipment.

| Other Program Data:              | FY 1984 | <u>34 FY 1985 F</u> | FY 1986 |

#### F. Training Support.

1. Technical Support funds review/development/update of Navy Training Plans and ILSP's; monitoring of training courses; training materials review; Technical Training Equipment (TTE) removal and technical assistance; and review of transfer plans and contracts.

FY 1984 FY 1985 FY 1986

Navy Training Plans

190

215

219

2. <u>Installation Support</u> funds provide for installation of Technical Training Equipment (TTE) at various Navy training locations. Installation of technical training equpment for surface or subsurface training support ranges from installating a simple pump or valve to installing a total weapons, sonar, or elevator system, with costs ranging from \$1 thousand to \$1.0 million. Cost of installations in a given year therefore are not always proportional to the number to be installed.

|                   | FY 1984 | FY 1985 | FY 1986 |
|-------------------|---------|---------|---------|
| No. Installations | 271     | 338     | 305     |

3. Depot Level Overhaul of Technical Training Equipment (TTE) program provides depot level overhaul and calibration support for COMNAVSEASYSCOM and COMNAVELEXSYSCOM TTE in the NAVEDTRACOM. These requirements are located at various technical schools and are used as an integral part of the on-going operation and maintenance training process. Failure to overhaul and calibrate training equipment would reduce hands-on training which may require course cancellation or reduction to a paper course which seriously degrades the quality of training.

G. Warfare Analysis and Research System (WARS).

 FY 1984
 FY 1985
 FY 1986

 Number WARS Equipment Supported
 280
 336
 336

The WARS system support is incorporated in The Naval Warfare Gaming System (NWGS) beginning in FY 1983.

H. <u>Initial (Factory) Training</u>. Funding requirements for factory training courses vary with class size, length of course, required number of times course must be taught prior to acceptance, and course complexity. Funding costs per course can range from \$1 thousand to \$1 million or more. Training deliverable items (curricula, outlines, instructor guide books, etc.) are also funded in the O&M,N. Cost estimates for courses are based on: length of course; required number of times course will be taught; number of training deliverables required; program complexity (this affects the developmental time required per hour of instruction); and contractor man-day rates. Factory training is an integral part of the Navy Weapon System acquisition process as initial crews and Navy instructors are trained in advance of formal Navy in-house training for new hardware procurements.

|                                    | FY 1984 | FY 1985 | FY 1986 |

#### K. Other Training Equipment Maintenance

#### 1. Training Equipment Installation

The funds are required for the installation of newly acquired aviation training equipment and for the installation of modification kits to existing aviation trainers. These trainers must be accommodated in order to not disrupt the Fleet training for which flying hours have been decremented predicated on the timely delivery and installation of training devices. Trainer installation actuals for FY 1984 and plans for FY 1985 and FY 1986 are as follows:

# 1. Training Equipment Installation (cont'd

#### 2. Drone Support Services

Technical support, maintenance and operational assistance and on-the-job training are required in order to maintain an inventory of serviceable targets and drones. Pacific Missile Test Center, Point Magu, California provides the sole source of maintenance technical training to enlisted personnel of the Electronic Aviation Technician, Aviation Machinist Mate (Power Plant) and Aviation Electrician Mate ratings, enroute to the following commands: Fleet Component Squadron One, Five (Pacific Fleet), Six (Atlantit Fleet), PMTC and Training Command. The upgraded training effort in drone maintenance is the direct result of technology applications in drone aircraft of turbines (JET) power plants and supersonic capability in support of fleet requirements. This training is apart from the normal Chief of Naval Education Training sponsored aircraft maintenance training. It was established under a Naval Air Systems Command field activity to achieve the cost-effectiveness of single siting where the equipment and knowledgeable personnel were already in place. Lack of this capability would degrade drone maintenance to an unacceptable level. FY 1984 actual and FY 1985 and FY 1986 plans are as follows:

|           | FY 1984 | FY 1985 | FY 1986 |
|-----------|---------|---------|---------|
| Workyears | 20      | 20      | 22      |

# 3. <u>Training/Training Effectiveness Evaluation/Navy Training Plan Development</u>.

#### a. Training/Training Effectiveness Evaluation

The trainer evaluations will ensure maximum replacement of training flight hours with simulators, most effective utilization of training devices, and assurance that fleet readiness is maintained through proper training. In addition, specific training deficiencies requiring redesign or procurement will be documented. Trainer effectiveness evaluations actuals for FY 1984, and plans for FYs 1985 and FY 1986 are as follows:

| FY 1984 | FY 1985 | <u>FY 1986</u> |
|---------|---------|----------------|

#### b. Navy Training Plan Development

Development of Navy Training Plans (NTPs) is a requirement for programming and budgeting manpower, personnel and training equipment programs. Actuals for FY 1984 Navy Training Plan development and plans for FYs 1985 and 1986 are as follows:

#### FY 1984

Engine Test Stand Training Program
Automatic Test Equipment
Training Program
Composite Structures Repair
Trainin; g Program
Aviation Maintenance Program
Changes

#### FY 1985

Aviation Maintenance Program Policy Changes Composite Structures Repair Training Program

Aviation Component Repair Connector/Wiring Repair Training Program

#### FY 1986

F/A-18(R) F-14(R)
A-7E(R) E-2C(R)
SH-3H(R) RH-53D(R)
Aviation Maintenance Program
Program Change
Aviation Cryptologic Equipment
Training Program
Avionics Equipment Testing
Migration Program

#### 4. Trainer Overhauls

Depot level overhauls of aviation training equipment are to be performed on naval aviation maintenance trainer units. These overhauls are required to restore the trainers to their original performance capabilities, reduce/eliminate a lack of training. The actual overhauls conducted in FY 1984 as well as those projected for FYs 1985 and 1986 are as follows:

|       | A/C  | DESCRIPTION  | LOCATION  |

#### 5. NAVMAT Technical Audit of Training Courses

Course audit funds are for providing travel and per diem for the Naval Air Systems Command and field activity/fleet personnel audit teams. These NAVMAT directed audits are conducted by audit teams in order to determine technical sufficiency of the training courses given to operational fleet personnel. Actuals for courses audited in FY 1984 and audits planned for FYs 1985 and FY 1986 are as follows:

|                  | FY 1984 | FY 1985 | FY 1986 |
|------------------|---------|---------|---------|
| Number of Audits | 32      | 38      | 42      |

#### 6. Software Support

Funds are required for life cycle software maintenance of flight simulators and simulated maintenance trainers for both in production and out of-production aircraft. The aviation trainer software support funded in FY-1984 and plans for FYs 1985 and 1986 are as follows:

|       | A/C  | DEVICE NO.   | DEVICE TYPE   |

7. Depot Level Repairables (DLR). This program provides for replacement of repairables that have failed. These repairables are normally integral to prime system operation and when the prime system fails, the training activity must identify the failed component and submit a requisition to the supply system for replacement. Since DLRs are Navy stock funded, these items will be "bought out" of stock for a new price, which is approximately 60 percent of the standard price. Turn-in items will be restored and placed in stock, thus greatly increasing availability of equipment.

|                             | FY 1984        | FY 1985 | FY 1986 |
|-----------------------------|----------------|---------|---------|
| Number of Activities Served | 66             | 66      | 66      |
| Number of Requisitions      | 7 <b>.</b> 248 | 6,703   | 6,382   |

L. <u>Outfitting</u>. Outfitting support is provided for outfitting and allowance changes resulting from installation of new equipment, modification of equipments, special equipage programs both mission and safety related, revision of allowance parts lists and allowance equipage lists, modification of allowance computation rules, and other approved allowance changes. This program allows training sites to obtain spares for technical training equipment installed on shore sites.

M. <u>Forces Afloat Maintenance Improvement (FAMI)</u>. FAMI supports the establishment, retention and improvement of selected essential forces afloat maintenance capabilities at the organizational and intermediate levels. FAMI programs are:

SQUIP. Shop Qualification Improvement Program (SQUIP) which assists the Fleet in establishing and maintaining requisite "I" level repair capabilities by providing requisite information on industrial repair processes, supplementing the Navy School System with specialized Journeyman training in the IMA Shops, Assisting the IMA shops in correcting tool, facility and hygiene deficiencies.

OMT. On-Board Maintenance Training (OMT) which conveys applicable fixes to "O" level shipboard maintenance personnel by identifying tool, equipment and technical documentation requirements to perform "O" level maintenance properly; updating Shipboard Allowance Equipage Lists (AELs) to provide for required tools and equipment; providing on-the-job skill training in correct maintenance procedures and processes; and reviewing work center effectiveness.

<u>ISMS</u>. Integrated Ship Maintenance Support provides shipboard personnel with an understanding of the maintenance and support organization and skills in the use and maintenance of various support documents.

IMA Journeyman. IMA Journeyman Training Program supplements the Navy school system with specialized in-shop IMA journeyman repair skill training and resulting NEC qualifications attainment.

The FAMI program was budgeted in Budget Activity 2 prior to FY 1985.

1/ The workyear figure relates to the effort expended by the trainers and associated personnel to implement the three training programs, the implementation of the technical libraries, and the IMA-NEC program. The training in man-weeks figure indicates the number of man-weeks per course that is accomplished with the resources available. Most of the courses are from two to five weeks in duration depending on the course and whether it is at the beginner or review level.

#### Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Care in Regional Defense Facilities (Teaching Hospitals)
3-Training, Medical, and Other General Personnel Activities

 Description of Operations Financed. The mission is to operate the Navy Medical Establishment at that level which provides the ability to deliver essential inpatient, outpatient, and adjunctive health care services to the active duty forces to insure their physical fitness for combat duty and to continue operation of those activities required to serve as the basis to meet wartime contingency planning requirements. Medical health care treatment facilities are located worldwide and the continuation of their operation provides the capability for the direct delivery of both primary and specialized forms of patient treatment for the Services' beneficiary population. The range of treatment runs from routine outpatient sick call visits to highly selective and specialized inpatient operative procedures. These financial and manpower resources provide the capability for the delivery of health care at 4 Regional Medical Centers which include 2 Naval Hospitals, 2 Regional Medical Clinics, and 49 Branch Clinics which are located in close proximity to the Centers at Bethesda, Maryland, Portsmouth, Virginia, Oakland, California, and San Diego, California. Regional Centers are the Navy Medical Teaching Hospitals where residency-type training is provided for Navy to meet the requirements for the various forms of specialized medical care. These centers provide the specialized care beyond the capability of Station Hospitals. An increase in military medical manpower is included in the budget year to improve wartime medical capability. During peacetime, this manpower will be utilized to provide health care to beneficiaries who would otherwise receive care under the auspices of Civilian Health and Medical Program of the Uniformed Services. This added workload performed within Navy facilities will result in lower Civilian Health and Medical Program of the Uniformed Services costs and thus meets current guidance from both the Congress and the Defense Department. Dollars to support this additional clinical workload are included as well as workload increases resulting from the increased average active duty strength of the Navy and Marine Corps. Substitution of civilian nurses by military nurses and recognition of savings achieved by ensuring procedural efficiency are included. Direct Service funding for manpower associated with the operation of automated clinical systems previously funded by the Department of Defense is instituted as is the total funding support for systems installed in Fiscal Year 1934 under the funding auspices of the TRI-Service Medical Information System (TRIMIS) program. Expansion of the quality assurance program is included and a new program to improve the appearance of clinics and waiting rooms is instituted. Navy Standard equipment formerly funded by the Other Procurement, Navy appropriation is transferred to the Operation and Maintenance, Navy appropriation.

As a result of a Department of Defense decision, manpower utilized to operate automated clinical systems installed under the auspices of the TRI-Service Medical Information System program are to be funded by the Services vice the Department of Defense (Operation and Maintenance, Defense Agencies) beginning in Fiscal Year 1986. These resources reflect the value of transferring 44 civilians from the former reimbursable status to direct fund status. Although these dollar resources are reflected as an increase in the Navy budget request, they represent no change in the number of civilian employees already in place at Navy facilities.

a) TRI-Service Medical Informa-

tion System Manpower Costs

### B. Reconciliation of Increases and Decreases

Amount

b) TRI-Service Medical Information Systems Installed in Fiscal Year 1984

+553

Current Defense Department guidance directs that the funding responsibility for automated clinical systems installed under TRI-Service Medical Information Systems auspices be assumed by the Services two years later. These resources cover the cost of 4 systems installed during Fiscal Year 1984.

c) Revision to Expense/Investment Criteria +594

Amount transferred from the Other Procurement, Navy appropriation to the Operation and Maintenance, Navy appropriation pursuant to the proposed Department of Defense initiative for elimination of \$3 thousand investment threshold and adoption of central management criteria as a governing factor.

d) Equipment Funding Shift

+235

In Fiscal Year 1985, a revised method of funding standardized medical equipment costing over \$3,000 was instituted. Operation and Maintenance funding is now utilized vice Other Procurement, Navy funding. Since the preparation of the Fiscal Year 1985 budget, additional items (mainly steriliers, laboratory analyzers and small x-ray units) have been standarized. These resources, transferred from Other Procurement, Navy, reflect the transfer of those items.

# B. Reconciliation of Increases and Decreases

Amount

4. Program Increases

+3,572

A. One-Time FY 1985 Costs

(+543)

1) Wartime Bed Expansion

+549

Provides for the procurement of beds and bed supplies (linens, pillows, etc.) to allow for expansion of beds at each hospital to maximum capacity in the event of contingencies. Available beds at each facility currently meet only peacetime requirements.

3. Other Program Growth in FY 1986

(+3, 123)

1) Quality Assurance Expansion

+283

A minimum quality assurance program is in place in medical facilities. Accreditation reviews, however, cite existing deficiencies due to limited manpower. Additionally, newer Department of Defense guidance directs specific tracking of health care providers to ensure that the highest standards of health care delivery are met and malpractice suit vulnerability is minimized. Along with Automated Data Processing system implementation begun in Fiscal Year 1985, additional manpower is required to perform all aspects of medical/dental quality assurance in compliance with current requirements. (+18 civilian end strengths).

2) Medical Records Clerks

+163

The addition of medical records clerks begins to correct a chronic deficiency in typing and filing of patient records at Naval Medical Treatment Facilities. This condition has been a frequent finding of the Joint Commission on Accreditation of Hospitals which connects completion of medical records to quality assurance as well as to overall hospital accreditation. (+13 civilian end strengths)

8-77

### 3. Reconciliation of Increases and Decreases

Amount

3) Workload Support

+2,672

Medical manpower increases, primarily added to improve wartime casualty care, are utilized during peacetime to provide medical care for dependents and retirees in addition to active duty personnel. These resources support the increase in clinical workload incident to the increase in the active duty strength of the Navy and Marine Corps and a greater quantity of health care for the Civilian Health and Medical Program of the Uniformed Services eligible beneficiaries to be provided in Navy medical facilities in an effort to reduce Civilian Health and Medical Program of the Uniformed Services dependence.

#### 5. Program Decreases

-973

- Annualization of FY 1985 Decreases
- (-292)

1) Nurse Military Substitution

-292

Provides for the substitution of military nurses for civilian nurses in order to improve wartime casualty care capability. This annualizes the Fiscal Year 1984 decrease.

B. Other Program Decreases in FY 1935

(-685)

1) Nurse Military Substitution

-292

Continues the substitution of military nurses for civilian nurses. This will improve wartime casualty care capability. This action involves 24 civilian end strengths.

2) Procedural Savings

-88

Efficiency reviews of functions not subject to contracting out studies will result in streamlined procedures which require less manpower. (-8 civilian end strengths).

O&M,N

8-78

# C. Reconciliation of Increases and Decreases

Amount

3) TRI-Service Medical Information System Manpower Average Salary

-305

The average salary of the TRI-Service Medical Information System end strengths transferred from reimbursable to direct fund is reduced to be comparable to the medical cost.

5. FY 1936 President's Budget Request

\$141,352

# III. Performance Criteria

The medical workload is measured by use of the composite work unit. The weighted formula used to compute the composite work unit total is illustrated below.

# Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Station Hospitals and Medical Clinics
Budget Activity: 8-Iraining, Medical, and Other General Personnel Activities

 Description of Operations Financed. The mission is to operate the Navy Medical Establishment at that level which provides the ability to deliver essential inpatient, outpatient, and adjunctive health care services to the active duty forces to insure their physical fitness for combat duty. This permits the continuing operation of those activities required to meet wartime contingency planning requirements. These financial and manpower resources provide the capability for the delivery of health care at 19 Regional Medical Centers, 6 Naval Hospitals, 6 Regional Medical Clinics and 101 Branch Medical Clinics located at or near worldwide Navy and Marine Corps Stations and Bases. Medical health care treatment facilities are located worldwide and the continuation of operation provides the capability for the direct delivery of both primary and specialized forms of patient treatment for the Services beneficiary population. The range of treatment runs from routine outpatient sick call visits to selective and specialized inpatient operative procedures. An increase in military medical manpower is included in the budget year to improve medical wartime capability. During peacetime, this manpower will be utilized to provide health care to beneficiaries who would otherwise receive care under the auspices of the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS). This added workload performed within Navy facilities will result in lower Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) costs and thus meets current guidance from both the Congress and the Defense Department. Funds to support this additional clinical workload are included as well as workload increases resulting from the increased average active duty strength of the Navy and Marine Corps. Substitution of civilian nurses by military nurses and recognition of savings achieved by ensuring procedural efficiency are included. Direct Service funding for manpower associated with the operation of automated clinical systems previously funded by the Department of Defense is instituted as is the total funding support for systems installed in Fiscal Year 1984 under the funding auspices of the TRI-Service Medical Information System (TRIMIS) program. Expansion of the quality assurance program is included and a new program to improve the appearance of clinics and waiting rooms is instituted. Provision of contact lenses for submarine personnel is expanded to alleviate unique visual problems. Navy standard equipment formerly funded by the Other Procurement, Navy appropriation is transferred to the Operation and Maintenance, Navy appropriation.

Available beds at each

facility currently meet only peacetime

requirements.

#### B. Reconciliation of Increases and Decreases

Amount

C. Other Program Growth in FY 1986

(+3,538)

1) Quality Assurance Expansion

+757

A minimum quality assurance program is in place in medical facilities. Accreditation reviews, however, cite existing deficiencies due to limited manpower. Additionally, newer Department of Defense guidance directs specific tracking of health care providers to ensure that the highest standards of health care delivery are met and malpractice suit vulnerability is minimized. Along with Automated Data Processing system implementation begun in Fiscal Year 1985, additional manpower is required to perform all aspects of medical/dental quality assurance in compliance with current requirements. (+50 civilian end strengths)

2) Department of Defense Handicapped Schools Program

+105

The provision of special medical care (audiology, physical/occupational therapy, evaluation and diagnosis) to handicapped children overseas in Department of Defense schools is required under Public Law 94-142. This provides funding and manpower to fully implement the specialty care required at specific overseas facilities under this congressionally-mandated program. (+7 civilian end strengths)

3) Medical Record Clerks

+367

Begins to correct a chronic deficiency backlog in typing and filing of patient records at Naval Medical Treatment Facilities. This condition has been a frequent finding of the Joint Commission on Accreditation of Hospitals which connects completion of medical records to quality assurance as well as to overall hospital accreditation. (+34 civilian end strengths)

### B. Reconciliation of Increases and Decreases

Amount

4) Workload Support

+2,002

Medical manpower increases, primarily added to improve wartime casualty care, are utilized during peacetime to provide medical care for dependents and retirees in addition to active duty personnel. These resources support the increase in clinical workload incident to the increase in the active duty strength of the Navy and Marine Corps and a greater quantity of health care for the Civilian Health and Medical Program of the Uniformed Services eligible beneficiaries to be provided in Navy medical facilities in an effort to reduce Civilian Health and Medical Program of the Uniformed Services dependence.

5) Audit Restoration - Okinawa

+112

One time savings related to excess material stocks at the Naval Hospital, Okinawa, Japan were recognized in a revision to the Fiscal Year 1985 budget as a result of Naval Audit Service Report No. A10344L. The one year nature of those savings requires an increase for Fiscal Year 1986 to allow resumption of the normal funding level.

6) New Computer Assisted Tomography
Scanners

+195

Provides for the third incremental introduction of Computer Assisted Tomographic Scanners to non-teaching hospitals for use as diagnostic tools, particularly in trauma cases. These resources provide operating costs for the newly procured items of equipment.

# Department of the Navy Operation and Maintenance, Nawy Exhibit OP-5

Activity Group: Dental Care Activities

Budget Activity: 8-Training, Medical, and Other General Personnel Activities

I. Description of Operations Financed. The mission is to provide outpatient dental care for the Navy and Marine Corps to insure their physical fitness for combat duty. These financial and manpower resources provide the capability for the direct delivery of both primary and specialized forms of dental treatment at 23 Regional Dental Centers and 149 Branch Dental Clinics located at or near worldwide Navy and Marine Corps Stations and Bases. The range of outpatient treatment runs from dental prophylaxis to specialized operative and prosthetic procedures. Resource requirements are based on experience and forecasted dental disease converted to manpower requirements and then converted to dollar requirements based on workload capable of accomplishment with that manpower and dollar availability. Changes in the operations financed in the budget year relate to price growth, and support of additional workload associated with improvement of dental readiness of active duty personnel.

# Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Care in Non-Defense Facilities

Budget Activity: 8-Training, Medical, and Other General Personnel Activities

I. Description of Operations Financed. The program finances all bona fide expenses incurred by Navy and Marine Corps beneficiaries for health care services in Veteran's Administration and civilian facilities including civilian operated Uniformed Services Medical Treatment Facilities. Changes in workload in this activity group result from population changes. There are no alternatives available since all care is either emergency in nature or at the option of the beneficiary and there exists a legal requirement to adjudicate all bonafide billings. Resources to accommodate projected active duty strength level are included.

# IV. Personnel Summary:

There are no personnel in this activity group.

# Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Other Health Activities

Budget Activity: 3-Training, Medical, and Other General Personnel Activities

 Description of Operations Financed. Operations financed include the operation of 15 separate field activities. Direct disease and environmental health support services are provided for by 4 Environmental Preventive Medicine Units, 2 Disease Vector and Ecological Control Centers, 1 Naval Medical Data Services Center, 1 Naval Ophthalmic Support Facility, 1 Environmental Health Center, 1 Aviation Medical Support Facility. 1 Naval Medical Materiel Support Command and 5 Navy Drug Screening Laboratories located at each geographical Comand at Great Lakes, Illinois; Jacksonville, Florida; Norfolk, Virginia, Oakland, California; and San Diego, California. Centralized spectacle fabrication support provides the capability for manufacturing spectacles for active duty members. Financing of the Environmental Health Center allows for the delivery of specialized environmental health services to all shore facilities in the Navy and Marine Corps establishment. The operation of a centralized automated processing activity permits system standardization. This activity group contains the resources necessary to provide occupational/ industrial health surveillance to Navy Fleet and Industrial activities as well as to provide drug abuse testing. Budget year initiatives include further expansion to the Occupational Health Program through the addition of manpower and automated system, procurement of material for use in contingency operations and maintenance of water survival training gear by contract. A change in funding methodology for shipboard medical equipment is also included as is an increase for faster replacement of shipboard equipment to maintain fleet readiness.

b) Equipment Funding Shift (cont'd)

These resources, transferred from Other Procurement, Navy, reflect the transfer of those items for shipboard and activities other than hospitals. An equivalent decrease is reflected in the Other Procurement, Navy Budget request.

4. Program Increases

+6,291

A. Annualization of 1985 Increases

- (+2,057)
- Annualize Navy Occupational Safety and Health Civilians

+2,027

Annualizes salary and support costs of the Fiscal Year 1985 civilian man-power increase (181 end strengths) in the Navy Occupational Safety and Health program.

2) Annualize Tri-Service Eyewear

+30

Annualizes salary and support costs for 2 civilians added in Fiscal Year 1985.

3. One-Time FY 1986 Costs

(+299)

 Thermoluminescent Dosimetry (TLD) Film badges

+171

In order to meet the requirement of the Nuclear Regulatory Commission for personnel monitoring, thermoluminescent dosimetry methodology must be used. These funds allow for the procurement of new type reusable badges used in that methodology vice the current film badge.

2) Preventive Medicine Supply Blocks

+123

Provides for the procurement of material supply blocks in support of preventive medicine teams.

#### B. Reconciliation of Increases and Decreases

Amount

2) Preventive Medicine Supply Blocks (cont'd)

These teams deploy from Environmental and Preventive Medicine Units (EPMUs) and from Disease Vector Ecology Control Centers (DVECCs) to perform sanitation, entomology, and epidemiology support functions for fleet and Fleet Marine Force (FMF) units. The recent deployment of Marine Units in Lebanon resulted in the requirement for this type of supply block.

C. Other Program Growth in FY 1986

(+3,935)

 Thermoluminescent Dosimetry (TLD) Film badges

+10

In order to meet the requirement of the Nuclear Regulatory Commission for personnel monitoring, thermoluminescent dosimetry methodology must be used. These funds allow for the servicing of units procured

2) Occupational/Industrial Health Manpower Increase

+1,749

This item provides funding for the third increment of manpower increase to improve the Occupational/Industrial Health program. In response to Inspector General and General Accounting Office reports which cited manpower deficiencies as the primary cause of poor performance, the 185 civilian end strengths added for Fiscal Year 1986 will join the 364 added in 1984 and 1985 to provide the necessary staffing to identify hazardous conditions, perform medical surveillance on exposed employees, monitor exposure, and document these actions so as to reduce claims for disability in future years.

#### B. Reconciliation of Increases and Decreases

Amount

 Occupational/Industrial Health Material Support Costs

+206

With the number of civilian manpower additions to the Occupational/Industrial Health program in Fiscal Year 1986, additional support dollars are required for equipment, chemicals, and supplies used in identifying hazards and tracking exposure.

4) Occupational Health Information Management System Support

+151

The Navy Occupational Health Information Management System (NOHIMS) documents hazard identification, personnel exposure data, and maintain summary data to monitor compliance with current laws and administrative directives. Such information will help identify and prevent problems prior to their becoming major compensation claims. These resources support the installation of this automated system at 6 facilities. Resources includes assumption of Procurement dollars previously programmed under Other Procurement, Navy.

5) Training Devicemen Replacement

+400

Military Training Devicemen, phased out as a Navy rating, operated and maintained equipment used for Aviation Physiology and Water Survival Training. These resources will be utilized to obtain those functions by contract as a result of a commercial activities study now in process.

| В. | Reconciliation | of Increases | and Decreases |
|----|----------------|--------------|---------------|
|    |                |              |               |

Amount

6) Fleet Medical and Dental Equipment

+1,409

Expands the replacement programs for medical and dental equipment aboard ships. Continued high levels of operating schedules and increased attention to readiness of all shipboard items requires more frequent replacement of resuscitation and other types of equipment than is experienced at shore facilities.

#### 5. Program Decreases

-2,037

A. One-Time FY 1985 Costs

(-1,345)

1) Aviation Physiology Safety Manual

-110

Removes one-time costs associated with the updating in Fiscal Year 1985 of the Aviation Physiology Training Manual.

2) Rapid Deployment Mobile Force (RDMF) Uniforms

-650

Removes one-time costs associated with the procurement of initial organizational outfitting of RDMF uniforms for medical personnel.

3) Medical Team Outfitting

-585

Removes one-time costs associated with the initial organizational outfitting of Mobile Medical Augmentation Teams.

B. Other Program Decrease in FY 1986

(-692)

1) Equipment Reduction

-692

Reduction in equipment transferred from Other Procurement, Navy - defers equipment for the Navy Occupational Health Information Management System (NOHIMS) and the Aviation Data Retrieval System and reduces the planned scope of Fiscal Year 1986 installation.

6. FY 1936 President's Budget Request

\$73,503

| III. | Performance Criteria. | FY 1984 | FY 1985 | FY 1986 |
|------|-----------------------|---------|---------|---------|
|      | Number of Activities  | 10      | 16      | 16      |

The activities contained in this program have no common or universal program measure. Services provided range from shipboard epidemiological investigation to centralized collection of world wide Navy Medical Department health statistical data. Meaningful measurement analysis capability is thus not feasible.

# Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Education and Training-Health Care

Budget Activity: 8-Iraining, Medical, and Other General Personnel Activities

I. Description of Operations Financed. The general education and training sub-activity provides the resources for the operation of all Navy medical and dental basic training, for the part-time training of medical personnel and operational training of primary health care professionals, for other health professional full-time and service specialty training, and for out-service medical and dental specialty residencies. This technical and specialty training requirement also covers travel to professional meetings, seminars, and short courses, which are the primary and most critical means for the acquisition of new health care knowledge and techniques relating to current practices, procedures, and operations. Training of medical personnel in operational techniques is also included. The Armed Forces Health Professions Scholarship Program sub-activity provides for the payment of costs in civilian institutions for medical student tuition, fees, and other authorized expenses. The budget year reflects increases to introduce augmentation training for medical units, implementation of a leadership and management training course for department heads and division officers, computer assistance for service training and increased support for military medical end strength added for Fiscal Year 1985 and 1986.

Activity Group: Education and Training-Health Care (cont'd)

#### B. Reconciliation of Increases and Decreases

Amount

B. Other Program Growth in FY 1986

(+2,347)

1) Unit Readiness Training

+318

Medical personnel assigned to shore facilities during peacetime are assigned to augment certain Marine Corps and afloat Navy units during wartime or other contingency operations. These personnel, assigned in units by facility, require training as a unit in order to be prepared for operational deployment. The skills taught in this type of training are not normally required for peacetime health care delivery, e.g., battle organization, survival, casualty triage and management, etc. Trained as a unit, these personnel will meet readiness requirements. 1,389 personnel will be trained in Fiscal Year 1986.

2) Professional Update Training

+416

Attendance at professional meetings, conferences and seminars are a requirement for physicians, nurses, and other medical professionals to maintain their knowledge and skills. In many instances, retention of a specialty certification is dependent upon this form of continuing medical education. This increase allows the participation of officers added to Navy medical strength in Fiscal Year 1985.

3) Implementation of Leadership Management Education and Training (LMET) Program

+375

LMET provides job relevant leadership and management training to improve the skills of senior grade naval officers. These resources provide for the implementation of a department head/division officer LMET course. (+1 civilian end strength).

O&M,N

8-106

# B. Reconciliation of Increases and Decreases

Amount

4) Computer Assisted Training

+205

Slippage in procurement of hardware for this program originally planned for Fiscal Year 1985, led to a dollar and manpower reduction in the revised Fiscal Year 1985 budget. Procurement problems having been resolved for Fiscal Year 1986, the funding and manpower is requested to continue the installation of hardware at enlisted technician schools in order to allow better quality training of complex subjects. (+2 civilian end strengths)

5) 3-Day Field Medical Service School (FMSS) Training

+92

Provides 3-day familiarization training for Mobile Medical Augmentation Readiness Teams (MMART) at Marine Corps training sites in preparation for actual deployments. This addition allows training for each MMART every other year.

6) Medical Operational Training

+123

Resources provide operational training in the areas of Chemical Biological and Radioactive (CBR) agents, Desert Warfare Medicine, and Cold Weather Medicine. CBR training will encompass familiarization (types of agents used, the concepts of self and buddy aid, the physiologic effects of each agent, and medical treatment procedures), proficiency training (primarily for individuals awaiting assignment to operational units and including practicing manual/clinical skills while wearing protective gear), and specialized training (specific to the management and treatment of casualties and including instructors and Rapid Deployment Force designees). Desert Warfare and Cold Weather Medicine provide environmentallyoriented training to selected personnel (Fleet Marine Force and other selected operating forces) in

Activity Group: Education and Training-Health Care (cont'd)

# B. Reconciliation of Increases and Decreases

Amount

6) Medical Operational Training (cont'd)

the management of injuries sustained in and from such adverse theatres. These resources augment the current base to provide this type of training for the manpower increases budgeted for FY 1985 and FY 1986.

7) Workload Increase

+228

Budgeted increases in medical manpower result in increased training loads for Hospital Corpsmen A and C (Initial Skill and Skill Progression) Schools. These dollar resources support those increases as follows:

A Schools: \$190 C Schools: 38

8) Biomedical Equipment Technician (BMET)
Training

+90

Biomedical Equipment Technicians receive basic and advanced training in Army schools to service, maintain and repair medical equipment. Continual state-of-the-art changes occurring in medical equipment involving digital, microprocessor and other changes necessitate refresher training for these enlisted technicians so that equipment can be maintained and repaired. Contract repair is not feasible since these technicians must be capable of repairing equipment in deployed units. Manufacturers offer functional courses (not factory training) to provide this type of training. These resources provide travel costs and contract training for 40 technicians.

# Activity Group: Education and Training-Health Care (cont'd) C. Reconciliation of Increases and Decreases 5. Program Decreases A. Annualization of FY 1985 Decreases (-534) 1) Scholarship Load Reduction Resources reflect a decrease in the Armed Forces Health Professional Scholarship Program student loads due to decreases in the authorized student billets. 6. FY 1986 President's Budget Request \$29,891

#### Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Recruiting Activities
Budget Activity: 8 - Training, Medical and Other General Personnel Activities

I. Description of Operations Financed. Recruiting Activities provides for the operating and maintenance costs necessary to support the 6,219 military billets (including students) and 587 civilians comprising the FY 1986 staff of the Navy Recruiting Command; the operating of over 1,600 recruiting facilities located in all 50 of the United States and in the Philippines, Guam, and Puerto Rico; the operation of 3,970 recruiting vehicles; the operation and minor maintenance of 50 T-34B aircraft used for aviation recruiting; efforts to recruit special categories of officer and enlisted personnel such as medical, dental, nuclear, and advanced electronics personnel; and travel, lodging, and subsistence costs of personnel processed by the Military Entrance Processing Stations.

# II. Financial Summary (Dollars in Thousands).

A. Sub-Activity Group Breakout.

- B. Reconciliation of Increases and Decreases (cont'd).
  - 1) Recruiting Data System (RDS) Upgrade Funds allow for a full-year of telecommunications operations in FY 1986
    associated with the upgrade of Recruiting's in-house computer in FY 1985. +129
- B. Other Program Growth in FY 1986 (+4,933)
  - 1) Civilian Substitution (CIVSUB) Increase in civilian end strength
    is due to the substitution of enlisted
    personnel with civilians in recruiting
    support areas so that enlisted personnel
    may fill fleet requirements. +1,017
  - 2) Enlisted Workload Increases An increase of +10,000 enlisted new contracts in FY 1986 requires 350 additional recruiters and 116 additional support billets. Support costs include applicant travel, lodging and subsistence for the +10,000 enlisted contracts (+\$708 thousand) and increased computer timesharing costs (+\$270 thousand); funds for 194 additional recruiting vehicles (+\$655 thousand); communications (+\$115 thousand); reimbursement to the new recruiters for out-of-pocket expenses (+\$103 thousand); training (+\$55 thousand); supplies (+\$141 thousand); new equipment purchases (+\$121 thousand); printing support (+\$19 thousand); and recruiter travel and per diem +2,318 (+\$131 thousand).
  - Applications programs for microcomputers used by field recruiting activities will require modification/
    updating to incorporate changes in the structure of reports and of the systems used to process recruiting information. The expertise needed to modify these applications programs is not available in-house. Therefore, modifications must be procured from commercial sources.

+50

- B. Reconciliation of Increases and Decreases (cont'd).
  - 4) Automated Information System Improvement -Prototype Local Area Network (LAN) and electronic mail systems are under development within the Navy Recruiting Command. Applications have been developed which promise to speed information in the form of Lead Cards on individual qualified prospects to recruiters in a convenient and usable form. These Lead Cards contain the name, address, telephone number, Armed Services Vocational Aptitude Battery (ASVAB) score and future plans of the prospect. The previous method of providing this information was cumbersome, slow and labor intensive for the recruiters and provided very limited opportunity for timely planning. As a result, Navy recruiters were not able to contact prospects until much later than our competitors. Expansion of this prototype is requested to provide additional hardware and associated software in the field to achieve the goal of cutting the time delay by about three weeks and the labor of transcribing the information by hand at 60 locations thereby allowing recruiters more time for active prospecting.

+313

5) Vehicle Utilization - Navy Recruiting personnel operate a fleet of about 3,000 passenger-carrying vehicles in prospecting for recruits in every area of the United States. The level of effort required and miles driven will increase over past years due to the combined effect of the improving private employment situation and a smaller pool of recruitable age youth. In order to combat these adverse conditions, production recruiters will be required to spend much more time in the schools and neighborhoods of prospective recruits. The increase requested will provide for full year vehicle operations at an additional 24 miles per vehicle per week, an initiative started in FY 1985. +323

- B. Reconciliation of Increases and Decreases (cont'd).
  - 6) Mobile Recruiting Exhibit Upgrade -A two phase upgrade program is planned for FY 1986 to redesign and re-equip the existing Navy mobile exhibit vans and electronic static displays. This redesign will be specifically aimed at the high quality market, emphasizing both the advanced technology training/ experience and the leadership experience available in the Navy programs. Two vans will be specifically designed to exhibit unclassified examples of the type of "high tech" training available across the range of enlisted ratings and officer warfare specialties. All vans and exhibits will be updated to take advantage of the latest exhibit technology which features highly reliable solid state programmable devices, some of which will employ laser disc recordings. This storage medium for audio and video information will provide high fidelity and clarity which have been weak points in the past. Funding is requested to pursue a competitive contract for the performance +145 of this project.
  - 7) Vehicle Per Recruiter Ratio End strength constraints coupled with improving economic conditions and a declining population of recruitable-age youth mandate an intensified effort on the part of authorized recruiters. The funds requested will permit full year funding of the FY 1985 initiative to raise the vehicle per recruiter ratio to 7.5 vehicles for every ten recruiters from the previous 7.0 vehicle per 10 recruiters. The increased mobility provided by this action will permit recruiters to more fully explore leads provided by the enhanced advertising effort requested elsewhere in the budget. +767
- 4. Program Decreases

-1,754

A. One-Time FY 1985 Costs

(-620)

Automatic Data Processing (ADP) Modifications - Decrease due to conversion in FY 1985 of ADP programs to run on the new operating system.

-104

O&M.N

- B. Reconciliation of Increases and Decreases (cont'd).
  - 2) Armed Services Vocational Aptitude
    Battery (ASVAB) Recalibration ASVAB
    tests, which are used to determine
    vocational aptitude of applicants
    for military service, were recalibrated
    in FY 1985.

-207

3) Recruiting Data System (RDS) Upgrade Decrease for one-time training costs
(-\$13 thousand) and for one-time
purchase of start-up software associated with the RDS Upgrade (-\$104
thousand).

-117

Training on Office Automation Systems - The installation of office automation systems created a need for system-specific and program-specific training of operators on the technologically improved systems. The majority of the training conducted in FY 1985 is considered to be one-time in nature with only minimal on-going training requirements for new operators.

-192

B. Other Program Decreases in FY 1986

(-1,134)

1) Teleprocessing Contract Reduction in contracted teleprocessing costs generated by
the Recruiting Data System (RDS)
Upgrade in FY 1985.

-783

2) Officer Workload Decrease - Officer recruiting workload is decreasing in FY 1986. Associated with this workload decrease is a reduction of 29 officer recruiters and support personnel. Support costs pertaining to these reductions include: applicant travel(-\$164 thousand); a reduction of 19 recruiting vehicles(-\$34 thousand); reimbursement to officer recruiters for out-of-pocket expenses (-\$8 thousand); reduced communications (-\$10 thousand); reductions in printing (-\$2 thousand); travel and per diem (-\$11 thousand); supplies (-\$12 thousand); and equipment (-\$4 thousand).

-245

- B. Reconciliation of Increases and Decreases (cont'd).
  - Civilian Substitution Offsets A civilian substitution program, which increases civilian positions in exchange for offsetting decreases in enlisted billets, is scheduled to begin in FY 1986. Decreases in support costs relative to the enlisted billet reduction include: supplies (-\$35 thousand); equipment purchases (-\$36 thousand); training (-\$15 thousand); and communications (-\$20 thousand).

#### Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Advertising Activities

Budget Activity: 8 - Training, Medical and Other General Personnel Activities

- I. Description of Operations Financed. The Navy's advertising is built around a national advertising plan which is complemented by local advertising and an active public service campaign. Included in the overall advertising strategy is a media campaign targeted at the minority audience with the objective of increasing the number of minority accessions. The Navy relies on a media mix that includes television, radio, printed advertising in magazines and newspapers, outdoor advertising, direct mail campaigns and recruiting booklets, pamphlets and posters to increase public awareness, portray opportunities and generate leads. The advertising effort is aimed at four program areas, and the media mix is as follows:
- A. General Enlisted television, placements in general circulation and high school magazines, outdoor advertising (special minority efforts) and direct mail.
- B. Officer Programs selected magazine and college newspaper placements and direct mail.
- C. Medical magazines, placements in selected medical journals and direct mail.
  - D. NROTC magazine placements and direct mail.

In addition to the general program areas supported by national advertising, Navy supports the priority nuclear officer program, aviation officer program, and prior service/reenlistment through point-of-sale literature and field advertising funding. The advertising for each program area is designed to reach a specific target audience, and the media mix is adjusted for maximum impact.

#### II. Financial Summary (Dollars in Thousands).

A. Sub-Activity Group Breakout.

|                               |         | FY 1985           |                    | FY 1986 |        |        |

B. Reconciliation of Increases and Decreases.

1. FY 1985 Current Estimate

\$20,632

2. Pricing Adjustments

+887

A. Other Pricing Adjustments

(+887)

3. Program Increases

+1,777

A. Other Program Growth in FY 1986

(+1,777)

1) The impact of declining resources for Navy advertising awareness programs has resulted in a loss of 17 percentage points, since Spring 1982, in total Navy advertising awareness with concurrent drops in Preference, Slogan Recall and Propensity based on the Navy Advertising Effectiveness Study (NAES) which is a semi-annual survey conducted since 1976 of the potential target market of recruiting males 16 to 21 years of age. Navy's advertising awareness, which increased from 53 percent in Spring 1976 to 82 percent in Spring 1979, remained fairly steady until Spring 1982, the time of Navy's last appearance of paid television advertising. Beginning at that time, all advertising measurements began to decline. The decreases did not affect recruiting production until recently since the market had been conditioned through advertising efforts of the past. This is further compounded by media inflation rates which continue to outpace standard inflation rates, resulting in decreased levels of advertising.

This decline in Navy advertising awareness results in less awareness of Navy as a career opportunity within the target market and will affect future recruiting production. This reduces the number of prospective applicants which visit recruiting stations without prior contact. This decline also increases the difficulty of a sale due to lack of conditioning of the market through advertising efforts.

# B. Reconciliation of Increases and Decreases (cont'd).

An increment of \$1,777 thousand allows for additional advertising in television and magazines in support of the general enlisted program. This increment is required to ensure that the current downward trend in awareness does not continue. The FY 1986 budget request allows for an advertising program with an adequate television and magazine advertising which should halt the current downward trend in Navy awareness.

|      | No. of weeks<br>Impressions      | 10<br>74,480,000        | 15<br>111,720,000       | 18<br>134,064,000       |  |
|      | Collateral Sales Mat             | erials 2/               |                         |                         |  |
|      | No. of Booklets Impression       | 24<br>3,820,000         | 40<br>10,333,400        | 40<br>10,333,400        |  |

The above figures represent performance criteria for Navy media placement dollars and collateral sales materials on both a national and local basis. In addition to the media represented above, advertising dollars also fund certain support requirements such as public service advertising production, agency creative production, marketing research and commercial advertising agency labor and overhead.

Reserve advertising are included in these performance criteria.
Collateral Sales Materials were not previously reflected. This Category has been added to reflect more accurately the advertising activity obtained.

IV. Personnel Summary.

NOTE: Personnel who administer this program are included in the Recruiting Activities Activity Group.

#### Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Other Personnel Activities

Budget Activity: 8 - Training, Medical and Other General Personnel Activities

- I. Description of Operations Financed. This activity group finances the following operations:
- A. Morale, Welfare and Recreation (MWR) Provides for the development, implementation and maintenance of MWR programs for Naval personnel. This subactivity group finances the following major programs:
- 1. The Fleet Motion Picture Program provides maintenance and repair for motion picture equipment and entertainment motion picture films to the Fleet and isolated stations where few or no recreational alternatives are available. Under such adverse conditions of duty, fees for admission are not charged.
- 2. The Open Mess Equipment Program provides for the purchase and installation of food preparation and service equipment in support of food service operations and for the purchase of furnishings and equipment to provide improved dining facilities.
- 3. The Fleet/Shore Recreation and Fitness Program provides recreation and fitness equipment and supplies for deploying units, recreation and fitness equipment for shore activities and outfits personnel with athletic equipment to train for interservice and world-wide sports competition. Priority consideration is given to overseas, semi-remote and isolated activities, deploying units and those activities that provide recreation service support at Fleet Concentration Centers.
- 4. The Recreational Services Executive Control and Supervision Program supports costs for the development of operational guidance, training, on-site field assistance support and the provision of technical assistance and oversight for the Navy's Recreational Services Program by the Commander, Naval Military Personnel Command (COMNAVMILPERSCOM).
- 5. The Child Care Program satisfies the basic physical needs of children supervised and offers a program of activities to meet emotional and developmental needs of children. Training for Navy child care center directors is provided along with new/replacement equipment necessary to properly outfit the child care centers.
- 6. The Youth Center Program offers constructive, supervised recreation activities for school-age children. Training for youth center directors is provided along with new/replacement equipment for youth centers and programs.
- B. <u>Human Resource Management Support System (HRMSS)</u> Provides for the Human Resource Management Support System which is designed to improve organizational and individual effectiveness and to promote increased personnel management skills that impact on retention, unit effectiveness and efficiency. This subactivity group finances the following major programs:

- 1. The Leadership and Management, Education and Training (LMET) Program provides proven, competency based leadership and management skills and knowledge to E-5 through 0-6 personnel in the Navy. This Program is directed at skills for enhancement of retention, command effectiveness and Navy readiness.
- The Human Resource Management (HRM) Program is focused on enhancing command operational performance through improvement of individual and organizational effectiveness. This Program incorporates elements of LMET, Overseas Duty Support Program (ODSP), Drug and Alcohol, Family Service and Equal Opportunity (EO) Programs. This incorporation provides the systematic framework for setting policy, implementing and evaluating the Navy's quality of life.
- The Alcohol Program provides for the early identification, rehabilitation and follow-on support for personnel with alcohol abuse problems and for the education of Naval personnel to prevent alcoholism. The Navy's four Alcohol Rehabilitation Centers can accommodate over 300 residents in a six week treatment program. Preventive education is conducted at all levels of command and through the Navy Substance Abuse Prevention Program (NASAPP) sites (formerly called Navy Alcohol Safety Action Program (NASAP)).
- 4. The Drug Program provides an education program aimed at preventing drug abuse among Navy personnel and a rehabilitation program for chemically or psychologically drug dependent personnel capable of being returned to productive duty. The institution of the Navy Substance Abuse Prevention Program (NASAPP) (formerly called Navy Drug Safety Action Program (NDSAP)), in addition to career sequenced fleet training, provides for extensive drug abuse prevention education. The Naval Drug Rehabilitation Center has a capacity for 200 resident patients.
- 5. The Health and Physical Readiness Program is charged with assisting active duty members in meeting fitness requirements set forth in OPNAVINST 6110.1B, as well as developing an overall healthy lifestyle that is conducive to enhancing combat readiness, sustainability and personal productivity. These standards are in accordance with the Department of Defense (DOD) Instruction 1301.8. The objective of this Program is to establish an environment in the Navy which supports total fitness and to concentrate efforts on the whole person each and every day of their active duty service. This Program addresses seven components selected for immediate applicability to Navy lifestyle, but will expand in scope as other issues affecting Navy personnel require attention. seven elements are: weight control/nutrition, physical fitness/exercise, smoking cessation, stress management, prevention of substance abuse, high blood pressure control and prevention of lifestyle related accidents.
- C. Per Diem for Less Than 20 Weeks Training (TEMDUINS) This subactivity group and program provides the per diem costs incurred during training which prepares personnel to match the skill level required in their next duty station while enroute from one permanent duty station to another.

- D. Other Personnel Support This subactivity finances the following major programs:
- 1. The Chaplains Program supports the Chief of Chaplains' mission to: (a) provide ministries; (b) manage the Chaplain Corps accession, detailing, professional development and supervision of the Religious Program Specialist (RP) rating; (c) advise the Naval Establishment in matters and policies pertaining to religious and moral well-being; (d) interpret Navy policy and programs to the Nation's religious bodies; and (e) inform the Naval Establishment regarding the positions of the Nation's religious leaders.
- 2. The Navy Music Program provides operational support to the Navy's Fleet/Area Bands and the U.S. Navy Band, Washington, DC. Their primary responsibility is to provide musical support services to the White House, State Department, Department of Defense and Fleet Commanders as directed in support of the Navy's morale, retention, recruiting and community relations programs and initiatives.
- 3. The Career Counseling/Retention Media Program informs and motivates Navy enlisted personnel to take full advantage of Navy career opportunities.
- 4. The Printing and Reproduction Program provides management, printing, addressing and mailing services for initial and routine distribution of revised administrative manuals and related publications and directives and forms that are distributed and stocked Navy-wide in support of Naval personnel management.
- 5. The Officer/Enlisted Selection Boards provide travel and per diem for qualified members from outside the Washington area to serve on selection boards in accordance with Title 10 U.S. Code and Secretary of the Navy Affirmative Action Plan requirements.
- 6. The Temporary Disability Retired List (TDRL) Program provides for travel and per diem of all personnel on the TDRL to have a physical examination at the nearest military hospital every 18 months, and for appearance, if requested, at formal hearings by the Physical Examination Board under the authority of Title 10 U.S. Code.
- 7. Other Mission Essential Travel provides for interviews of prospective Navy White House Fellows; two to three weeks of classroom instruction for adult dependents on cultural characteristics of the foreign country to which their sponsor has been assigned; on-the-job training for law students in Navy legal offices during their summer vacations; Navy participation in sports events; Bachelor Enlisted Quarters/Bachelor Officer Quarters Management team visits; round trip transportation to the Continental United States (CONUS) for eligible enlisted personnel who extend overseas; and other mission essential travel.
- 8. The Reserve Short Tours Program funds the travel costs necessary to recall inactive duty Naval reservists to active duty for short tours at the request and for the benefit of the active military personnel component.

- 9. The Deserter Apprehension Program provides for routine operating costs of nine Absentee Collection Units and one Detention Center within Continental United States (CONUS) and support costs for guards/escorts accompanying member deserters from point of apprehension to duty station and/or Navy processing activity for appropriate disposition.
- 10. The Navy Special Services Administrative Activity (NSSAA) was disestablished on 16 April 1984. In its place was established the Naval Military Personnel Command Detachment, Navy Recreational Services Unit. The Navy Recreational Services Unit is authorized appropriated fund support for administrative costs in order to develop and execute a coordinated, comprehensive support program that provides service for fleet and shore based commands with recreation activities. Support is provided through formal training classes for executives, professional and administrative employees; clinics for auditors, technicians and specialists; and other professional training.
- 11. The Corrections Management Information System (CORMIS) is designed to integrate all the requirements to manage and administer the Navy Corrections Program and operate individual facilities. The Corrections Management Information System will increase security through better control and accounting of prisoners; support operational and administrative functions; reduce staff paperwork; and supply current information to the brig staffs, major claimants and the Chief of Naval Personnel.
- 12. Care of Deceased Personnel Program provides Navy and Marine Corps members with all expenses incurred in connection with the recovery, preparation, encasement, transportation, funeral and burial of deceased personnel, escort service when applicable and memorial services when remains are non-recoverable.
- 13. Naval Aviation Museum provides support for maintenance of 30 areas of grounds, preventative and routine maintenance of all equipment required for grounds keeping, workshop audiovisual requirements, aircraft movement and upkeep of museum exhibits and facilities.
- E. Navy Flight Demonstration Team Provides for conducting flight demonstration and public appearances. The operation also includes the training necessary to perform these demonstrations. Museum personnel who maintain visitor control and perform routine security of interior and exterior exhibit areas during hours of operations are also supported.

B. Reconciliation of Increases and Decreases (cont'd).

3. Functional Program Transfers

+4,938

A. Transfers In

(+4.938)

1) Inter-Appropriation

- +4,938
- a) Expense/Investment Criteria
  Revision Amounts transferred
  from Other Procurement, Navy pursuant to the proposed DoD initiative
  for elimination of \$3 thousand investment threshold and adoption of central
  management criteria as a governing
  factor.

+4,303

b) Aviation Depot Level Repairables
(AVDLRs) - Change in obligational
authority resulting from full year
implementation of AVDLRs stock
funding initiative which began
1 April 1985.

+635

4. Program Increases

+6,062

A. Annualization of FY 1985 Increases

- (+69)
- 1) Alcohol Program Increase to support full workyear cost for Alcohol counselors supporting the expanded mission of the treatment outreach program.

+27

2) Flight Demonstration Team - During FY 1985, the training command began using all JP-5 fuel as a safety measure. This increase is for full year implementation.

+42

B. One-Time FY 1986 Costs

(+175)

1) Deserter Apprenhension Program (DAP) - Increase required to fund furniture and furnishings at Navy Absentee Collection Unit (NACU), Jacksonville, FL which were recently destroyed by fire; also to replace chairs, tables, cabinets, bookcases, etc., at the other eight NACUs which are presently furnished with salvage and surplus furniture (+\$120 thousand); printing and distribution of the new DAP standard operating procedures and program training manual (+\$13 thousand); replacement of nine

B. Reconciliation of Increases and Decreases (cont'd).

telecopiers at the nine NACUs which are approximately ten years old and are becoming unreliable and increasing maintenance costs (+\$27 thousand); replace consumable equipment such as handcuffs, emergency leather gear (holsters, belts, etc.), briefcases, nightsticks, badges and other related items that were initially purchased in 1979 are now unserviceable due to normal wear and tear (+\$15 thousand).

+175

C. Other Program Growth in FY 1986

(+5,818)

1) Fleet Motion Picture Program - This Program provides the sole form of off duty entertainment for ship board personnel and the primary form of such recreation for isolated units. This type of entertainment maintains the mental acuity and physical wellbeing of military personnel aboard ships and isolated duty stations where workdays are often long and arduous. Due to the anticipated increase in the number of ships from 542 in FY 1985 to 555 in FY 1986, the demand upon the motion picture exchanges will increase. The additional funds requested will provide one additional copy of feature films to meet the increase in demand.

+99

Open Mess Equipment Program - Funds are required to support increased requirements from activities for equipment purchased with Operation and Maintenance. Navy (O&M,N) funds plus the requirement to use 0&M,N funds to purchase all mess food service equipment, regardless of unit price, that is designated for stock fund management in the central supply system. These funds will provide for a reduction in mess deficiencies to improve food service and the availability of meals in a wholesome atmosphere to reduce the consumption of alcoholic beverages and provide alternatives to idleness, boredom and drug abuse.

- B. Reconciliation of Increases and Decreases (cont'd).
  - Fleet/Shore Recreation and Fitness Program -Funds will provide basic recreation and athletic equipment for deploying units. The Navy is emphasizing vigorous physical fitness programs and recreation specifically designed to involve Navy members in healthy and productive off duty physical and mental activities afloat and ashore. This recreation/athletic equipment will provide a constructive use of leisure time while ships are deployed that will offer alternatives to substance abuse and enhance shipboard habitability, morale and combat readiness. These funds will provide for equipment deficiencies which exist predominantly with smaller ships such as frigates, destroyers, minesweepers and submarines, that are unable to generate sufficient recreation funds from ships store operations.

+140

4) Recreational Services Executive Control and Supervision Program . This Program is intended to provide on a phased basis over a ten year period, total appropriated fund (AF) support to Navy recreational services executive control and supervision. Additional support is required based on the following: (1) AFs are necessary for management overhead costs incurred by the Commander, Naval Military Personnel Command (COMNAVMILPERSCOM) such as the Fiscal Oversight Staff (Inspector General and Naval Audit Service recommended) for the Navy's Recreational Services System. This System includes approximately 800 individual activities. This staff identifies internal control weaknesses through periodic on-site audits and improves the ability of the recreational program manager to monitor recreational services financial operations, thus countering fraud, waste and abuse; and (2) Navy's Morale, Welfare and Recreation Policy Board and Chief of Naval Operations (CNO) Objectives Number 4.10 directed increased AF support to improve the

B. Reconciliation of Increases and Decreases (cont'd).

quality of Navy life. The additional AF will offset authorized Navy program management overhead costs; non-appropriated funds (NAFs) can then be programmed to directly benefit the sailor, e.g., for recreational facilities, equipment and operational requirements at the individual activity level. AF funding is also required in order to release NAFs to meet CNO directive of 20 August 1982 to reduce the backlog of major recreational services facility deficiencies which can only be funded with NAFs.

+275

of this Program - The long range goal of this Program is to improve the quality of care in Navy operated child care centers. This has been accomplished in part by the provision of civil service billets to most of the centers; however, additional improvements to the program in the areas of staff training and equipment is needed.

The June 1982 General Accounting Office (GAO) audit on military child care programs reported deficiencies in several areas, which consisted of safety, health, staff training, program development and food services. The program growth in FY 1986 is to be used to correct these deficiencies. Currently, funding levels are used for staff training and priority equipment and cannot accommodate the need for the level of equipment cited in the GAO report.

+186

6) Youth Center Program - The Youth Program offers constructive, supervised recreation activites for school-aged children. Training for youth center directors is provided along with new/replacement equipment for youth programs. Equipment deficiencies originally identified were sports and recreation skills development equipment. The additional funds are needed for replacement of basic facility equipment which is the aftermath of years of donated items and for equipment which is needed to support the President's Council on Physical Fitness and Sports objective to improve youth fitness. Additionally, the number of youth centers continues

B. Reconciliation of Increases and Decreases (cont'd).

to grow, increasing the number of facilities needing appropriate and durable equipment.

+74

Alcohol Program - This increase supports the Chief of Naval Operations education initiative that started in FY 1985 for additional Navy-wide participation in the Navy Substance Abuse Prevention Program (NASAPP) (formerly called the Navy Alcohol Safety Action Program (NASAP)/Navy Drug Safety Action Program (NDSAP)). The intent of this initiative is to maintain readiness and individual health of Navy personnel who need help.

Additional funding in FY 1986 will accommodate increased fleet demand for NASAPP training. The higher class loads require additional classes (ashore and at sea), classrooms, training for both civilian contract and military facilitators, training materials, etc., Navy has evaluated increasing the size of the present classes to accommodate this increased throughput and the effect it would have on the Program's effectiveness. This action was determined to reduce the effectiveness of the class. Funding will allow an additional 7,156 student throughput at the exisiting NASAPP sites.

+644

Drug Program - The Substance Abuse Management Information and Tracking System (SAMITS) (formerly called Navy Alcohol and Drug Information System (NADIS)) is an enhanced system which will function as a batch processing information system and will collect data from world-wide sources for prevention and tracking purposes. Currently, SAMITS support is via contract for computer timesharing and the use of a visual scanner to analyze reports as they are presented. Program compatibility throughout the reporting substance abuse sites is required. The procurement of microcomputers will streamline the administrative workload and information retrieval by: (1) permitting test and development of screen displayed self-editing SAMITS forms for use in substance abuse sites;

#### B. Reconciliation of Increases and Decreases (cont'd).

(2) providing compatible equipment to receive urinalysis data from the Naval Medical Command (NAVMEDCOM) laboratories, other major claimants' reporting sites and outside Navy sources who provide current statistics on health and fitness issues; (3) providing inhouse ability to respond to shortfused or simple ad hoc data requests; and (4) reducing timesharing costs due to the use of floppy disk for 50 per cent of data input.

Increases for SAMITS provide full support for contractor efforts for data entering of information collected for health fitness and substance abuse areas (+\$91 thousand); and system analysis and programming for capturing statistical data and tracking for any new program element of substance abuse such as identifying threshold or "gateway" drugs such as nicotine, caffine, etc., that lead to abuse of more dangerous substance (+\$115 thousand). The increase also provides for one-time procurement of 36 microcomputers for distribution to 36 Substance Abuse Program sites (+\$49 thousand).

+255

Health and Physical Readiness Program -Since FY 1982, Navy has followed Congressional quidance and emphasized physical conditioning and fitness as a leadership issue. However, in spite of sound leadership and the use of available programs, active duty personnel continue to be separated due to failure to meet Navy's weight standards. The Naval Health Research Center published a study early in FY 1984 to evaluate the fitness levels of Navy members. The results showed that 22 per cent of the total 550,000 member active duty population in FYs 1984, 1985 and 1986 will fail Navy's physical readiness test, with an additional 18 per cent of the members unable to achieve a rating of satisfactory, thereby placing them in the minimum standard category. This puts a total of 220,000 members (40 per cent of the Navy active duty population) in the failure category for non-compliance with guidance. Additionally, 13 per cent of the Navy active duty population will fail the per cent body

B. Reconciliation of Increases and Decreases (cont'd).

fat category (included in the 22 per cent figure) and will require a remedial lifestyle modification course on nutrition, health fitness, weight control, etc.

The thrust of Navy's health promotion strategic aim in FY 1986 is to improve personnel sustainability under combat conditions and reduce health risks by combining educational, behavioral and organizational interventions that have proven effective in enabling individuals to change the way they live. This health promotion program is designed to develop and maintain the health and physical fitness of Navy members at three levels. Level I promotes vigorous and active health and fitness programs at the command level. Level II includes non-residential screening and counseling as appropriate and lifestyle modification education and training. Level III provides residential treatment for members who have been clinically evaluated by competent medical personnel as being significantly over-weight and who have potential for continued Naval service. Funding of this Program will enable a seven step program to be developed and implemented which will expand on the current testing procedures to include: 1) exercise/ physical fitness, 2) weight control/ nutrition, 3) smoking cessation, 4) stress management, 5) hypertension control, 6) substance abuse prevention and 7) prevention of lifestyle related accidents.

The FY 1986 program includes contractual support for the purchase and distribution of lifestyle pilots in smoking cessation and stress management (+\$776 thousand); command fitness coordinator training support for five day workshops, course materials and educational kits (+\$60 thousand); pilot tests and Navy-wide surveys for the prevention of substance abuse, high blood pressure and lifestyle-related accidents

B. Reconciliation of Increases and Decreases (cont'd).

will be provided by Interagency Government purchase of contractual support (+\$146 thousand); and travel and per diem for quality control of course delivery at approximately 100 sites (+\$40 thousand). +1,022

- Per Diem for Less Than 20 Weeks Training (TEMDUINS) This Program provides the per diem costs to prepare personnel to meet the skill levels required in their next duty station while enroute from one permanent duty station to another and accomplishes two important operational objectives:
  - To provide each student with sufficient prerequisite training to meet specific billet skill requirements <u>prior</u> to arrival at the ultimate duty station.
  - To minimize temporary billet vacancies caused by "catch-up" training for the service member <u>after</u> his or her arrival at the ultimate duty station.

The TEMDUINS Program includes supervisory level courses of instruction, general technical familiarization and equipment operator skill training. Growth in both Regular and Reserve end strength will result in additional TEMDUINS requirements in FY 1986. Increases will allow for additional training in current programs as well as training in new areas to support the force structure, a new carrier, upgraded combat systems and new weapons systems and other requirements in support of build up of the 15 battle group Navy. Specific officer and enlisted increases are as follows:

- Funds will provide for Training and Administration of Naval Reserve (TAR) accession training associated with TAR end strength growth. Funds will also provide for a new indoctrination course for aviation warfare training; a surface warfare initiative to require surface warfare qualifications for certain Limited Duty Officers (LDOs)

C. Reconciliation of Increases and Decreases (cont'd).

enroute to assignments as ships engineering officers; and for attendance at a Program Managers course for all senior officers enroute to Program Manager billets at the Systems Commands. The length of this course will cause the average number of officer training days to increase by .3 days (+\$468 thousand).

- Enlisted end strength increases in FY 1986 will require additional Regular and Reserve Navy enlisted accession training. Funds will also provide for training in new construction, engineering, hull and other techical ratings associated with end strength growth; for submarine/nuclear power training associated with TRIDENT manning and introduction of a new nuclear aircraft carrier; training for aviation ratings due to force structure requirements; and training for technical ratings due to new and upgraded tactical systems for fleet modernization. In addition, funds will allow for more training in Leadership and Management, Education and Training (LMET), in hospital corpsman/dental technician ratings and in discipline and other special areas (+\$792 thousand).

+1,260

11) Chaplains Program - Increase supports travel and per diem required to attract more diverse and qualified chaplains. This involves travel to seminaries to present the Navy to prospective chaplains, as well as travel to liaison with faith group endorsing agents. This liaison is essential because endorsing agents make chaplains available for Naval service. Funds will also provide travel and per diem required for assistance, training and inspections as more faith groups are added to serve the spiritual needs of the active duty population.

+19

- B. Reconciliation of Increases and Decreases (cont'd).
  - Music Program The Navy Music Program supplies musical instruments and related equipment to Navy's Fleet/Area Bands and the Navy Band, Washington. The inventory required to meet this demand includes 71 generic classifications of musical instruments and 116 classifications of musical accessories. This program increase allows for replacement of 9 per cent of the Navy Music Program's inventory.

+71

13) Mission Essential Travel Program -Incentive Option C (Overseas Extension) is an entitlement program established as part of the Military Pay and Allowances Act of 1980. It enables enlisted personnel of specific specialties, who extend their tour of duty at specified overseas duty stations, to take 15 days Rest and Recuperation (R&R) with government paid round trip transportation from the ex-Continental United States (CONUS) port of debarkation to the first port of entry in CONUS. The Navy has encouraged overseas personnel to extend their tours of duty to save Permanent Change of Station (PCS) funds. This is an entitlement program and must be funded. Increase will provide funding of the program based on past experience, projected rotations and anticipated requests.

+239

14) Corrections Management Information System (CORMIS) - Funds will provide a management information system, as required by SECNAVINST 1640.9A, for brigs. This system will increase security, support operational and administrative functions, reduce staff paperwork and supply current information to the brig staffs, major claimants and the Chief of Naval Personnel. CORMIS will operate through a centrally controlled and managed data base programmed to support the requirements of the Chief of Naval Personnel and the individual facilities in an accurate and timely manner. Also, this system is designed to integrate all the requirements necessary to manage and administer the

Navy Correctional Program and operate individual facilities. These resources support travel to perform site visits, procurement of supplies, printing costs and other system design, analysis and implementation costs.

+342

15) Care of Deceased Personnel Program -Increases for this Program provides resources to transport the remains of retired members who die in service medical facilities to their homes (+\$127 thousand) and transportation for the next-of-kin (brothers and sisters) of deceased members who die in the line of duty, when the funeral is over 200 miles from the survivor's residence and these relatives are unable to defray the cost (+\$38 thousand). These increases support new entitlements included in the FY 1985 Defense Authorization and Appropriation Acts.

+165

16) Naval Aviation Museum - Increase required to contract for aircraft restoration/preservation and temporary civilian employees to perform housekeeping functions.

+237

17) Navy Flight Demonstration Team - Increase supports increased travel requirements for the Navy Flight Demonstration Squadron.

+18

**Program Decreases** 

-849

A. Other Program Decreases in FY 1986

(-849)

Drug Program - Reduction for General Services Administration (GSA) Teleprocessing Service (TPS) Contract providing services for the Substance Abuse Management Information and Tracking System (SAMITS) as a result of downloading data base elements in-house onto hard disks and manipulation of data via microcomputers. -138

2) Career Counseling/Retention Media Program -Reduction in Navy's Retention Advertising is due to renegotiation of contracts between Sponsors (i.e., Base Commanders, Continental United States (CONUS) and Public Affairs) and Civilian Enterprise Navy Base Newspapers. New contracts will allow a decrease in cost of retention advertising placement without decreasing the number of ads.

Types of equipment

| Types of equipment                        | , 0 |
|---|-----|
| Messes to receive equipment               | 127 |
| Major categories of equipment (such       | 8   |
| as food preparation, handling and         |     |
| service equipment including items         |     |
| that support food service operations      |     |
| to improve sanitation, safety, efficiency |     |
| and attractiveness of mess facilities).   |     |

The number of messes receiving equipment each year is based on a three year cycle for providing one-third of the facilities some support. Nominal increases in resources will not alter this number significantly. Dollar projections and numbers of messes involved are estimates and cannot be rigidly followed because of emergency/urgent requirements due to equipment failures, renovation projects, and desire to support overseas messes on a priority basis. In addition, there are considerable differences between types of messes. For example, multiple building/food service facilities influence projections on the number of messes to receive equipment each year.

### Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Off-Duty and Voluntary Education

Budget Activity: 8 - Training, Medical and Other General Personnel Activities

1057g/1-10

### I. <u>Description of Operations Financed</u>.

This program encompasses the Navy-wide Off-Duty Education Programs that provide support services to meet requirements of individual education requirements for a more effective naval force.

- A. Defense Activity for Non-Traditional Education Support The Defense Activity for Non-Traditional Education Support (DANTES) is under the policy guidance of the Department of Defense with funding and administrative support provided by the Navy. DANTES provides support to voluntary education programs of the military departments through credit-by-examination programs and a record and reporting system; develops and disseminates information on innovative non-traditional educational delivery systems and materials and study courses available from the civilian education community; provides technical representative service on contracts supporting the Department of Defense interest in the Servicemen's Opportunity College (SOC) program and the Office on Educational Credit of the American Council on Education; and provides transcript services to civilian institutions.
- B. Navy Campus Network The Navy Campus Network is a worldwide network providing management, administration, and on-site operation of all Navy off-duty education programs. Personnel and command advisement on educational matters, testing services, liaison with colleges conducting on-base courses, and other related functions are provided. The network currently consists of 197 education specialists and technicians located at 79 sites throughout the world.
- C. <u>Tuition Assistance (TA)</u> TA is the major financial support system permitting active duty Navy personnel to continue their education during off-duty hours. Funds provided to the servicemember pay 75 or 90 percent of tuition for post-secondary vocational and academic courses taken from approved educational institutions and 100 percent of tuition costs for high school completion courses.
- D. <u>Program for Afloat College Education (PACE)</u> PACE funds provide for contracts with colleges and universities to conduct post-secondary academic and vocational courses for Navy personnel assigned to deployed shipboard duty. PACE provides post-secondary courses of the same quality available to shore duty personnel, through TA, to the Navy's seagoing personnel during their off-duty hours. Colleges and universities are under contract to the Navy to provide ship riding college professors and technical teachers to conduct fully accredited academic and vocational courses.

### Activity Group: Off-Duty and Voluntary Education (Cont'd)

- E. <u>Instructor Services Program</u> Instructor Services Program funds are provided to Navy commands allowing Commanding Officers to provide non-credit, on-duty and off-duty courses of instruction to meet command specific or unique educational and training needs which cannot be accomplished through traditional Navy training or educational programs. Examples are foreign language and customs for personnel stationed overseas, personal development courses such as speedreading and effective writing techniques and unique professional development courses. Commanding Officers can be authorized to pay a civilian instructor up to \$500 per course.
- F. <u>Functional Skills Program (formerly part of Navy Campus High School Studies Program)</u> A fully funded on-duty program, offered to ashore and afloat commands, designed to improve the mathematics, reading, composition and grammar of Navy personnel beyond the grade school level and enhance individual, professional and military performance. Instruction is provided by accredited civilian educational institutions under Navy contract.
- G. <u>Veterans Education Assistance Program (VEAP)</u> A contributory educational assistance program in which the service member can put a maximum of \$2,700 into an educational fund. The resources identified to this program are the Navy's two for one matching funds required under Public Law 94-502. Thus, the total educational funds, including the Navy's two for one matching, available to a participant is \$8,100.
- H. Educational Assistance Test Program (EATP) This special test program includes several different sections. Each section provides different benefits to personnel under a Congressionally authorized test program which took place between 1 December 1980 and 30 September 1981. Section 901 provides tuition and monthly stipend for maximum of 36 months; section 902 provides loan repayment; and section 903 is a non-contributory Veterans Education Assistance Program (VEAP).

### II. Financial Summary (Dollars in Thousands).

Activity Group: Off-Duty and Voluntary Education Program (Cont'd)

B. Reconciliation of Increases and Decreases.

1. FY 1985 Current Estimate

2. Pricing Adjustments +1,101

A. Civilian Personnel Compensation (Direct) (-167)
1) US Direct Hire Pay Adjustment -167
B. Stock Fund (-1)
1) Non-Fuel -1

C. Other Pricing Adjustments (+1,269)

3. Program Increases

+8,980

50.840

A. Other Program Growth in FY 1986 (+8,980)

1) Defense Activity for Non-Traditional Education Support -Funds required for new Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) taskings for the Secretary of the Navy follows in priority order:

- a) General Educational Development (GED) testing (CONUS) (271 thousand)
- b) Military Training Evaluation (75 thousand)
- c) Advisory Panel (Travel) (3 thousand)
- 2) Navy Campus for Achievement Funds are required for Ship Rider Counseling by Education Specialists as requested by Afloat Commanding Officers. This method is effective to develop deployment education planning and programming and to coordinate delivery of courses according to plan.
- 3) Tuition Assistance An increase of 15,031 in participation is anticipated due to: reinstatement of benefits to all Navy personnel, regardless of VA eligibility, effective 1 Mar 1984; expanded kinds of institutions eligible to receive tuition assistance; and no restriction on the number of courses a member may take per term in a fiscal year. These initiatives are an important incentive to Navy retention.

+2.721

+180

Activity Group: Off-Duty and Voluntary Education Program (Cont'd) Reconciliation of Increases and Decreases (cont'd) 4) Veterans Educational Assistance +5,730 <u>Program (VEAP)</u> - Reflects increased percentage of participation and new dollar estimates based on Veteran's Administration data and analysis. 4. Program Decreases -2.388A. Other Program Decreases in FY 1986 (-2.388)-22 Navy Campus Network - Decrease of 2 end strength to accommodate the Naval War College requirements. -13 2) Instructor Services - This is a program which responds to enrollment demand. Enrollments will be decrease due to available funding. -338 3) Functional Skills Program - There is an anticipated decrease of 3,851 in participation for FY 1986. This is a demand program and participation is limited by available funds. 4) Educational Assistance Test Program (EATP) a) Section 901 - Decrease associated -1.561 with completion of cash-out option for Section 901, Phase I participants (\$-1,561 thousand). Section 902 - Decrease associated -75 with completion of Section 902 benefits in accordance with P.L. 96-342 (-\$75 thousand). c) Section 903 - Decrease associated -327 with a reduction in the number of eligible participants, thus reducing the Navy's requirement to fund the participants contribution portion (327 thousand).

-52

5) Program for Afloat College Education -

This is a program which responds to enrollment demand, but must be limited by available funding. The cost per enrollment will increase which will limit participation.

Activity Group: Off-Duty and Voluntary Education Program (Cont'd)

#### III. Performance Criteria.

A. <u>Defense Activity for Non-Traditional Educational Support (DANTES)</u>. Through a system of approximately 850 testing sections, DANTES provides examination programs for the voluntary education programs of each military service. Additionally, DANTES has agreements with 20 nationally recognized certification organizations and with the Graduate Records Examination Board for the DANTES administration of certification examinations and the GRE (Graduate Record Examination) on a self-pay basis.

| <u>Testing Program</u> | FY 1984 | FY 1985 | FY 1986 |
|------------------------|---------|---------|---------|
| CLEP GENERAL           | 50,133  | 60,000  | 60,000  |
| CLEP SUBJECT           | 25,971  | 28,000  | 28,000  |
| DSST                   | 18,332  | 20,000  | 20,000  |
| GED                    | 21,736  | 25,000  | 25,000  |
| ACT                    | 3,211   | 3,550   | 3,550   |
| ACT/PEP                | 2,601   | 3,620   | 3,620   |
| SAT                    | 12,186  | 13,000  | 13,000  |
| GUIDANCE TESTS         | 16,176  | 50,000  | 60,000  |
| GED PRACTICE TESTS     | 47,985  | 75,000  | 100,000 |
| USAF1 TRANSCRIPTS      | 11,341  | 12,000  | 12,000  |
| TOTAL                  | 209,672 | 290,170 | 325,170 |

The Independent Study Program supports the voluntary education programs of the military services and the availability of independent study courses and programs through civilian educational institutions.

DANTES purchases or develops educational guides used by Education Services Officers, Test Control Officers and education counselors which detail policies and procedures for testing, describe program alternatives and opportunities and generally support the voluntary education program activities of each service.

DANTES serves as the Department of Defense technical representative for the contract that operates and maintains the Service members' Opportunity Colleges (SOC). This program is based on a network of over 400 colleges and universities that have adopted policies and programs especially designed to assist the service person.

Activity Group: Off-Duty and Voluntary Education (Cont'd)

### B. Navy Campus for Achtevement.

- 1) Navy campus Network Personnel of the Network who man field offices Navy-wide provide local education services to the Navy personnel assigned to their respective locations. Commanders or individuals who do not have on-site services available locally must obtain assistance by correspondence with the nearest field office or the respective Naval Education Training and Support Command. The duties of Network personnel also include the management of Program for Afloat College Education, Tuition Aid, Instructor Services, and the Functional Skills Program. They provide counseling and testing services, maintain individual education records, and provide advice to host commands on education matters. The education measure of performance is the number of professional counseling sessions and the number of participants in off-duty education programs. Professional counseling sessions were 119,353 in FY 1984. These sessions are anticipated to be 149,000 in FY 1985 and 172,000 in FY 1986. Program participation is constrained by, and is dependent upon, the level of funding available for individual programs.
- 2) Tuition Assistance Program Total enrollments in the Tuition Assistance Program was 68,402 in FY 1984, 67,605 in FY 1985, and 82,636 in FY 1986 are projected respectively.
- 3) Program for Afloat College Education PACE participation was 30,124 in FY 1984, 42,337 is projected for FY 1985 and 41,742 is expected for FY 1986.
- 4) The Instructor Services Program The enrollments for FY 1984 were 3,084; 5,500 enrollments are projected in FY 1985; 5,242 are anticipated in FY 1986.
- 5) The Functional Skills Program Participation was 21,400 in FY 1984 projections are 31,875 in FY 1985, and 28,024 in FY 1986.

### I. <u>Description of Operations Financed</u>.

This program encompasses four separately managed sub-programs consisting of (a) Civilian Education, which is designed to upgrade the professional knowledge and skills of employees, (b) Civilian Development, which is designed to train and develop civilian personnel at or below the entry level into the personnel management and financial management career fields, (c) Procurement and Logistics Civilian Career Programs, which are designed to train and develop high-quality replacements for professional positions in the procurement and logistics career field, and (d) the Procurement Training Program, which provides short courses for contracting/acquisition personnel.

|    |          | (2)      | Civilian Education - Computer Based Training (CBT) is an all inclusive term for training that is both delivered directly by computers and managed by computers. The advantage to the Naval Civilian Personnel Command (NCPC) lies in the ability of CBT to provide meaningful training feedback to the user for some types of complex courses, without instructor assistance. The degree of sophistication attainable with computers makes CBT training superior to other forms of non-instructor teaching methods. Navy, Air Force, Veterans Administration and Congress have all applied CBT concepts to special needs with resounding success. CBT is expected to be compatible with program system managers turnover training. In FY 1986, the Naval Personnel Research and Development Center (NPRDC) will conduct a feasibility study in the San Diego area to determine if selected | +126                                |        |

### I. <u>Description of Operations Financed</u>.

The Naval Junior Reserve Officer Training Corps (NJROTC) is a youth citizenship program which provides an opportunity for secondary school students to be exposed to the bascic concepts and principles of Naval Science, Seamanship, and associated leadership.

The bulk of Naval Junior Reserve Officer Training Corps Operation and Maintenance, Navy funds are expended for government's share (50%) of salary expenses for five hundred and eleven instructors employed in the Naval Junior Reserve Officer Training Corps program. Additionally, considerable funds are used for administrative, travel, and per diem expenditures. Other expenses include office operating costs for Area Manager, textbooks, training aid/devices, military drill equipment, and unit operating expenses.

Activity Group: Maintenance of Real Property

Budget Activity: 8 - Training, Medical and Other General Personnel Activities

1283g/1-10

### I. Description of Operations Financed.

This program provides maintenance, repair and minor construction of all buildings, structures, grounds and utility systems required at the more than 600 training, medical and personnel support facilities to permit assigned forces and tenants to perform their mission.

The major elements of this program are:

- o Facilities Maintenance finances scheduled, day-to-day recurring maintenance, and emergency service work needed to preserve facilities.
- o Major Repairs provides major repairs necessary to bring existing facilities into adequate condition to support assigned missions.
- o Minor Construction finances the erection, installation or assembly of real property facilities; the addition, extension alteration, conversion or replacement of existing real property facilities; the relocation of real property facilities; and the installation of equipment which becomes part of a facility.

### II. Financial Summary (Dollars in Thousands).

### A. Sub-Activity Group Breakout.

B. <u>Reconciliation of Increases and Decreases</u>

210,157 FY 1985 Current Estimate 2. Pricing Adjustments +6,340 (-467)Civilian Personnel Compensation (Direct) -703 1) US Direct Hire Pay Adjustment 2) Foreign National Direct Hire Pay +6 Adjustment Other Direct Pricing Adjustments +230 Stock Fund (-534)1) Fuel -9 2) Non-Fuel -525 C. Industrial Fund Rates (+2,456)Other Pricing Adjustments (+4,885)+647 3. Functional Program Transfers A. Transfers In (+647)1) Inter-Appropriation a) Expense/Investment Criteria +647 Revision - Amounts transferred from Other Procurement, Navy pursuant to the proposed DoD

4. Program Increases

+6,280

A. One-Time FY 1986 Costs

(+3,770)

+3,462

1) Facilities - Increase reflects deferred projects at the Naval Postgraduate School (\$1,332 thousand) and a significant effort at the Naval Academy (\$2,130 thousand) to identify a credible total backlog of maintenance and repair, and budget resources necessary to effect a real decrease.

initiative for elimination of \$3 thousand investment threshold and adoption of central management criteria as a governing factor.

B. Reconciliation of Increases and Decreases (cont'd)

Work at the Naval Postgraduate School is directed mainly at training facilities with some of the growth for necessary support facilities. Significant among the projects are major mechanical repairs for Root Hall, Spanagel Hall, and Halligan hall.

Projects for the Naval Academy will repair the water distribution system for adequate fire rotection; repair corrosion on primary and secondary electrical feeder lines. without which the Naval Academy cannot operate: correct hazardous effects of asbestos at several Academy locations, by enclosing or removing it: continue structural and roof repairs of Bancroft Hall. the world's largest dormitory (4.8 miles of corridor, 33 acres of floor space); repair the breakwater that protects the anchorage of Yard Patrol and sailing craft; repair deteriorated terrace decks of Michelson Hall, which houses the Division of Mathematics and Science: repair classroom carpeting in Rickover Hall and the Engineering Center; and construct a proper room for preparing vegetables for feeding the 4.525 member Brigade of Midshipmen.

2) Naval Home - Increase required for the following repair and minor construction: overlaying pavements around the Home to avoid complete repaving at a larger dollar cost in 3 or 4 years (pavements are cracked and have sunken areas which require frequent patching and repair); capping

B. Reconciliation of Increases and Decreases (cont'd)

and repairing existing sidewalks to meet new road surfaces (existing sidewalks below street elevation and water stands following each rain); replacing 1,000 feet of chain link fence on southern perimeter with a combination brick and wrought iron fence to remove the institutional appearance that currently exists.

- 3) Deserter Apprehension Program Navy Absentee Collection Unit (NACU)
  Jacksonville was destroyed by fire on 7 February 1984. The new space is an old barracks in need of repair and alteration. Increase of \$64 thousand is a one-time cost for installation of an additional bathroom for female escorts and prisoners, for retiling of floor and providing additional overhead lighting fixtures to provide adequate illumination.
- B. Other Program Growth in FY 1986 (+2,510)

- 1) Beneficial Occupancies The completion of new medical facilities at Terminal Island and Port Hueneme, CA result in new costs. These involve building maintenance due to new control systems.
- 2) Facility Maintenance Backlog Reduction +1,024
  In an effort to meet the Congressional mandated containment of maintenance backlog, these dollar resources are added. At the end of Fiscal Year 1985, the non-deferral backlog in medical and dental facilities totals \$45 million.

B. Reconciliation of Increases and Decreases (cont'd)

+145

- 3) New Computer Assisted Tomography
  Scanners Provides for the third
  incremental introduction of Computer
  Assisted Tomographic Scanners to
  non-teaching hospitals for use as
  diagnostic tools, particularly in
  trauma cases. These resources provide
  installation for the newly procured
  items of equipment.
- Activity Financial Information System Provides funding for the installation of an automated Financial Information System which establishes a collection agent accounting system, interfaces with the Navy's Integrated Disbursing and Accounting System (IDA) and generates standardized activity-based financial management reports. This will strengthen management control by expanding fiscal information availability on a timely basis, allow better tracking of accounts receivable and reduce the amounts receivable due the government.
- 5) Automated Data Processing Unit
  Consolidation Expands the program
  which consolidates Automatic Data
  Processing functions into single
  locations at individual medical
  facilities to optimize use of manpower
  and hardware assets and also avoid
  higher costs of data transmission
  by commercial leased lines.
- Projects These funds represent the primary resources available to address minor construction and special project deficiencies. The current backlog of project deficiencies in this category in the Naval Military Personnel Command now exceeds \$130 million. Increases represent the minimum added support needed to off-set the growth of the project

### B. Reconciliation of Increases and Decreases (cont'd)

backlog. Minor construction and repair project requirements are presently increasing at a rate in excess of current funding levels. A majority of structures represented by the backlog are World War II vintage in varying stages of disrepair, and pose numerous fire, safety, sanitation and program hazards. The maintenance and repair requirements are frequently excessive when compared to modern structures and represent a significant financial demand upon local resources. Failure to fund renovation project deficiencies further accelerates overall deterioration which impacts significantly upon eventual cost requirements and mission performance.

### 5. Program Decreases

-21,351

### A. One-Time FY 1985 Costs

(-6,213)

 NAS Kingsville Runway - Cost to complete the repair of the runway at NAS Kingsville. -4,490

2) Facilities. - Decrease reflects completion of one-time FY 1985 facilities projects at the Naval War College (-\$514 thousand) and Naval Postgraduate School (-\$1,131 thousand). These projects include repairs and alterations to electrical distribution system; repair/resurface roads and parking lots; repair curbing and sidewalks; repair levees; and quality of life improvements to Unaccompanied Officer Personnel Housing.

-1,645

3) Naval Home - Decrease due to completion of the Heating, Ventilating and Air Conditioning Operations (HVAC) maintenance contract which was required to prepare additional floors for occupancy. -8

- B. Reconciliation of Increases and Decreases (cont'd)
  - 4) Computer Assisted Tomography Scanner
    Installation Removes one-time costs
    associated with the installation of
    scanners during Fiscal Year 1985.
- B. Other Program Decreases in FY 1986 (-15,138)
  - 1) Education and Training Reduction -14,900 to stay within overall funding constraints include aviation facilities (\$-6,000 thousand) troop housing and messing (\$-7,200 thousand), and training facilities (\$-1,700 thousand).
  - 2) Chapel Life Extension Program -108
    Reduction reflects the completion of
    the Chapel Life Extension Program (CLEP)
    which was designed to provide for the
    rehabilitation and refurbishment of
    chapels and religious education
    buildings in order to improve
    deteriorated conditions resulting
    from age and lack of proper maintenance.
  - 3) Human Resources Management (HRM) Program -130 Reduction in minor construction due to the completion of the project associated with the upgrade of computer space for Human Resource Management Information Network (HRMP).
- 6. FY 1986 President's Budget Request

### Department of the Navy Operation and Maintenance, Navy Exhibit OP-5

Activity Group: Base Operations

Budget Activity: 8 - Training, Medical and Other General Personnel Activities

1284g/1-24

### I. <u>Description of Operations Financed.</u>

This program provides the base support services and material required at the more than 600 training, medical and personnel support activities to permit assigned forces to perform their mission.

The major elements are:

- <u>Utility Operations</u> Includes operating expenses for purchased electricity, electricity generating plants, purchased steam and hot water, heat plants, utility distribution systems, waste systems, air conditioning and refrigeration plants.
- o <u>Personnel Operations</u> Support required for personnel related functions include expenses for:
  - Bachelor Housing Operations and Furnishings provides support for the operation of barracks and the purchase and maintenance of personnel support equipment related to this housing.
  - Other Personnel Support provides for mess halls, sales activities, laundry and dry cleaning facilities.
  - Morale, Welfare and Recreation provides authorized appropriated fund support for shore based recreation activities.
  - Station Hospitals, Medical and Dental Clinics provides direct and indirect health care costs for Health Care Facilities not under the financial control of the Navy Medical Command.
  - Human Goals provides support for programs which focus on improving organizational and individual effectiveness and the administrative support of the Alcohol and Drug programs.
- o <u>Base Operations Mission</u> Support for those Base Operations functions which are required in direct support of the mission of the base. For example, Fleet Training Support, Logistics Support, etc. Expenses are included for the following functions:

Activity Group: Base Operations (cont'd)

### Description of Operations Financed (con't)

- Retail Supply Operations in addition to standard supply functions, this item includes the procurement, receipt, storage and issue of bulk liquid fuel, including operating aircraft fuel servicing facilities. Additionally, waterfront operations such as handling incoming and outgoing cargo and loading/unloading live ammunition onto and from combatant vessels are included.
- Maintenance of Installation Equipment provides for maintenance of major shore based equipment including: service and miscellaneous craft, construction equipment (non-deployable), weapons, electronics, electronic engineering, and fleet moorings.
- Other Base Services provides for the maintenance and operation of vehicles/other transportation equipment, port services (includes navigational assistance to ships, operation of service craft, degaussing operations, and oil spillage cleanup).
- Station Aircraft Flight Operations includes the cost of petroleum, oil and lubricants (POL) consumed in the operations of aircraft assigned to shore activities. POL costs include oil, lubricants and additives used as inflight consumables.
- Station Aircraft Operations Maintenance includes the cost of consumable supplies, repair parts, replacement of Individual Material Readiness List items, labor and services which have accumulated as a result of organizational and intermediate level maintenance performed on, or in support of, aircraft assigned to shore activities.
- Other Air Operations Support includes flight operation costs not specifically identifiable to Aircraft Flight Operations and Aircraft Operations Maintenance, such as: costs associated with simulator training; target range costs; and ground support equipment and consumable supplies.
- <u>Base Operations Ownership</u> support required at shore bases regardless of type of mission being performed which must be sustained to have a functional base. Expenses are included for the following functions:
  - Other Engineering Support provides Public Works Department administration, engineering services, custodial services, refuse/garbage collection and disposal, snow removal, rental and leasing of real property, and fire protection and fire fighting for Naval activities and their tenants.

#### Description of Operations Financed (con't)

- Administration provides support related to financial/resource management, civilian manpower management, and maintaining military personnel records.
- Automated Data Processing provides analysis programming, equipment rental, operations and maintenance, contractual services and supplies.
- Hazardous Waste Material Handling includes personnel, supplies and training associated with the identification and disposal of hazardous wastes.
- <u>Audiovisual</u> provides supplies and services required for audiovisual support.

#### II. Financial Summary (Dollars in Thousands).

+9.077

+78

A. Transfers In (+9,253)

1) Intra-Appropriation

- a) Military Personnel Information

  System Transfers funding
  responsibility from Commanderin-Chief Pacific Fleet, Budget
  Activity-2, to Chief of Naval
  Education and Training to support
  ADP requirements under the
  MILPERS information systems.
- b) Civilian Personnel Services Transferred from Chief of
  Naval Material/Naval Facilities
  Command Budget Activity 7
  to Naval Education Training
  Center, Newport for support of
  ADP services.
- c) Federal Telephone Service (FTS).

  Prior to FY 1986, the Telecommunications Command (Budget Activity 3) received and paid FTS bills for the U.S. Naval Academy. This transfer was effected for the purpose of consolidating all Naval Academy communications funding under one claimancy and permits the Naval Academy to pay its FTS bills.

- B. Reconciliation of Increases and Decreases (cont'd)
  - 2) Inter-Appropriation
    - a) Expense/Investment Criteria +7,974
      Revision Amounts transferred
      from Other Procurement, Navy to
      Base Operations Support pursuant
      to the proposed DoD initiative
      for elimination of \$3 thousand
      investment threshold and adoption
      of central management criteria as
      a governing factor.

+997

(-176)

- b) Stock Funding of Aviation Depot Level Repairables Change in obligational authority resulting from full-year implementation of AVDLR stock funding initiative, begun 1 April 1985.
- B. Transfers Out
  - 1) Intra-Appropriation
    - a) Joint Manpower Program Transfer of resources from Chief of Naval Education and Training to Chief of Naval Operations, Budget Activity-2, to support administrative function of the Joint Manpower Program.
    - b) Medical Accounting Function -17
      Transferred from Naval Education
      Training Financial Information
      Processing Center, Pensacola to
      Commander-in-Chief, Atlantic fleet,
      Budget Activity-2, to support
      this function.
    - c) Health Record Information -21
      Transfers funding responsibility
      for health record information
      extraction to the Naval Military
      Personnel Command, Budget Activity9, from the Navy Medical Command.
    - d) Authorization and Plant Property -95
      Accounting, Orlando, FL. Transfers
      funding responsibility for accounting
      functions at Orlando, FL to the
      Commander-in-Chief Atlantic Fleet,
      Budget Activity-2, from the Navy
      Medical Command.

O&M,N 8-180

B. Reconciliation of Increases and Decreases (cont'd)

4. Program Increases

+12,924

A. Annualization of FY 1985 Increases

(+678) +234

1) Defense Eligibility Enrollment
Reporting System (DEERS) Operation Annualizes the Fiscal Year 1985
manpower costs to meet the eligibility
checking requirement of dependent and
retired beneficiaries who present
themselves for health care.
Increasing eligibility checking from
the current level is designed to
reduce fraud and abuse.

2) Computer Assisted Tomography Scanners - Provides for the maintenance of Computer Assisted Tomographic Scanners purchased in Fiscal Year 1985.

+70

3) <u>Uniform Chart of Accounts Maintenance</u> - Provides for the maintenance of Uniform Chart of Accounts equipment installed in Fiscal Year 1985.

+374

B. One-Time FY 1986 Costs

venetian blinds.

(+564)

Approximately 20% of the Naval Postgraduate School's Bachelor Officer Quarters(BOQs) and nearly all of the barracks are below minimum habitability standards. To bring these rooms up to acceptable standards will require \$80 thousand to purchase new furniture, reupholster or recondition furnishings which still have a useful life expectancy, and replace broken or missing

- B. Reconciliation of Increases and Decreases (cont'd)
  - 2) Defense Data Network This system replaces discontinued autodin services. Replacement is critical for the timely transmission of Uniform Chart of Accounts, morbidity and other data essential to program and resource management. These funds permit use of the new system at the Naval Medical Data Services Center, Bethesda, MD.

+206

+278

- Deserter Apprehension Program (DAP) -Increase is required for the purchase of two mobile radios for each of the 68 leased vehicles to interface with local enforcement agencies in case of emergencies involving deserters. DAP escorts are performing a function formerly done by the Federal Bureau of Investigation (FBI). They cover a wide territory in transporting deserters, much of it isolated. Everyday these escorts face potential dangers, i.e., medical emergencies, accidents on the road, threat of life (many deserters are suicidal, homicidal, and/or drug abusers and pose a threat to the life of escorts and other prisoners), etc. This one-time cost will fund for proper emergency communication radios to be used as an immediate means of contacting local and state authorities.
- C. Other Program Growth in FY 1986

(+11,682)

1) Standard Medical Supply System Current internal hospital systems,
built on non-standard equipment,
provide no response uniformity, no
management data, and no indicators
of problems. This item provides
automated standard system to insure
that hospital materials are
available in sufficient but nonexcessive quantities. Current
Medical Command equipment is
failing and will not be
supported by manufacture.

B. Reconcilitation of Increases and Decreases (cont'd)

+271

- 2) Activity Financial Information
  System Provides funding for
  implementation in the Medical Command
  of an automated Financial Information
  System which establishes a collection
  agent accounting system, interfaces
  with the Navy's Integrated Disbursing
  and Accounting system (IDA) and
  generates standardized activity-based
  financial management reports. This
  will strengthen management control,
  increase cash flow to the government,
  and reduce the amount of bad debt.
- 3) Biomedical and Facility Maintenance
  Automated Data Processing/Dental
  Management Information Systems These Medical Command systems
  provide for the tracking and
  scheduling of preventive maintenance
  for biomedical and plant equipment.
  Resources allow extension of this
  system to 23 hospitals (+\$89 thousand).
  Prior year slippage requires \$122
  thousand for installation/operation for
  the Dental Management Information
  Systems.
- 4) Automated Data Processing Unit
  Consolidation Supports expandsion of the Medical Command program which consolidates Automated Data Processing functions into single locations at individual facilities to optimize use of manpower and hardware assets. This will avoid higher costs of data transmission by commercial leased lines.

- B. Reconciliation of Increases and Decreases (cont'd)
  - Central Brig The Secretary of the Navy has designated the Chief of Naval Personnel to administer the Navy's correctional facilities. This administration is accomplished through: maintaining the Department of the Navy Corrections Manual; preparing standardized inspection formats for major claimant inspections; conducting on-site visits; providing major claimants with assistance and training in connection with operating a correctional facility; evaluating brigs, detention facilities and correctional custody units functional adequacy; developing and coordinating a system governing transfer of prisoners among military confinement facilities and developing and monitoring training programs for correctional personnel. During the past few years not only has the average sentence become longer and the brig population grown, but also the quantity of data which must be gathered and analysed has increased. This has resulted in a need for additional administrative personnel. These resources will provide salaries for three civilian end strength. These Naval Military Personnel Command positions will provide administrative management of the Navy's correctional facilities and the prisoners within the system.
  - 6) Naval Home (NMPC) During FY 1986, the Naval Home's population will increase by at least 50 residents. Also in FY 1986, one of the Naval Home's floors will be converted to an intermediate care unit. Due to the age of the residents, there is an anticipated increase in the number of residents that have health related disabilities but do not necessitate hospitalization. They require 24-hour health care and

+601

#### B. Reconciliation of Increases and Decreases (cont'd)

other services not extended to the regular residents. The costs for supporting these residents are much higher than the rest of the population of the Home. The following increases are required: additional utilities (electricity, gas, sewage, (+58 thousand); food service and laundry contracts (+212 thousand); communications cost (+3 thousand); custodial, entomology, and garbage collection contracts (+94 thousand); supplies, materials, furniture and equipment for additional residents and expansion of current social work service program and the therapeutic recreation program (+177 thousand); and civilian end strength required for health/recreational services to the additional residents and for a building inspector to manage the aging facility (+57 thousand).

Morale, Welfare and Recreation Support -Increased student enrollment in new and existing programs at the Naval Postgraduate School requires additional funding for minimal additional recreation equipment and services that are essential in a high-pressure academic environment, (CNO +249 thousand). Additionally medical activities require resources to support Chief of Naval Operations quality of life objective to furnish an alternative to substance abuse. The request expands appropriated fund support for MWR efforts by providing equipment and supplies targeted towards athletic programs which will enhance physical fitness and maintenance of "wellness" (+316 thousand).

#### B. Reconciliation of Increases and Decreases (cont'd)

- 8) Base Communications Provides for support for patient appointment system and expanding physical consultation demands in medical activities. Communication systems are essential to efficient hospital operation, patient satisfaction, and quality of care.
- 9) Civilian Substitution of Military
  Billets The Naval Education and
  Training Command freed up 94 military
  billets to higher priority uses.
  Requested funds support 55 civilian
  workyears and overhead that maintains
  necessary training functions.
- 10) UC12B UC12B Aircraft Maintenance +310 Contract increase supports one additional aircraft in FY 1986.
- Boat Overhaul The Chief of Naval +3,688 Education and Training boat inventory directly supports skill training in salvage diving, explosive ordnance disposal, amphibious warfare operations and small boat handling. While there has been no major expansion of training in these boat overhaul program areas the last few years, boat use in continued training was accomplished without benefit of a sustaining maintenance program. The deferral of boat maintenance has caused the backlog to reach the critical stages, thus necessitating the apparent growth in this program.
- 12) Internal Review Provides civilian
  manpower to expand field activity
  internal review capability, meet
  recent vulnerability assessment
  requirements for cash control, and
  allow studies and in-depth analyses
  to achieve efficiency and prevent
  waste in our medical treatment

B. Reconciliation of Increases and Decreases (cont'd)

facilities. The current use of non-dedicated, part-time personnel does not result in the objective nor timely reviews necessary to meet management and oversight needs. This increase provides 16 civilian work-years for 37 civilian personnel in medical activities.

+465 13) Beneficial Occupancies - The completion of new medical facilities at Terminal Island and Port Hueneme. CA result in new costs. These involve utilities (because of incorporated air handling systems), engineering costs (because of the need for janitorial services not previously utilized), and additional communication costs for larger sized facilities with higher patient volumn. In each instance, only additional costs are recognized, since former facility costs offset total requirements. A one-time cost of \$250 thousand is included for movement from the old to the new facilities.

- 14) Medical Construction Support Staff Provides military and civilian medical
  construction liaison office support at
  newly created medical geographic
  commands. Provides for dedicated
  staff support for planning, design, and
  construction liaison for Military
  Construction, Navy projects in order
  to achieve maximum coordination
  during construction. Provides 3
  civilian work-years for 6 civilian
  personnel.
- The Medical Support budget for Fiscal
  Year 1986 contains an increase in
  clinical workload, both medical and
  dental. While major support for that mission
  workload is contained in medical
  activity groups, increased support costs
  in Base Operations areas also occur.
  This increase provides for the additional
  workload in terms of utilities,
  engineering services, equipment repair
  costs, base services, and administration.

- B. Reconciliation of Increases and Decreases (cont'd)
  - 16) Contract Janitorial Services, Dental
    Facilities Provides funding to allow introduction of contract janitorial/ housekeeping services at dental facilities. This will relieve dental technicians who now perform cleaning functions after normal working hours and comply with a Navy Audit Service recommendation to improve technician productivity through increased technical competence.
  - 17) Music Program This increase reflects the cost of utilities for Navy Bands, San Francisco, Fleet Support Unit and Navy Band, Washington. In FY 1986, additional resources are required for the Navy Band, San Francisco utilities for a new bandroom which replaced the one destroyed by heavy rains in FY 1982 and for the Navy Band Fleet Support Unit utilities (NMPC).
- 5. Program Decreases

-2,882

A. One-Time FY 1985 Costs

(-49) -49

+892

+31

- 1) Civilian Personnel Data System Removes one-time cost of set up for
  the new Civilian Personnel Data System
  at the Consolidated Civilian Personnel
  Office, Bethesda, MD. This MEDCOM
  activity serves all Navy activities in
  the Northwest Washington, DC area.
- B. Other Program Decreases in FY 1986
- (-2,833)

-2.833

1) Utilities Savings - Energy cost reductions will be accomplished by increased conservation efforts and practices. This reduction is in keeping with the Navy's conservation goals.

# Department of the Navy Operation and Maintenance, Navy

Budget Activity: Nine - Administration and Associated Activities 1926g/1-4

#### I. Description of Operations Financed.

This program provides for the cost of Department of the Navy administration, service-wide support, manpower management activities, and a number of general and special support programs.

Support for headquarters staffs of the Secretary of the Navy and the Chief of Naval Operations accounts for \$86.9 million of the FY 1986 budget request.

The service-wide support category of \$180.9 million includes \$129.2 million for finance activities and audit service. These activities develop policies and procedures for financial management systems and provide a full range of accounting, disbursing and auditing functions. This category also includes the Naval Data Automation Command, Public Affairs, and the Board of Inspection and Survey (INSURV), Legal and Administrative Activities.

Military and civilian manpower management programs account for \$167.2 million of the FY 1986 budget request. These activities include the headquarters cost of the Chief of Naval Personnel, and support activities which develop staffing standards, document and recommend the optimum use of manpower resources, monitor and promote career development, and distribute officer and enlisted personnel.

General program support includes reimbursement to the General Services Administration for leased office space, payment to the U.S. Postal Service for official mail costs, reimbursement to the Department of Labor for employee and unemployment compensation benefits paid on behalf of the Department of the Navy, and base operations costs. Special programs include White House Helicopter Support, Vice President's Grounds Support and Congressional travel. The FY 1986 budget request for these programs is \$332.2 million.

#### II. Financial Summary (Dollars in Thousands).

#### A. Sub-Activity Group Breakout.

# Department of the Navy Operation and Maintenance, Navy

Activity Group: Secretary of the Navy Staff Offices

Budget Activity: Nine - Administration and Associated Activities

#### I. Description of Operations Financed.

The Under Secretary of the Navy and the Assistant Secretaries are the principal policy advisors and assistants to the Secretary of the Navy for the administration of the affairs of the Department of the Navy. Supported by the office and boards which they supervise, the Civilian Executive Assistants are assigned department—wide responsibility for manpower, material, facilities, shipbuilding and logistics, research and development, business and military law, financial management, and general departmental administration. The funds requested represent the cost of compensation for the civilian professional and clerical work force; the cost of providing administrative support such as travel, office supplies and equipment for military and civilian personnel assigned to the headquarters staff; and miscellaneous administrative costs such as disbursing officer losses, losses in foreign exchange transactions, payments to support the Armed Services Board of Contract Appeals, and costs of printed Congressional material.

4. Program Increases

445

A. Other Program Growth in FY 1986

(445)

1) An increase totaling \$445 thousand is required in connection with the Department of the Navy Office Automation and Communications System (DONOACS), a modernization program to improve the executive and administrative management functions of the Navy Department. The project was established to ensure control over office automation so that a standard, interchangeable system and administrative communications network can be provided to Navy and Marine Corps Headquarters commands. This network will provide integration between what would otherwise be incompatible systems. The increased funds will be used for requirements analyses of Secretariat commands and offices, systems analysis and design for individual systems, and for maintenance costs of newly purchased equipment.

# Department of the Navy Operation & Maintenance, Navy

Activity Group:

Chief of Naval Operations Staff Offices

Budget Activity: Nine - Administration and Associated Activities

#### I. Description of Operations Financed.

The Chief of Naval Operations Staff Offices (OPNAV) are the headquarters staff for the Chief of Naval Operations (CNO). Their overall mission is to advise and assist the CNO in the discharge of his responsibilities as the principal naval advisor and naval executive to the Secretary of the Navy on the conduct of the activities of the Department of the Navy, and as the Navy member of the Joint Chiefs of Staff.

The headquarters is composed of offices which are responsible to the CNO for policy, planning and management control of such responsibilities as administration, intelligence, oceanography, program planning, communications, reconnaissance and surveillance, readiness information, anti-submarine warfare, manpower, logistics, aviation, and research and development. The funds requested represent the cost of support and compensation for personnel assigned to the headquarters staff.

#### B. Reconciliation of Increases and Decreases.

1. FY 1985 Current Estimate \$40,276 2. Pricing Adjustments 27 A. Civilian Personnel Compensation (Direct) (-638) 1) U.S. Direct Hire Pay Adjustment -858 2) Other Direct Pricing Adjustments 220 (-14)B. Stock Fund 1) Non-Fuel -14 C. Other Pricing Adjustments (679)4,816 3. Functional Program Transfers

#### 1) Inter-Appropriation

A. Transfers In

- a) Expense/Investment Criteria Revision - Amounts transferred from Other Procurement, Navy pursuant to the proposed DOD initiative for elimination of \$3 thousand investment threshold and adoption of central management criteria as a governing factor.
- b) Office of Logistics Strategic Sealift - This increase identifies funds to support the Strategic Sealift Division. Functions were transferred from the Military Sealift Command (MSC) to Chief of Naval Operations Staff Offices (OPNAV). The transfer amount includes 6 civilian end strength, travel and support costs.

5,503

Activity Group: Chief of Naval Operations Staff Offices (cont'd)

- B. Reconciliation of Increases and Decreases. (cont'd)
  - 3. Functional Program Transfers (cont'd)
    - B. Transfers Out

(-858)

- 1) Intra-Appropriation
  - a) Transfer to Chief of Naval Material, Budget Activity 7, to fund salary and fringe costs of 6 civilian positions (6 E/S, 6 W/Y) and administrative support costs to realign responsibilities for detailed execution of ship maintenance and modernization programs.

-222

b) Transfer to the Secretary of the Navy, Budget Activity 9 to support salary and fringe costs of 13 civilian positions and administrative support costs to consolidate independent cost analysis functions under the Secretary of the Navy.

-636

4. Program Increases

3,956

A. Annualization of FY 1985 Increases

(148)

1) This increase is the annualization of the FY 1985 cost of establishing the Office of the Oceanographer on the Chief of Naval Operations
Staff. (3 civilian W/Y)

148

B. One-Time FY 1986 Costs

(194)

1) Other Purchased Services - Navy Command Center - This increase provides for construction of armor protected vestibules at

- B. Reconciliation of Increases and Decreases. (cont'd)
  - 4. Program Increases (cont'd)

both entrances to the Navy Command Center to protect high level officials in the event of a terrorist attack. The requirement is based on a classified threat analysis study conducted by the Naval Investigative Service.

160

2) Equipment - This increase is for replenishment of equipment stock. New office machines are needed to replace old and worn out machines declared beyond economical repair. Included in the equipment requirements are 13 typewriters, 15 calculators, 10 overhead projectors, 20 dictating machines and 4 telecopiers.

34

- C. Other Program Growth in FY 1986
- (3,614)
- 1) Printing These funds cover the increase over FY 1985 in the number of changes and revisions necessary for existing publications. An additional 78 changes/reprints will be issued against Communications Tactical (COMTAC) publications (\$410 thousand). An additional 34 changes/reprints will be made against General Publications/Directives and Notices. (\$140 thousand)

550

2) Equipment Maintenance This increase covers additional
funds necessary for equipment
maintenance costs, resulting
from the purchase of word

- B. Reconciliation of Increases and Decreases. (cont'd)
  - Program Increases (cont'd)

processing systems for the Offices of Manpower, Logistics, Naval Medicine, and Command and Control.

151

- 3) Other Purchased Services Increases are in the following areas:
  - a) Integrated Logistics Support (ILS) -This increase expands current efforts which assess weapon systems programs for early and adequate integration of ILS requirements into the planning, programming and budgeting cycle. The combination of more weapon systems requiring review and expanded analytical requirements has increased the level of effort and support required. The Office of the Secretary of Defense has expanded the ILS assessment requirement in FY 1986 requiring more in-depth analyses. In addition, the Office of Logistics in CNO has expanded the number of high cost visibility equipments that have detailed ILS assessments to insure support is integrated with procurement. This increase also supports logistics analysis studies related to logistics war gaming, operational availability (AO) studies and the relation of logistics support to equipment sustainability. (\$1,219 thousand)

Activity Group: Chief of Naval Operations Staff Offices (cont'd)

- B. Reconciliation of Increases and Decreases. (cont'd)
  - 4. Program Increases (cont'd)
    - b) FLAIL Replacement The current ADP system (FLAIL) supporting the Program Objectives Memorandum (POM) will become inoperative in FY-1987. FLAIL uses an internal character code which UNIVAC will cease to support, requiring the Office of Programming Planning to develop new ADP capability to support the POM process. The new system, Navy Headquarters Programming System (NHPS), will incorporate the functions of four existing ADP systems and the Office of Program Planning word processing system into a single integrated programming information base. Funds in FY 1985 supported site preparation and conduit installation. Additional funds are necessary in FY-1986 to provide for application software and maintenance of hardware and software. (\$861 thousand)
    - c) Military/Civilian Integration -This increase supports the development of the Total Force Manpower Management System. The system will provide the necessary analysis to display

- B. Reconciliation of Increases and Decreases.
  - 4. Program Increases (cont'd)

and assess the various manpower resource sponsors in the Program Objectives Memorandum (POM) to effectively manage the shore establishment. Without the increase, the Office of Manpower will be restricted in conducting trade-off analyses between the various manpower resources which are essential for making total force manpower programming decisions. (\$425 thousand)

- d) Military Compensation This increase provides funds to conduct rapid analytical research to determine the impact of recommended changes to the compensation system and to justify Navy Compensation initiatives that will be required to enhance the quality and quantity of the force in future years. This support is necessary to provide timely responses to Congressional and Executive Branch taskings and to implement desired changes in the compensation program structure. (\$218 thousand)
- e) MANTRAPERS This increase supports assessment of long range (5-20 year) manpower and personnel requirements for the active enlisted segment of the Total Force. It also supports detailed execution of the Long Range MPT Strategy planning process and execution of supporting models and data analysis. The capability to conduct detailed long range assessment of active duty enlisted manpower and personnel depends upon this support. (\$190 thousand)

# Department of the Navy Operation and Maintenance, Navy

Activity Group: Navy Finance Activities

Budget Activity: Nine - Administration and Associated Activities

I. Description of Operations Financed.

The Navy Finance Activities perform the following functions:

- A. Centralized Military Pay and Allotment Systems. Design, develop and operate the active duty centralized military pay and allotment systems of the Navy; and perform accrual accounting to provide periodic reports of obligations, disbursements and other related accounting, financial and statistical data.
- B. Inactive Military Pay. Design, develop and operate the retired and fleet reserve pay systems and the Naval Reserve Drill Pay, Naval Reserve Officer Training Corps, Armed Forces Health Scholarship and other reserve pay systems.
- C. <u>Personnel Support Activity</u>. Maintain military personnel and military pay accounts for the region supported, pay military and civilian travel vouchers, and provide passenger transportation services.
- D. Accounting Transactions IDA Operations. Perform authorization accounting activity services and pay vendor invoices in an Integrated Disbursing and Accounting (IDA) project mode, submit accounting reports, and review accuracy of appropriation and cost accounting data.
- E. Fiscal Operations. Prepare check and cash payments for military and civilian payrolls, issue saving bonds, receive and account for miscellaneous cash collections, and prepare various reports of financial transactions for recording on the Navy's central books of accounts.
- F. Accounting Policy and Systems. Formulate and prescribe policies, principles and procedures to be followed in the design, development and operation of financial management systems throughout the Department of the Navy.
- G. <u>Financial Management Improvement</u>. Centrally plan, program, design and execute improvements to the Navy's financial management system under the direction of the Comptroller of the Navy.
- H. Standard Financial Systems. Design, develop, implement, operate and maintain standard Navy financial systems in accordance with applicable Department of the Navy automatic data processing (ADP) standards; provide for equipment and services acquisition; perform contract management; and conduct functional and economic analyses.

# Activity Group: Navy Finance Activities (cont'd)

I. Administration. Provide timely management planning programs, training, comptrollership and overall command direction to ensure effectiveness and efficiency in the operation functions.

# II. Financial Summary (Dollars in Thousands)

### B. Reconciliation of Increases and Decreases (cont'd)

3) Uniform Microcomputer Disbursing System (UMIDS) - Seven work years and \$190 thousand annualizes the FY 1985 increase of 14 civilian positions required to administer UMIDS.

190

B. Other Program Growth in FY 1986

(4,417)

 Integrated Disbursing and Accounting Financial Information Processing System Project - An increase of seven civilian positions and \$3,001 thousand is required for the Integrated Disbursing and Accounting Financial Information Processing System (IDAFIPS) Project.

The principal objective of IDAFIPS is to establish integrated disbursing and accounting data bases at 14 sites, including four overseas sites, that are accessible to fund administering activities.

Implementation of IDAFIPS will result in a reduction in the number of personnel maintaining memorandum records by providing fund administrators with on-line input, update and inquiry capabilities; eliminating duplicate functions performed by disbursing offices and Authorization Accounting Activities (AAAs); better resource utilization at all fund administering activities by providing more timely financial data; and reducing the number of activities maintaining accounting records through consolidation of approximately 224 AAAs into 14 Financial Information Processing Centers and 55 Financial Processing Centers. A total of 407 civilian positions have been decremented from the budget as a result of these efforts.

The increase of seven civilian positions, three work years and \$3,001 thousand is a net of: (1) a decrease of \$2,851 thousand in the cost of interim IDA systems, rental and maintenance, systems analysis, programming costs

B. Reconciliation of Increases and Decreases (cont'd)

and studies; and (2) an increase of one civilian position and \$35 thousand to initiate development of the overseas module of the IDA Financial Information Processing System; \$292 thousand to prepare IDAFMS sites implementation; \$1,061 in ancillary equipment to support FY 1986 and FY 1987 IDAFMS site implementation; six civilian positions and \$1,860 thousand for contract ADP operators and \$2,604 thousand for management of financial information processing centers, communications, utilities, maintenance and other costs essential to the operation of the six financial information processing centers scheduled for installation in FY 1986.

3,001

2) General Review and Approval of Accounting Systems Project (GRASP) - An increase of 21 civilian positions and \$572 thousand is required to support GRASP.

A three-year contract was awarded in June 1984 to assist the DON in upgrading its accounting systems to comply with GAO Title 2 requirements. The contractor is assisting the Navy in developing a new Navy-wide Uniform General Ledger Account Structure to incorporate the new Department of Defense (DQD) Uniform Chart of Accounts (UCA) and related DOD accounting manual requirements.

The increase of 21 civilian positions is necessary to support the incorporation of GRASP requirements into specific Navy systems. Efforts include planned incorporation of the new chart of accounts and other GRASP requirements applicable to accounting for the operating appropriations into the Integrated Disbursing and Accounting Financial Management System.

3) Navy Finance Center, Cleveland Operations -An increase of 81 civilian positions and \$732 thousand is required due to changes in legislation, audit, Navy active, retired and reserve force level changes and quality of life factors.

The Navy Finance Center, Cleveland is responsible for the design, development, maintenance and operation of the active duty centralized

### B. Reconciliation of Increases and Decreases (cont'd)

military pay and allotment systems of the Navy; the retired and fleet reserve pay systems; and the Naval Reserve Drill, Naval Reserve Officer Training Corps, Armed Forces Health Scholarship; and other reserve pay systems.

Specific increases are as follows:

- a) An increase of ten civilian positions and \$82 thousand is required for retired pay customer service to provide better service to the retired community and minimize, timeconsuming Congressional correspondence and letter inquiries.
- b) An increase of eighteen civilian positions and \$183 thousand is required to accommodate retired pay workload growth and New Retired Pay System (NRPS) systems maintenance due to new legislation impacts and required system enhancements.
- c) An increase of twelve civilian positions and \$91 thousand is required to comply initially with the Debt Collection Act of 1982 and process workload attendant to Public Laws 96-253 and 97-346.
- d) An increase of eight civilian positions and \$91 thousand are required for the Sea and Air Mariner (SAM) Program to accommodate the workload growth in SAM without degradation of service to Reserve pay members.
- e) An increase of eight civilian positions and \$86 thousand is required to operate precertification systems for Selective Re-enlistment Bonus (SRB) and Separation Pay to verify pay computations sent from field activities.
- f) An increase of twenty-five civilian positions and \$199 thousand is required to process Board for Correction of Naval Record (BCNR) cases authorized by Public Law 220; indefinite leave cases; workload growths of claims in Aviation Career Incentive Pay and Variable Re-enlistment Bonus; and accommodate the projected growth of active duty military pay accounts based upon approved force levels.

### B. Reconciliation of Increases and Decreases (cont'd)

4) Navy Comptroller Standard Systems Activity (NAVCOMPTSSA) Support Functions - An increase of ten civilian positions and \$112 thousand is required at NAVCOMPTSSA in equal employment opportunity personnel management, budget and accounting, supply and secretarial/typing functional areas. These increases are necessary for overall management of NAVCOMPTSSA. The project areas of NAVCOMPTSSA never have budgeted for general management support requirements and would not be able to contribute to those requirements without detriment to project milestones and cost/savings ratios.

112

#### 5. Program Decreases

-3,792

#### A. Annualization of FY 1985 Decreases

(-28)

 Pay and Personnel Source Data System - A decrease of one work year and \$28 thousand in the Personnel and Pay Source Data System annualizes the FY 1985 decrease of three civilian positions.

-28

### B. Other Program Decreases in FY 1986

(-3,764)

1) Efficiency Review Savings - A decrease of five civilian positions and \$76 thousand through Efficiency Review savings.

-76

2) Pay Delivery Systems - Program decrease of \$86 thousand in travel, \$81 thousand in communications, \$4 thousand in equipment maintenance and \$1,452 thousand in contractor support.

-1,623

3) Navy Finance Center, Cleveland Mission Operations - A decrease of \$1,406 thousand in Navy Finance Center mission operations is due to the purchase of leased equipment (\$1,197 thousand), and the reduced requirements for: computer output microfiche support services (\$122 thousand), supplies and equipment (\$8 thousand), equipment maintenance costs (\$51 thousand), standard level user charges (\$14 thousand), and leased terminal costs related to the conversion of the Navy Civilian Manpower Information System to the Navy Civilian Personnel Data System (\$14 thousand).

-1,406

- B. Reconciliation of Increases and Decreases (cont'd)
  - 4) Navy Standard Civilian Payroll System Project (NAVSCIPS) - A decrease of \$49 thousand in NAVSCIPS.

NAVSCIPS is tasked with achieving a standard Department of the Navy civilian payroll system to enhance productivity and reduce support costs. It directly supports the Reform '88 Personnel/Payroll Project by replacing ten payroll systems currently used by the Department of the Navy with a single, standard system.

The decrease of \$49 thousand is a net of \$859 thousand in decreases and \$810 thousand in increases. The decreases are due primarily to a decline in developing and testing applications software and completion of the interface programming effort. The increase of \$810 thousand is required to support full year funding of telecommunications and maintenance costs associated with systems being installed in FY 1985; and costs for installation, software, telecommunications and other associated costs for additional sites in FY 1986.

- 49

5) Personnel and Pay Systems Consolidated Computer Center (PERSPAY) Program - A decrease of \$610 thousand in PERSPAY.

The PERSPAY consolidates the automatic data processing facilities of the Navy Finance Center, Cleveland (NAVFINCEN) and the Naval Military Personnel Command (NMPC); provides the technological baseline for all of Navy's large scale personnel and pay systems through FY 1989; and provides a facility which will enable the personnel and pay systems to be synchronized and operated in an efficient and effective mode.

The decrease in the PERSPAY Program is a net of \$3,851 thousand in decreases and \$3,241 thouand in increases. The decrease is associated with a drawdown in transitional staff; reduction in automatic data processing equipment (ADPE) rental and maintenance costs due to the purchase of ADPE at the consolidated

B. Reconciliation of Increases and Decreases (cont'd)

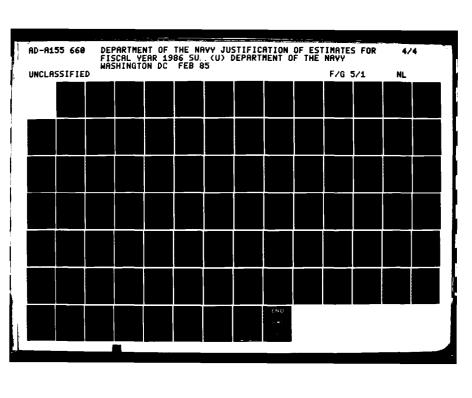

computer center; and reduced technical support requirements. The increase is required for permanent staffing to properly support the consolidated computer center ADPE, maintenance costs associated with the annualization of FY 1985 ADPE deliveries and scheduled FY 1986 ADPE deliveries and miscellaneous support costs.

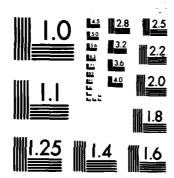

The increase of 42 civilian positions for permanent staffing at the CDC, coupled with a pending functional transfer from the Naval Military Personnel Command (NMPC), will bring the Consolidated Center civilian and military personnel staffing to a level which, according to a consultant study, a data center of comparable size and complexity in the private sector would require.

# Department of the Navy Operation and Maintenance, Navy

Activity Group: Naval Audit Service

Budget Activity: Nine-Administration and Associated Activities

### I. Description of Operations Financed.

The Naval Audit Service received its statutory authority through the Naval Security Act Amendments of 1940 and the Budget and Accounting Procedures Act of 1950. The mission of the Audit Service is to conduct internal audits within the Department of the Navy. Audits of Navy and Marine Corps activities, programs, systems and functions are performed to evaluate management efficiency and effectiveness; to assess the adequacy of internal controls over all funds, property, and other assets of the Department; and to ensure accountability for all funds, property, and assets.

Audits are classified into three broad categories:

- Multi-location: Includes audits providing coverage of a program, problem, subject area or function performed concurrently at several activities to achieve a regional or service-wide assessment of performance trends and accomplishments.
- Activity (Field): Includes audits of one or more functions or activities performed at a single location.
- Special Purpose: Includes audits of commercial activities programs, unannounced disbursing audits, nonappropriated fund audits, and assist and request audits provided to various Navy commands and other government agencies.

More than 700 major Navy and Marine Corps activities, 1300 small activities, 150 computerized systems, 500 commercial or industrial studies and numerous programs, problems and subject areas are audited each year. The Naval Audit Service has its Headquarters in Washington, DC and regional offices in San Diego, CA; Virginia Beach, VA; Washington, DC; and, Camden, NJ.

### Activity Group: Naval Audit Service (cont'd)

#### B. Reconcilation of Increases and Decreases.

1. FY 1985 Current Estimate \$24,601

2. Pricing Adjustment -745

A. Civilian Personnel Compensation (Direct) (-811)
1) US Direct Hire Pay Adjustment -937
2) Other Direct Pricing Adjustments 126

B. Industrial Fund Rates (-5)

C. Other Pricing Adjustments (71)

3. Functional Program Transfers 652

A. Transfers In (652)

1) Inter-Appropriation
Expense/Investment Criteria
Revision - Amounts transferred
from Other Procurement, Navy
pursuant to the proposed Department of Defense initiative for
elimination of the \$3 thousand
investment threshold and adoption
of central management criteria as
a governing factor.

Program Increases 1,838

A. Other Program Growth in FY 1986 (1.838)

1) An increase of 30 end-strength, fifteen workyears, and associated travel and personnel relocation costs is required for special programs. These programs include audits requested by the Department of Defense (DOD) Inspector General, the principal advisor to the Secretary of Defense (SECDEF) on matters ensuring integrity and efficiency in DOD programs; audits to assist the Naval Investigative Service and DOD Inspector General in cases requiring audit expertise in areas of finanical management, supply, contracting, procurement, and disbursing; follow-up requirements for audit recommendations as required by DOD; and, major audits requested by the Chief of Naval Operations.

819

652

O&M,N 9-33 Activity Group: Naval Audit Service (cont'd)

### B. Reconciliation of Increases and Decreases (cont'd)

- (2) An increase of 21 workyears is required to meet increased workload associated with Automatic Data Processing (ADP) functions, finanical management systems, internal control reviews, and expanded efforts in activity (field) audits. The additional workyears will enable the Audit Service to conduct additional scheduled audits within required timeframes, achieve audit expertise in technical areas such as ADP. increase emphasis on internal control reviews, and provide Navy and Marine Corps managers with better audit products.
- (3) An increase of \$344 thousand is required to enable the Audit Service to apply state-of-the-art ADP technology to the performance of its mission. Funds totaling \$215 thousand are required to expand and upgrade the current management information capabilities of the Audit Service. These costs include the purchase of additional timesharing support from the National Institutes of Health, two Wang microcomputers, modems, and software to meet a variety of statistical and graphic requirements. An increase of \$129 thousand is required for training (both classroom and self-instructional) that will develop the skills and knowledge necessary to apply microcomputer technology to the audit function and derive the maximum benefit from it. This action is consistent with the report of the President's Council on Integrity and Efficiency to increase the use of microcomputers in audit activities.

5. FY 1986 President's Budget Request

\$26,346

Activity Group: Naval Audit Service (cont'd)

### III. Performance Criteria and Evaluation

The Table below shows the funds and military and civilian workyears required to carry out the Naval Audit Service Annual Audit Plan. Workyears reflect not only direct audit effort but also indirect support requirements. Fluctuations in the distribution of workyears between audit categories occur because of shifts in planned efforts. For example, planned Multi-location audits decreased by 68 workyears from FY 1984 to FY 1985. This decrease was offset by an increase in planned Activity (field) and Special Purpose audits.

|   | FY 1        | 984       | FY 19      | 85        | FY 1986    |           |
|---|-------------|-----------|------------|-----------|------------|-----------|
| Categories  | Workyears   |           | Workyears  | (\$000)   | Workyears  | (\$000)   |
| Multi-location  | 174         | 7,003     | 106        | 4,282     | 107        | 4,322     |
| Activity (field)  |             |           |            |           |            |           |

#### Department of the Navy Operation & Maintenance, Navy

Activity Group: Naval Data Automation Command

Budget Activity: Nine - Administration and Associated Activities

#### I. Description of Operations Financed.

The Naval Data Automation Command (NAVDAC), located in Washington, D.C., exercises operational direction, and technical management and control over the Navy's information systems management program. NAVDAC's mission includes acting as activity group manager for the Navy industrial funded Navy Regional Data Automation Centers (NARDACs) and Navy Data Automation Facilities (NAVDAFs) which provide regional Automatic Data Processing (ADP) services to Navy activities. In addition, this Command is the principal staff support and coordination authority for the Assistant Secretary of the Navy (Financial Management), who is the Senior ADP Policy Official for the Chief of Naval Operations (CNO), and the Director, Information Systems Division in carrying out the Department of the Navy (DON) responsibilities for data automation, including formulation and implementation of ADP policies and procedures.

The NAVDAC staff is composed of following directorates:

Systems Evaluation Policy and Acquisition Directorate - Supports the Commander, NAVDAC, CNO, and the Senior ADP Policy Official through review and evaluation of Automated Information Systems Life Cycle Management Plans and ADP equipment acquisition requests.

Systems Software, Telecommunications and Standards Directorate - Controls ADP system software through the review and approval of requests for specific software and computer languages.

Computer Program Development Directorate - Manages development and implementation of policies, procedures and guidelines relative to applications software engineering and quality assurance, and provides technical guidance in application software and supporting technology areas to all Navy ADP activities.

Computer Systems Operations Directorate - Provides technical direction for computer systems operations Navy-wide and develops policies, plans, standards and procedures governing establishment, growth and management of the Navy's non-tactical data processing installations.

Plans, Resources, and Support Operations Directorate - Develops DON information systems concepts and objectives into time-phased resource requirements, and formulates major policy on all aspects of Navy information systems management.

Activity Group: Naval Data Automation Command (cont'd)

#### I. Description of Operations Financed. (Continued)

Command Staff, Comptroller and Administration - Provides the full range of managerial support for the command, including development of uniform administrative policies and procedures, control and routing of correspondence, preparation of the Navy POM, control of manpower and operating budgets, review and markup of the Navy-wide ADP budget and preparation and submission of the ADP budget to Secretary of Defense/OMB and Congress.

#### Department of the Navy Operation and Maintenance, Navy

Activity Group: Public Affairs

Budget Activity: Nine - Administration and Associated Activities

1916g/1-2

#### I. Description of Operations Financed.

Public Affairs is a command function which includes all responsibility for contracts with the public and the effect of these contracts on the Navy, evaluation of public opinion and consideration of it in formulating and administering Navy policy, dissemination of information about the Navy in the United States and overseas, and actions taken to promote understanding of the Navy and its many programs and activities.

The purpose of external public affairs is to make available accurate and timely information about the Navy so that members of the general public, the media and Congress may understand and assess the Navy's programs, operations, and needs. Additional functions are Community Relations activities undertaken to foster a spirit of mutual friendship and cooperation with the Navy and people, organizations, and communities in the United States and overseas. Included is the requirement to provide information in accordance with the Freedom of Information and Privacy Acts.

Funds provide for operation of public affairs staffs for major Navy commands, including the Secretary of the Navy and the Chief of Naval Operations, geographically dispersed field activities and the Overseas Community Relations Program.

Public Affairs operations include: assisting officials of the Navy and Department of Defense in answering queries by various news media, Congress, and the public on local, national and international operations, activities and actions of the Navy; determining those Navy programs and operations which will be of interest to various publics, and developing public affairs plans and programs for release of information; maintaining photos of Navy units and newsworthy operations, furnishing the photos on request to news media representatives and the public; providing stock movie footage and "featurettes" on Navy activities to requesting media outlets, schools and organizations; providing assistance, advice, and materials to commercial radio, television, and motion picture producers, and providing guidance to the Recruiting Command's public affairs and advertising campaigns to ensure compliance with Congressional and Executive Branch policy. The Overseas Community relations Program supports miscellaneous expenses in support of community relations projects such as repair of schools, orphanages and hospitals, minor expenses for organized group participation in local celebrations of festivities, and other materials required to promote and enhance overseas community relations.

#### Department of the Navy Operation and Maintenance, Navy

Activity Group: <u>INSURV, Legal and Administrative Activities</u>
Budget Activity: <u>Nine-Administration and Associated Activities</u>

1903g/1-9

### I. Description of Operations Financed.

This activity group finances the operations of several diverse administrative functions. The activities included are the Board of Inspection and Survey (INSURV), the Naval Safety Center (NAVSAFECEN), the Naval Historical Center (NAVHISTCEN), operating cost of historical ships, the OPNAV Support Activity, the Naval Legal Service Offices (NAVLEGSVCOFF), and field activities of the Judge Advocate General (JAG).

The INSURV conducts trials of ships, service craft and aircraft to determine the adequacy of construction and suitability for the intended purpose, and makes recommendations for acceptance by the Navy. INSURV also conducts surveys and recommends disposition of ships and service craft that are considered to be worn beyond economical repair or, because of obsolescence, to be beyond economical repair and modernization.

The NAVSAFECEN promotes and monitors safety to reduce the incidence of accidents. Safety programs fall into four major categories: aviation safety, submarine safety, surface ship safety, and occupational safety and health. The Safety Center administers a reporting system for collection, analysis, evaluation and publication of accident data; maintains a repository for accident reports; exchanges ideas and information on safety with Navy commands and other government and private agencies to help identify problem areas and correct deficiencies; produces, reviews and edits material for technical and other publications; conducts safety surveys and accident investigations to gather information which is used to recommend policy changes or formulation of new policy; and assists in development and administration of Navy-wide accident prevention programs.

The NAVHISTCEN provides a center for naval historical activities; operates the Navy Department Library; operates the archives for naval operational and other selected records; manages the collection, preservation, exhibition and distribution of objects of historical interest; provides historical information services; and carries out other historical activities. The center is organized into several branches including the Navy Memorial Museum, the Navy Department Library, the Operational Archives Branch, the Curator Branch, the Historical Research Branch, the Ship's Histories Branch, and the Administrative and Fiscal Branch.

The Historical Ships Program provides resources to maintain and display the USS Constitution and the USS Nautilus. The USS Constitution serves the nation in a commissioned status as the centerpiece in the Boston National Historical Park. The USS Nautilus will be established as a national monument at the United States Naval Submarine Base, Groton, Connecticut.

The OPNAV Support Activity performs functions of an operational nature that support the Chief of Naval Operations Staff offices. Costs include travel, office supplies and equipment, and salaries of the civilian professional and clerical staff.

NAVLEGSVCOFF and detachments provide legal services and counsel in a given geographical area. Services include assigning judge advocates for any command legal matter including, but not limited to, military justice, conducting investigations, adjudicating claims, and providing legal assistance. Operating costs of the 22 NALEGSVCOFFS and 18 detachments are primarily civilian salaries and general administrative expenses.

JAG field offices provide legal support in military and administrative law, excluding business and commercial law. These offices process and review court-martial cases, provide officers as Government and defense counsel, provide certified military judges, provide legal services for implementation of the Status of Forces Agreement relating to the exercise of criminal jurisdiction and processing of claims in Italy, and provide legal services to the Navy in the area of civilian law (ie., international law, administrative law, admiralty, civil litigation and claims). This activity group supports the administrative costs of civilian personnel, travel and supplies for the Navy-Marine Corps Appellate Review Activity, the United States Navy-Marine Corps Trial Judiciary, the United States Sending State Office for Italy, and the Naval Civil Law Support Activity.

  - B. Other Program Growth in FY 1986 (cont'd)
    - 3) Additional funds are required to reimburse the Navy Regional Data Automation Center (NARDAC), Washington, D.C. for ADP support provided to the Chief of Naval Operations. Beginning in FY 1986 NARDAC will charge customers for NIF civilian leave liability costs and common services support such as civilian payroll services.

973

4) Funding is required to upgrade the Naval Aircraft Inventory Management System (NAIMS). NAIMS contains data on the disposition of the entire Navy aircraft inventory by bureau number. This data is the starting point in the development of force projections that are the basis for the Max Operating Sheet, AII Exhibits, AVII Exhibits, Aircraft Program Data File, Ships and Aircraft Statistical Data Tables, Flying Hour Program, Navy Cost Information System, Aircraft Attrition Rates, replenishable spare parts purchase, Aircraft Rework Planning, Personnel and Training Planning, and numerous other reports that support decision making and development of planning. programming and budgeting documentation. The current system is a sequential batch designed process that can only run at night because of adverse processing impact on other Navy systems running on NARDAC computers. The system is inflexible, and managers face delays in obtaining important information. The new system will be a time sharing, demand teleprocessing system with off-line real time capability.

    - 5) The Office of Naval Air Warfare is responsible for developing Instrument Flight Procedures, obstacle clearance areas, obstacle plotting, airport layouts and air navigation sittings. These instructions and charts are necessary to safely land and take off from Navy air fields. An automated system is required to efficiently and accurately update, store and distribute the approximately 7600 charts and instructions. This system will provide timely updates for more accurate and current information.

250

6) Four civilian end strength are required for development and operation of the Navy Legal Service Management Information System.

104

7) Four civilian end strength, equipment maintenance and material resources are required to accommodate increased workload associated with the Military Justice Act of 1983. These resources will also support trial and defense counsel assistance programs within the Department of the Navy.

160

8) Three civilian end strength, equipment maintenance and material resources are required to meet increased responsibilities at the Naval Civil Law Support Activity. These requirements are associated with Office of Management and Budget, Secretary of the Navy and Chief of Naval Operations initiatives in the areas of hazardous substance litigation, internal control, integrity and efficiency, Occupational Safety and Health programs, and other areas.

### **OPNAVSUPPORT Activity**

The OPNAV Support Activity was established to ensure that functions performed by the Chief of Naval Operations (CNO) Staff Offices are dedicated toward responsibilities assigned to the CNO by the Secretary of the Navy. Functions of an operational nature that support the CNO Staff Offices as an organizational entity are, where appropriate and effective, assigned to a lower echelon activity. The OPNAV Support Activity performs those functions which are predominantly headquarters support in nature.

# Department of the Navy Operation and Maintenance, Navy

Activity Group: Manpower Management Headquarters

Budget Activity: Nine - Administration and Associated Activities

- I. <u>Description of Operations Financed</u>. This activity group provides resources in support of the Naval Civilian Personnel Command (NCPC) Headquarters. NCPC Headquarters is responsible for implementing civilian personnel and equal employment opportunity policy for the Chief of Naval Operations (CNO); directing certain centralized Navy-wide civilian personnel services or programs as assigned; evaluating the Department of the Navy's (DON) Personnel Management Programs; monitoring and reviewing application of the provisions of Civilian Personnel Instruction (CPI) 250 (Organization for Personnel Management at the activity level); and exercising direction over the Field Regions in the performance of their missions. This activity group provides for the following programs and functions:
- A. Equal Employment Opportunity (EEO) Program Develops and manages a comprehensive EEO Program for NCPC, assists each activity in developing and maintaining an effective EEO program and provides overall management of the EEO complaints investigation system.
- B. <u>Labor and Employee Relations</u> Provides experienced negotiators to insure management talent is equal to that of labor organizations. Provides guidance and assistance to activities on labor and employee relations matters and the Incentive Awards Program.
- C. Personnel Management Evaluation Provides a system for evaluating DON's Personnel Management Program.
- D. Employment and Classification Provides advice and guidance on matters pertaining to employment and classification programs; develops and disseminates guides on the application of employment and classification policy and program requirements to operational situations; classifies all DON civilian personnel officer and principal classifier positions; and adjudicates all classification appeals (GS-13 and above).
- E. <u>Personnel Security</u> Develops directives for the Civilian Personnel Security Program Navy-wide. NCPC makes centralized security determinations for the granting of security clearances and eligibility to occupy sensitive positions for Navy and Marine Corps civilian personnel.
- F. Management Information Systems The Navy Civilian Personnel Data System (NCPDS) Project Management Office at Headquarters is responsible for managing the implementation of NCPDS throughout DON to support civilian personnel and EEO policy as well as providing management and overall personnel program direction to the NCPDS Center at Randolph Air Force Base, San Antonio, TX.

- G. <u>European Field Office</u> Serves as the Chief of Naval Operations (CNO) representative for civilian personnel matters in the European area. Serves as the Secretary of the Navy representative for designated programs and provides delivery of the full range of personnel management services to civilian Naval personnel in Europe and Bahrain. Serves as command civilian personnel officer for the Commander-in-Chief, U.S. Naval Forces, Europe with responsibility for subordinate personnel offices.
- H. Other Functions Other functions performed are Command Inspector, Administration, Legal Counsel and Financial Management.

| Α. | Civilian | 78      | 78      | 78      |
|    | USDH     | 78      | 78      | 78      |

# Department of the Navy Operation and Maintenance, Navy

Activity Group: Naval Military Personnel Command (NMPC)

Budget Activity: Nine - Adminstration and Associated Activities

### I. Description of Operations Financed.

This activity group provides resources in support of officer and enlisted personnel distribution, career development, personnel administration and other functions in support of the Chief of Naval Personnel. Such functions include: operation of automated military manpower and personnel management information systems; administration of centralized morale, welfare and recreation efforts; administration of drug and alcohol abuse prevention efforts; monitoring of the operation of a detention center and absentee collection units; budgeting and accounting for the Military Personnel, Navy (MPN) appropriation, Training and Administration of Naval Reserve (TAR) portion of the Reserve Personnel, Navy (RPN) appropriation and Navy's portion of the Retired Pay, Defense (RPD) appropriation. The following are major components within NMPC:

- A. The Management Information System (MIS) Program supports the Deputy Chief of Naval Operations for Manpower, Personnel and Training/Chief of Naval Personnel mission requirements for Total Force Management by collecting, maintaining and reporting factual data about manpower and personnel. Distribution systems provide processing and management information support to the officer and enlisted distribution divisions.
- B. The Data Resource Management (DRM) Program improves the quality of manpower, personnel and training (MPT) data; registers and standardizes data elements; and improves response to management's needs for information through data design and modeling. DRM is developing a data element and information resource directory and is producing plans, policies, assessments and techniques for Manpower, Personnel and Training Information Systems (MAPTIS). DRM will enhance productivity through data management, ensure consistency of data elements and improve integration among MAPTIS.
- C. The Source Data System (SDS) is being implemented to provide automated support to the world-wide network of Personnel Support Activities and Personnel Support Detachments. SDS will assist in the performance of field level pay and personnel functions by decreasing deficiencies in data reporting and information management. It will also provide timely and accurate reporting to Navy's central personnel systems under NMPC. SDS software will also maintain synchronization between field and central data bases.
- D. The Navy Automated Civilian Management Information System (NACMIS) provides a central data base system designed to improve the accuracy and timeliness of civilian manpower information. The program provides automated support to local civilian personnel offices (CPOs) and to all levels of Navy management, including interfaces to federal agencies other than Navy. NACMIS also supplies automated support in the areas of employment, training, litigation, demographics and performance appraisal. NACMIS is comprised of three major portions: Naval headquarters systems; NACMIS I, which currently supports CPOs; and Navy Civilian Personnel Data System (NCPDS) which will replace NACMIS I and encompass all headquarters and field systems.

- E. The Decision Support System (DSS) provides manpower, personnel and training (MPT) managers with automated models on personnel projections and allocations, goal and recruiting modeling, policy analysis, economic analysis, policy execution and personnel management/distribution. DSS provides support for planning and budgeting of critical manpower requirements of such programs as Selective Re-enlistment Bonus (SRB), Career Re-enlistment Objectives (CREO), Class "A" School Plans and Military Personnel, Navy (MPN) budget models. The Navy Manpower Planning System (NAMPS) provides alternative plans and policies based on manpower requirements and constraints. Additionally, NAMPS provides managers with manpower and training requirement determinations for total force manning of ships, squadrons and shore activities under current conditions, reserve augmentation, mobilization or other wartime scenarios.
- F. The Real-Time Automated Personnel Identification Data System (RAPIDS) finances the development of a more secure identification card system to eliminate fraud and waste in the benefits programs provided to the Armed Services. Navy is designated the executive agent for world-wide project implementation. The proposed system will use an embossed electrically readable identification card. RAPIDS will interface with the Defense Enrollment Eligibility Reporting System (DEERS) to verify eligibility status for military medical care, exchange and commissary privileges.
- G. The Military Personnel Records System (MPRS) controls and administers the personnel records of all current and former members of the Navy and Naval Reserve. This automated system maintains and updates the military personnel records in a microfiche format and then distributes the records to authorized users.
- H. The Pay and Personnel Administrative Support System (PASS) provides Personnel Support Activities and Personnel Support Detachments with automated pay, personnel and transportation support world-wide. This program utilizes interim word processing equipment pending implementation of the Source Data System (SDS). The Electronic Reservation and Ticketing Service (ERTS) is used to reduce Navy-wide travel costs through the leasing of electronic reservation and ticketing equipment. This equipment is located in the PASS offices and allows Navy Passenger Transporation Offices to make reservations and issue tickets at the least expensive rate.
- I. The Navy Occupational Development and Analysis Center (NODAC) collects and analyzes occupational data to support Navy manpower management, personnel administration and training programs. This data is used in specifying occupational skill requirements and in the development and revision of personnel classification systems and career structures. This categorization facilitates the updating of Navy advancement examinations, training course curriculum, rate training manuals, Navy correspondence courses and supports the Rating Review/Navy Enlisted Occupational Classification System (NEOCS) Board.

- II. Financial Summary (Dollars in Thousands).
  - A. <u>Sub-Activity Group Breakout</u>.

| Budget Appro- Current Budget FY 1984 Request priation Estimate Request Change |  | FY 1989 | • | FY 1986 |        |

+6,670

A. Transfers In

(+6,670)

1) Intra-Appropriation

(+21)

a) Functional transfer of one civilian end strength from Naval Medical Command in support of military health and dental record information.

+21

2) Inter-Appropriation

(+6,649)

a) Expense/Investment Criteria Revision Amounts transferred from Other Procurement, Navy pursuant to the proposed DoD
initiative for elimination of \$3 thousand
investment threshold and adoption of
central management criteria as a governing factor.

+6,649

B. Reconciliation of Increases and Decreases (cont'd).

4. Program Increases

+20,715

A. Annualization of FY 1985 Increases

(+1.898)

Annualization of salaries and benefits for additional end strength to support the Source Data System (SDS) network, develop and implement SDS afloat modules and deferred requirements such as payday processing, enlisted orderwriting, PCS transfer support, reserves, and mobilization while maintaining existing software releases. Funds also support increased end strength for Data Resource Management (DRM) planning, standard and policy development, Manpower, Personnel and Training (MPT) functional analysis, data modeling, error research functions and the Manpower, Personnel and Training Information System (MAPTIS) effort to identify and resolve system interface problems at the data element level.

+276

2) Increase is for full year maintenance costs for computer equipment purchased in FY 1985 to support Management Information Systems, Distribution Systems, Navy Occupational Development and Analysis Center, Navy Civilian Personnel Data System (NCPDS) and Real-Time Automated Personnel Identification Data System (RAPIDS).

+1,622

B. One-Time FY 1986 Costs

(+250)

- 1) The General Services Administration (GSA) will conduct studies for the Source Data System (SDS) under the GSA contract services program. The studies are to determine telecommunication alternatives for SDS afloat and ashore and the most expedient and effective way to provide management analysis/documentation of SDS' processing center staffing and operations.
- C. Other Program Growth in FY 1986

(+18,567)

1) Management Information System (MIS)-MIS collects, maintains and reports factual data about manpower and personnel and supports the distribution of military personnel to all shore and fleet activities.

O&M,N 9-60

- B. Reconciliation of Increases and Decreases (cont'd).
  - a) A major effort within MIS is the Personnel and Pay (PERSPAY) project which will establish a consolidated data processing facility to support the mission requirements of both the NMPC, Washington, D.C. and the Navy Finance Center (NAVFINCEN), Cleveland, OH. This arrangement results from General Accounting Office and Congressional directions to consolidate Navy's military pay and personnel data bases. The immediate objective is to provide a transition of all user specified application systems to the consolidated data center's automated data processing equipment (ADPE) without degradation to performance. When consolidation is completed, all NMPC and NAVFINCEN workload will have migrated to the Consolidated Data Center (CDC) at Cleveland.

Funding is required to support the migration of Personnel and Pay (PERPAY) System functions to the Navy Finance Center, Cleveland. Increase provides for contractor assistance to plan and monitor workload migration to the CDC computers in Cleveland. Also, the CORE Software Systems Division has been tasked with overseeing procurement of all micro, mini and mainframe computers under the cognizance of the Chief of Naval Personnel. The creation of a Technical Assessment and Support Center within the CORE Software Systems Division is an efficient method to accomplish the task. This center will evaluate requirements for computers, provide recommendations of hardware/software and support to the hardware once it is installed. The center is expected to eliminate the acquisition of all non-compatible computers and replace those in existence with computers that are compatible and able to tie into a Local Area Network.

B. Reconciliation of Increases and Decreases (cont'd).

The center will consolidate technical design and support to the users of distributed systems.

+470

Additional resources are required to provide maintenance of operating system software on the existing IBM 3033 installed at NMPC and on the new secure processor. Increase will also provide maintenance of operating software on the IBM 3705 Communications Processor to ensure compatibility with the IBM 3081 located in Cleveland. The operating system on the IBM 3081s installed at the Consolidated Data Center (CDC) is maintained by Navy Finance Center, although pre and post processing will be accomplished by the NMPC computers. Additional funding is also required for the NMPC Configuration Management Program. This includes independent testing and validation of new and converted Automated Information Systems (AISs), quality assurance/change control, automatic data processing security and implementation of the Internal Controls Management and Technical Reference System.

+1.688

b) Additional funding is required for Data Communications Baselines and Inventory Traffic Analysis (Telecommunications Design) to support planning for NMPC to transition to the Defense Data Network (DDN). Although there is a mandatory requirement to use the DDN, it's not widely available. A provisional waiver was granted during the transition period until NMPC systems become compatible with the DDN. Naval Ocean Systems Center (NAVOCEANSYSCEN) currently provides telecommunication strategy interface definition, DDN liaison and user requirements data base (all required for a DDN waiver). Additional funds will provide for growth in these areas as well as site surveys, design and implementation. NAVOCEANSYSCEN will also continue Data Communication Plan designs and support of the NMPC Local Area Network.

+876

- B. Reconciliation of Increases and Decreases (cont'd).
  - c) Resources required for continued redesign of Inactive Manpower and Personnel Information System (IMAPMIS) to support the increased emphasis on the Naval Reserve Program with regard to readiness and mobilization. Increase also supports additional data communications lines between NMPC and Enlisted Personnel Management Center (EPMAC), New Orleans and additional technical training.
  - Data Resource Management (DRM) DRM improves the quality of manpower, personnel and training data, registers and standardizes data elements and improves response to management's needs for information through data design and modeling. Resources provide assistance to systematically analyze and diagnose data problems and the impact of input and validate and update contents of the Data and Information Resource Directory (DIRD). Funds also support the development of information and data architecture and the reduction of data redundancies through logical data design and modeling. +1,835
  - Decision Support System (DSS) DSS provides
    DSS provides Manpower, Personnel and Training
    (MPT) managers with economic and cost/
    benefit analyses of alternative programs
    and policies which require automatic data
    processing resource management decisions
    pertaining to the development of MPT
    Automated Information Systems (AISs).
    The following projects reflect program
    increases:
    - a) Incorporation of reserve force into the Total Force concept by reserve strength planners is a Congressionally directed issue. This effort includes the redesign of each of the many MPT planning computer models to include reserve data. These active duty models will be modified to include the historical data files and tracking mechanisms used by reserve planners for managing reserve forces. This effort effectively eliminates the need for

B. Reconciliation of Increases and Decreases (cont'd).

separate reserve force computer models and data bases, and is the initial step toward converting existing computer models to fit the total forces manpower management concept. Additional increases are due to further needed enhancements to the Advancement Inventory (ADIN) model and the decision to migrate the model to the inhouse Consolidated Data Center (CDC). A six month delay in the conversion of the Force Analysis Simulation System (FAST) to CDC has resulted in additional timesharing costs.

+540

b) Total Force Manpower Management Information System (TFMMS) is a new initiative to consolidate manpower requirements and authorizations into a single data base. The Department of the Navy (DON) has numerous operational manpower systems that have been developed independently to support unique user requirements. These systems cannot interface with one another. However, system modifications are being made to some of the key manpower information systems to improve the data/information. These modifications will provide the Navy with an early capability to begin to assess the various military resources required to make tradeoff decisions between active military and selected reserve manpower. To more effectively maintain, track and correlate manpower requirement and authorizations data. a single consolidated manpower requirements and authorization data base must be designed, developed and implemented to correct the major deficiencies in the current system. TFMMS is directly related to the priority of the tasking assigned to components of the Chief of Naval Operations (CNO) regarding an accurate portrayal of the quantity and quality of Total Force

B. Reconciliation of Increases and Decreases (cont'd).

Manpower requirements and authorizations.

TFMMS will also provide Navy with the ability to make trade-off decisions between active, reserve, civilian and contractor manpower. This system is an integral part of the Navy Manpower Engineering Program (NAVMEP).

+1,500

- 4) Source Data System (SDS) SDS provides automated support for field level pay and personnel functions. In FY 1985, one Personnel Support Activity (PSA) and six Personnel Support Detachments (PSDs) are served by Source Data System (SDS). An additional six Personnel Support Activities (PSAs) and 49 PSDs will be served in FY 1986. The following increases support SDS implementation:
  - a) The expanded SDS network will require additional civilian end strength in the critical areas of customer liaison, telecommunications planning and operations, quality control and configuration management to sustain the enlarged system in an operating environment. Contractors will provide technical support personnel to trouble-shoot problems within the SDS network. Additional increases will fund network telecommunications, software and hardware maintenance and supplies to support the additional PSAs and PSDs. +3,444
  - b) Approximately 2,800 personnel at six PSAs and 49 PSDs will require training in FY 1986. Training will be supplied by Oak Ridge Associated Universities which is under contract to the Department of Energy (DoE). Oak Ridge personnel will prepare and conduct this training in conjunction with military instructors from the project. +1,601
  - c) SDS site preparation, implementation and training teams will travel to 15 PSAs and 97 PSDs in FY 1986 vice 8 PSAs and 58 PSDs in FY 1985. The teams consist of both military and civilian personnel who will visit each PSD approximately one year in advance of implementation to participate

B. Reconciliation of Increases and Decreases (cont'd).

in site preparation and ultimately be on site for approximately 2-3 weeks to bring up the hardware, load the software and conduct user training followed by user assistance during the initial operating period.

+348

d) Site preparation for Source Data System (SDS) hardware installation will be performed at nine PSAs and 59 PSDs. These costs include electrical power modifications, minor facility modifications, physical security, etc., which are required to ensure field sites are ready to house and operate SDS automated data processing equipment.

+848

e) In FY 1984, a Department of Defense Task Force was formed to review the quality and completeness of the Reserve Component Common Personnel Data System (RCCPDS) data base. As a result of that study, the reserve community has been included in the SDS effort. Increased funding is required to provide programming and analysis of data base elements of the RCCPDS and the ongoing efforts in the Inactive Master Accounting and Personnel Management Information System (IMAPMIS), and improve the interface between RCCPDS and IMAPMIS.

+250

System (NACMIS) - NACMIS is a central data base program that supports all areas of civilian personnel management. Full implementation of Naval Civilian Personnel Data System (NCPDS) in the United States requires increased computer facility operation support and systems performance monitoring of the Interagency contract with the Department of Energy, Oak Ridge National Laboratories at Oak Ridge, TN.

+542

6) Computerized Adaptive Testing (CAT) - CAT is an automated, adaptive system designed to improve the selection and job classification process of recruits. CAT is scheduled to replace the paper/pencil Armed Services Vocational Aptitude Battery (ASVAB) as the only Joint Service accession test for Navy,

B. Reconciliation of Increases and Decreases (cont'd).

Army, Air Force, Marine Corps and Coast Guard recruits. CAT improves on ASVAB by: measuring applicant aptitude/mental group levels more precisely; improving accession test security; and reducing testing costs. Navy is designated as Department of Defense Executive Agent for CAT implementation and operation, scheduled to begin in FY 1986. Increase provides for professional staff and services at the Navy Personnel Research and Development Center, San Diego to design, implement and maintain CAT at 68 Military Entrance Processing Command (MEPCOM) stations.

+2,300

7) Realigment of Resources from Other Personnel Activities (B.A. 8) will align travel funding with NMPC personnel performing the travel. Resources support the Submarine/Underwater Demolition Diver/Explosive Ordnance Disposal Teams Program and Officer and Enlisted Retention Programs.

+660

8) Civilian Substitution - Increase of 30 civilian end strength is due to the substitution of enlisted personnel with civilian personnel in administrative support areas. From a Navy perspective, the enlisted end strength will better satisfy increasing fleet requirements.

+412

5. Program Decreases

-8,186

A. One-Time FY 1985 Costs

(-577)

1) Funds budgeted in this category in FY 1985 were for timesharing services used to develop and operate the Source Data System (SDS) pilot system and testing of the Source Data System (SDS) hardware during its first 90 days of installation. The decrease reflects the fact that there is no further timesharing requirement because the SDS hardware network at the pilot site will be installed, tested and operational before FY 1986.

-577

B. Other Program Decreases in FY 1986

(-7,609)

- B. Reconciliation of Increases and Decreases (cont'd).
  - 1) Distribution Systems Program decreases are due to the implementation of Officer Assignment Information System (OAIS), Enlisted Assignment Information System (EAIS) and several modules of Support Program for Incentives, Retention and Training (SPIRIT) on the minicomputers scheduled for purchase in FY 1985, thereby requiring less contractor support for development work. Additional reduction in telecommunication and commercial timesharing costs reflect the discontinuance of OAIS prototype.

-1,357

2) Navy Manpower Planning System (NAMPS) Decrease in NAMPS is due to improvement in the quality control standardized
reports for the NAMPS, thus reducing
timesharing costs and contractor
support for the accession programming
function. Less automatic data processing support is required for the Navy
Structured Accession Planning Enlisted
System because the function will migrate
to the in-house computer in FY 1986.

-106

3) Decision Support Systems - The following program decreases are anticipated in FY 1986: Migration of the Department of the Navy (DON) Equal Employment Opportunity (EEO) Accountability System to run on in-house computers and completion of the Enlisted Information System (ELIS), Womens Rated Inventory Model (WRIM), Flag On-line Information Retrieval System and Officer Strength System. Completion of the conversion efforts for the Enlisted Operating Plan Model for compatibility with the Personnel and Pay (PERSPAY) interim upgrade computer resulted in a decrease in studies costs.

-122

All Navy Automated Civilian Management Information

System (NACMIS) - NACMIS supports all areas of civilian personnel management prior to the implementation of the Navy Civilian Personnel Data System (NCPDS). NCPDS is the Navy version of the Air Force civilian personnel data system. Therefore, as a result of NACMIS I phase-out and the full implementation of NCPDS, decreases are required in civilian end strength, timesharing, Navy Regional Data Automation Center (NARDAC) on-line processing charges keypunch

#### B. Reconciliation of Increases and Decreases (cont'd).

services, user manual printing and mailing costs, software modifications and central office support.

-1,645

- 85) Real-Time Automated Personnel Identification

  Data System (RAPIDS) Decrease in contractor
  support services is due to completion of RAPIDS
  software development, system integration and
  equipment installation in FY 1985. Decreased
  contractor services in these same areas are also
  required since fewer sites are scheduled for
  implementation in FY 1986 than in FY 1985. -4,079
- 6) Navy Occupational Development and Analysis
  Center (NODAC) Decrease reflects reduced
  level of effort by Navy Personnel Research
  and Development Center, San Diego in performing Navy Officer Occupational Classification
  studies.
- 7) Decrease reflects anticipated savings resulting from the economical purchase of leased computer equipment. -115
- 8) Savings from implementation of the Efficiency Review (ER) portion of the Navy Manpower Engineering Program. -27
- Decrease is due to reduction of five civilian end strength performing administrative functions.

6. FY 1986 President's Budget Request

# Department of the Navy Operation and Maintenance, Navy

Activity Group: Navy Manpower Engineering Center (NAVMEC)

Budget Activity: Nine - Administration and Associated Activities

I. Description of Operations Financed. The Navy Manpower Engineering Center (NAVMEC) (formerly called the Navy Manpower and Material Analysis Centers, Atlantic and Pacific) was created 1 July 1984 to strengthen Navy manpower requirements determination. The mission of the NAVMEC is to execute the Navy Manpower Engineering Program (NAVMEP) by developing manpower requirements incorporating Efficiency Review (ER), Shore Manpower Document (SHMD) (formerly Shore Requirements, Standards and Manpower Planning System (SHORSTAMPS)), Ship Manpower Document (SMD), Squadron Manpower Document (SQMD) and a variety of Management Engineering (ME) procedures; to provide manpower requirements documentation for Chief of Naval Operations, sponsor, claimant and field activity use; to operate the Naval School of Work Study; to design, develop, operate and maintain assigned manpower information systems; to integrate and coordinate related manpower systems to ensure consistent data availability; and to perform other manpower and work study functions directed by Deputy Chief of Naval Operations for Manpower, Personnel and Training (OP-01).

The major program components of the NAVMEC are:

- A. The Shore Manpower Document (SHMD) Program is Navy's primary program for documenting shore establishment workload and manpower requirements. SHMD encompasses the use of standard industrial engineering and work measurement techniques, on-site measurement of activities in specific mission areas and statistical analysis of all collected data. The data is used to develop manpower staffing standards for functions performed ashore. The Efficiency Review (ER) Program achieves manpower and funds savings through the application of traditional industrial engineering methods by determining the most efficient organization for Navy shore activities. The ER resources were functionally transferred to NAVMEC in FY 1985. Under NAVMEP, the best elements of SHMD and ER have been integrated and the manpower requirements determination process has been streamlined to develop staffing standards for the Navy. SHMD will be coordinated with the Commercial Activities (CA) Program to avoid duplication of effort and CA results will be identified as manpower requirements. CA Program resources will remain under the cognizance of Deputy Chief of Naval Operations for Logistics (OP-O4) to avoid disruption of ongoing CA studies.
- B. Fleet Manpower Requirements Programs identify and document manpower requirements for individual fleet units, all classes of ships and for all squadrons within the aviation community.
- C. The Navy Manpower Requirements System (NMRS) automates manpower requirements on an activity or class basis and at the unit and aggregate levels, and produces hard copy manpower documents for ships, squadrons and shore establishments.

- B. Reconciliation of Increases and Decreases (cont'd).
- B. Other Program Growth in FY 1986

(+3,427)

- 1) The original automated data processing system was installed to provide an inhouse capability to develop Navy Manpower Requirements System (NMRS). Program development and maintenance with all NMRS production data processing is being peformed on remote site computers. Subsequent direction forced expansion of the NMRS computer system to support this production in-house. Upgrades have caused the computer system to operate far beyond its design capacity. A second computer system is required to improve turn-around time and to meet existing NAVMEP ADP requirements. The second system is also needed to complete the development and integration of all manpower requirements and authorization systems into a single data base. This integrated data base will enable the Navy to automate standards for the entire shore establishment over the next two years. The second system will also meet the ADP support and telecommunication requirements of recently established NAVMEC detachments.
  - a) With the acquisition of the second computer system, additional maintenance, supplies, telecommunications and operational support are required to support the new equipment.

+289

b) Increase will provide for additional time-sharing costs in support of the accelerated Shore Manpower Document (SHMD) Program and parallel system runs associated with the second computer procurement. These parallel runs are required to ensure the accurate transfer of programs from one system to another.

+295

c) NMRS contracts support the manpower analysis, systems analysis, computer programming, technical documentation and

B. Reconciliation of Increases and Decreases (cont'd).

associated support services for various Navy manpower determination and support systems. An increase in ADP support is required to meet the accelerated manpower determination schedule under the Navy Manpower Engineering Program (NAVMEP) concept. Additional program development, maintenance, data collection and data entry are required.

+827

2) The Navy's goal for NAVMEP is 100% coverage of the shore establishment by a variety of manpower requirements methodologies within two years. Additionally, all shore manpower validation studies in FY 1986 are expected to incorporate Efficiency Review (ER) methodology. On-site time required for an ER study is considerably greater than a standard Shore Manning Document (SHMD) study and has increased both mandays on-site and travel requirements by 30%. Additional end strength, travel and operational support, for the SHMD Program is required to attain the accelerated NAVMEP coverage goals. Resources develop, apply, implement and maintain staffing standards and conduct most efficient organization studies at the field activity level. These efforts primarily involve on-site data gathering by analysts to obtain and record actual workload, determine manpower to accomplish the work and to document cost savings via identification of the most efficient organizations.

+970

3) Increase in civilian salaries is due to the substitution of enlisted personnel with civilians in the SHMD Program. Additional professional civilian management analysts/industrial engineers or technicians, rather than enlisted personnel, are more effectively utilized in this extremely complex and technical program. From a Navy perspective, the enlisted end strength will better satisfy increasing fleet requirements.

Activity Group: Navy Family Allowance Activity (cont'd)

B. Reconciliation of Increases and Decreases (cont'd).

#### 3. Program Increases

+156

A. Annualization of FY 1985 Increases

- (+59)
- 1) Increase to support full workyear costs for personnel to review and process cases generated by the new Public Laws, Involuntary Child and Spousal Support Bill (P.L. 97-248) and the Uniformed Services Former Spouses' Protection Act (P.L. 97-252).

+59

B. Other Program Growth in FY 1986

(+97)

1) A project to convert manual records within the Waiver and Legal Departments into the Permanent Change of Station (PCS) Reservation/Obligation Data Base System will be complete in FY 1985. Upon completion, additional support will be required from the Navy Finance Center (NAVFINCEN), Cleveland, Data Processing Department for ongoing programmer and peripheral requirements support. This data processing service support and labor will be charged to the Navy Family Allowance Activity via the Interservice Support Agreement.

Additionally, recent passage of the Involuntary Child and Spousal Support Bill and the Uniformed Services Former Spouses' Protection Act (Public Laws 97-248 and 97-252) has resulted in the need for direct data entry into the Military Pay System. New reports and listings will be required.

The NAVFINCEN will also be providing CRTs and printers to support direct data entry of Dependency Status Actions, retrieval of master pay account data and transition of PCS costing and reporting system from the PRIME computer to the IBM mainframe. Twenty additional CRTs and 6 printers will be provided in addition to replacing 1 printer and 22 CRTs currently used in conjunction with the

## Activity Group: Navy Family Allowance Activity (cont'd)

## B. Reconciliation of Increases and Decreases (cont'd).

PRIME System. These additional costs will be reflected in the costs of Automatic Data Processing (ADP) support from Navy Finance Center (NAVFINCEN).

Also, with the addition of the Training and Administration Naval Reserve (TAR) costing and reporting to the Operation and Maintenance, Navy (O&M,N) Per Diem Division in FY 1983, there has been an increase in NAVFINCEN programmer and testing personnel costs to support design requirements and report generation.

This combination of newer equipment, more programming and reporting requirements and additional terminals and printers results in an increase in the cost of ADP support.

+97

#### 4. Program Decreases

-72

#### A. One-Time FY 1986 Costs

(-72)

 Decrease due to one-time requirement for space alterations to provide additional floor space, carpet installation and office furniture.

-16

2) Decrease due to completion of systems design and conversion of manual records within the Waiver and Legal Departments into the Permanent Change of Station (PCS) Reservation/Obligation Data Base System for storage and retrieval.

<sup>1/</sup> A decrease in workload is anticipated when direct data entry into the Master Pay account occurs in FY 1986.

#### Department of the Navy Operation and Maintenance, Navy

Activity Group: Military Manpower Management

Budget Activity: Nine - Administration and Associated Activities

1908g/1-6

#### I. Description of Operations Financed.

This activity group provides resources to support the following individual programs:

#### Enlisted Personnel Management Center (EPMAC).

EPMAC provides centralized management support for the distribution of active duty enlisted personnel in accordance with the overall personnel management policies established by the Commander, Naval Military Personnel Command and the manning policies of the Manning Control Authorities (MCAs).

#### Navy Personnel Evaluation Boards.

The Naval Council of Personnel Boards is comprised of the Central Physical Evaluation Board, Physical Review Council, Naval Discharge Review Board, Naval Complaints Review Board, Naval Clemency and Parole Board, Naval Physical Disability Review Board and the Employee Appeals Review Board. The Board for Correction of Naval Records is a statutory civilian board established under the provisions of 10 U.S.C. 1552. Its purpose is to relieve Congress of the necessity to consider private relief laws for the correction of errors and injustices suffered by members and former members of the military services. The Secretary of the Navy, acting through his civilian board, is authorized to correct any naval record when such action is necessary to correct an error or remove an injustice. The Board conducts hearings and prepares reports containing findings, decisions and recommendations for Secretarial review and action. It is the forum for appealing the decisions of most other administrative boards and is the highest administrative tribunal with respect to military personnel matters within the Department of the Navy. The Board of Decorations and Medals has overall responsibility to assist and advise the Secretary of the Navy on all matters of policy, procedure and administration with regard to decorations and medals to maintain the high standards and integrity of the Navy Awards System.

Activity Group: Military Manpower Management (cont'd)

#### Organizational Effectiveness Center.

The Organizational Effectiveness Center, Washington provides support to the shore establishment in the practical application of human goals affirmative action programs to improve human resource utilization and organization effectiveness. The following activities are supported by this program:

Assisting shore establishment commanders in conducting organization effectiveness programs at their commands. These programs include Command Action Plans, Affirmative Action Plans, workshops in equal opportunity, drug abuse control, alcoholism prevention, civil rights, etc.

Conducting management training workshops for naval shore commands and senior executive groups. These workshops cover such topics as time and meeting management, stress management, goal setting, decision making, problem solving and communications.

governing factor.

(1,411)

1) The Enlisted Personnel Management Center (EPMAC) receives its ADP support from the Navy Regional Data Automation Center (NARDAC), New Orleans. Monthly bills are based on an annualized daily usage fee which includes dedicated production support on the IBM 4341 system with associated peripherals and telecommunications equipment, printing, tape and keypunching services.

In FY 1986 EPMAC's costs for ADP services will increase because NARDAC will charge customers for NIF civilian leave liability costs and common services support such as civilian payroll services.

1,323

 Additional supplies are required to support expansion of the Manning Control Authority to include the Naval Reserve.

25

Activity Group: Military Manpower Management (cont'd) B. Reconciliation of Increases and Decreases (cont'd) 4. Program Increases (cont'd) A. Other Program Growth in FY 1986 (cont'd) 3) Additional peripherals are required for the IBM 4341 at NARDAC. New Orleans to expand the distribution system to allow access by more Commands to allocate personnel. 59 4) Increased funding is required to support the preparation of organizational effectiveness surveys for the Commander in Chief, U.S. Atlantic Fleet. These surveys will be used by the Organizational Effectiveness Center (OECEN) to evaluate current and future problem areas. Program Decreases -27 A. Other Program Decreases in FY 1986 (-27)Decrease reflects savings due to purchase of leased equipment. -24 2) Decrease reflects a reduction in travel costs at OECEN. ### Department of the Navy Operation and Maintenance, Navy

Activity Group: Civilian Personnel Management

Budget Activity: Nine - Administration and Associated Activities

- I. Description of Operations Financed. This activity group provides resources in support of the Naval Civilian Personnel Command (NCPC) Field Activities located in San Diego, CA; Pearl Harbor, HI; Norfolk, VA; Philadelphia, PA; San Antonio, TX; Washington, DC; and San Francisco, CA. The Field Activities represent NCPC within an assigned geographic area, by providing consultation and technical services to Navy field activities on civilian personnel matters. They are responsible for providing and coordinating a variety of Navy-wide centralized civilian personnel services such as College Recruitment and Examiner/Investigator Programs. They represent NCPC in exercising control over administration of civilian personnel policy and assist local Naval staffs in such personnel management areas as grievances, appeals and labor relations. They also perform other functions that may be directed by the Director, Naval Civilian Personnel Command. This activity group provides for the following programs:
- A. <u>Employment Classification and Position Management</u> Provides advice and guidance to Navy field activities on matters pertaining to employment and classification. Develops and disseminates guidelines on the application of employment and classification policy and program requirements to operational situations.
- B. Examiners/Investigators Provides for examiners/investigators to meet Office of Personnel Management (OPM) regulations which impose minimum requirements for appeals examiners in adverse action cases and establish a requirement for grievance examiners to be used in connection with investigating and resolving the grievances of employees.
- C. Labor and Employee Relations Provides knowledgeable and experienced advocates and negotiators to insure management talent equal to that of labor organizations which have, through affiliation, access to the top talent of AFL/CIO as well as their own headquarters staffs. There are 655 bargaining units with exclusive rights and over 500 agreements (averaging 35 articles per agreement) which must be renegotiated at intervals ranging from one to three years, with most being in the two-to-three year range. A small cadre of experienced negotiators/advocates is supported centrally by the Field Divisions to service all activities in the various areas of responsibility. They also provide guidance and assistance to commands and activities on employee relations matters and serve as Discrimination Complaint Coordinator for the Department of the Navy.
- D. <u>Recruitment</u> Performs centralized, nation-wide, on-campus college recruitment for professionals; provides career program recruiting service; and supports special recruitment programs.
- E. <u>Personnel Management Evaluation</u> Provides for conduct of on-site evaluations on the effectiveness of the civilian personnel function in field activities of the Department of the Navy.

- F. <u>Naval Civilian Personnel Data System (NCPDS) Center, San Antonio, TX</u> Provides on-site management and support to the NCPDS, which is the official support system to meet Navy's requirements for timely, accurate and comprehensive civilian personnel information.
- G. <u>Civilian Personnel Litigation</u> Provides legal advice to the regional office directors on civilian personnel matters and represents the Navy in litigation involving civilian personnel matters.

elimination of \$3 thousand investment threshold and adoption of central management criteria as a governing factor.

+25

4. Program Increases

+892

A. One-Time FY 1986 Costs

(+218)

The implementation of Navy Civilian Personnel Data System (NCPDS) throughout Continental United States (CONUS) and overseas has doubled the amount of training space required to accomplish implementation, conversion and follow-on training. The Northeast Region (NER), Southeast Region (SER) and Pacific Region (PACR) are affected more than other regional offices because of the lack of available on-base facilities for NCPDS training. Two other vital NCPC missions are Federal Equal Opportunity Recruiting Program (FEORP) recruitment and labor/employee relations. These programs are inhibited because NER, SER and PACR operate from base facilities where access is strictly controlled. To be successful, FEORP recruitment requires constant and recurring interaction with the local academic and civic communities. Labor and employee relations personnel work closely with the Merit System Protection Board (MSPB) representing management's case in labor disputes. These responsibilities require almost daily visits to MSPB sites which are located in General Services Administration (GSA) spaces, usually in a downtown area. To alleviate these problems, NER, SER and PACR will relocate to GSA leased buildings.

+218

B. Other Program Growth in FY 1986

(+674)

1) Increase will provide for printing of system operating manuals and system documentation for the NCPDS. These requirements will

B. Reconciliation of Increases and Decreases (cont'd).

increase as more activities are converted to Navy Civilian Personnel Data System (NCPDS) in FY 1986.

**4**Δ

2) Additional travel for NCPDS Center, San Antonio is required to complete the Continental United States (CONUS) implementation of NCPDS planned for in FY 1986.

+9

3) An increase is required to develop, package and deliver 40,000 16 page recruitment brochures to prospective Navy civilian employees. These brochures describe Navy's mission, organizational structure and resources, employer's activities and major professional groups for which NCPC recruits, e.g., Financial and Logistics Interns, scientists and engineers. The brochure would also describe employment conditions, career potential and qualifications. These brochures are required to improve civilian recruitment.

+127

4) Hispanics continue to be underrepresented in the Department of the Navy (DON). In 1970, when the Hispanic Employment Program (HEP) was implemented, Hispanics represented 2.3 per cent of the total DON workforce. As of 30 March 1983, Hispanics represented only 3.3 per cent of the total DON workforce. At the present rate of growth for Hispanics of 229 per year over the last 13 years, it will be impossible for DON to achieve representation of Hispanics unless specific, special efforts, such as the Hispanics Outreach and Placement Projects, are implemented. Concentrated Hispanic Outreach and Placement Projects are operational in the Southwest Regional area and the Northeast Regional area. In FY 1986, \$267 thousand is required for each region to develop collateral recruitment materials to enhance the NCPC conference exhibit booths to attract Hispanics and to develop appropriate media.

+534

5. Program Decreases

-13

A. Other Program Decreases in FY 1986

(-13)

### B. Reconciliation of Increases and Decreases (cont'd).

1) Savings from the implementation of the Efficiency Review (ER) portion of the Navy Manpower Engineering Program.

### Department of the Navy Operation and Maintenance, Navy

Activity Group: Special Program Support

Budget Activity: Nine - Administration and Associated Activities

1907g/1-6

### I. Description of Operations Financed.

Special Program Support provides for a variety of efforts which are specific in purpose and support either Navy-wide or extra-Navy requirements. The following programs are included in this activity group:

The Employee Compensation Fund reimburses the Department of Labor for compensation and medical benefits paid to civilian employees of the Department of the Navy who sustain job-related illness or injuries. Under Department of Labor billing procedures, the actual payment by Navy to Labor is made two years after the period in which the costs were incurred. The FY 1986 request reflects actual costs for compensation and benefits incurred from 1 July 1983 through 30 June 1984.

The Unemployment Compensation Fund provides resources to reimburse states, through the Department of Labor, for unemployment compensation paid to former employees of the Department of the Navy who meet eligibility criteria.

Payments for Postal Services cover official mail costs derived from the United States Postal Service (USPS) Revenue, Pieces and Heights Sampling system. This activity group accommodates Navy-wide requirements satisfied by the USPS.

The Vice Presidential Grounds program maintains the grounds surrounding the Official Residence of the Vice President. Its goals are to provide an aesthetically pleasant setting for the residence, to maintain a thermally controlled environment around the Naval Observatory's telescopes, and to provide sufficient field of view for security forces. Funding supports expenses associated with planting, care, trimming, and pruning of lawns, shrubs, flower beds and trees; operation of greenhouses to provide plants for the residence and grounds; and general clean-up of the grounds.

The White House/Marine Corps Development and Education Command (MCDEC) Helicopter Program provides for the cost of petroleum, oil and lubrication, and temporary additional duty funds for flight operations in support of White House and MCDEC requirements. Funds are also included for organizational and intermediate level maintenance support for other than contractor maintained aircraft. The mission of helicopter squadron ONE, located at Quantico, Virginia is to:

- a. Provide helicopter transportation for the President and Vice President of the United States, members of the President's cabinet and foreign dignitaries.
- b. Provide helicopter emergency evacuation support as directed by the Director, White House military office.
- c. Plan, execute and evaluate projects of a technical or tactical nature originated by or assigned to the unit.
- d. Furnish aircraft, pilots and crews for administrative and logistical flights as directed by the Commanding General, MCDEC.
  - e. Provide local airborne search and rescue operations.
  - f. Maintain and train flight crews to support the executive mission.

As part of their Department of Defense oversight responsibilities, members of the House and Senate Armed Services Committees and the Defense Subcommittees of the Appropriations Committees visit Defense contractors, naval bases, shippards and air rework facilities. In addition, members of Congress are invited by the Navy to attend briefings, ceremonies and demonstrations. Transportation, per diem and incidental expenses are paid from this fund on an actual cost basis.

III. Performance Criteria (cont'd).

### Congressional Travel

Congressional travel expenditure of funds is dependent upon:

- a. Number of requests from the standing committees.
- b. Trip itinerary (destination and length of visits).
- c. Number of persons traveling.

### IV. Personnel Summary (End Strength).

No military or civilian personnel are assigned to this activity group.

### Department of the Navy Operation and Maintenance, Navy

Activity Group: Maintenance of Real Property

Budget Activity: Nine - Administration and Associated Activities

1909g/1-3

### I. Description of Operations Financed.

This program provides maintenance, repair and minor construction of buildings, structures, grounds and utility systems required for facilities located within the Naval District Washington as well as 44 activities located with other commands as tenants who reimburse the host commands for services received.

The major elements of this program are:

- o <u>Facilities Maintenance</u> finances scheduled, day-to-day recurring maintenance and emergency service work needed to preserve facilities.
- o <u>Major Repairs</u> provides major repairs necessary to bring existing facilities into adequate condition to support assigned missions.
- o <u>Minor Construction</u> finances the erection, installation or assembly of real property facilities; the addition, extension, alteration, conversion or replacement of existing real property facilities; the relocation of real property facilities; and the installation of equipment which becomes part of a facility.

### II. Financial Summary (Dollars in Thousands).

### A. Sub-Activity Group Breakout.

Industrial Fund Rates (26)Other Pricing Adjustments (570)3. Program Increases 4,903 A. Other Program Growth in FY 1986 4,903 1) Minor construction funds are required to renovate Arlington Annex office space to support Naval Military Personnel Command officer distribution. The renovation will provide additional space for personnel to serve the growing surface warfare community, and provide space for the planned expansion of automatic data processing support for the officer distribution process. 131 2) Additional funds are required for structural and electrical repairs at the Navy Manpower Engineering Center (NAVMEC), rehabilitation of a building for NAVMEC detachment, Pearl Harbor, and completion of rehabilitation projects at four other detachments. 184 3) Resources are required to repair the electrical power substation that supports Building 210 at the Washington Navy Yard. 334 Boilers, originally installed in the Washington Navy Yard Power Plant in 1938, provide approximately 60% of the facility's steam requirements. The boilers have far exceeded life expectancy, and overhaul is not feasible. Boiler I will be replaced in FY 1986. 4,254

### Department of the Navy Operation and Maintenance, Navy

Activity Group: <u>Base Operations</u>

Budget Activity: Nine - Administration and Associated Activities

1915g/1-5

### I. <u>Description of Operations Financed</u>.

This activity group provides base support services and material for activities in the Naval District Washington and 44 other activities which are tenants of other commands and must reimburse the host commands for services received. This activity group also finances payments to the General Services Administration for space occupied by the Navy.

The major elements of the program are:

- o <u>Utility Operations</u> Includes operating expenses for purchased electricity, electricity generating plants, purchased steam and hot water, heat plants, utility distribution systems, waste systems, air conditioning and refrigeration plants.
- o <u>GSA Leasing</u> finances payments to the General Services Administration (GSA) for government owned/leased space occupied by the Department of the Navy.
- o <u>Personnel Operations</u> Support required for personnel related functions include expenses for:
  - Bachelor Housing Operations and Furnishings provides support for the operation of barracks and the purchase and maintenance of personnel support equipment related to this housing.
  - Other Personnel Support provides for mess halls, sales activities, laundry and dry cleaning facilities.
  - <u>Morale Welfare and Recreation</u> provides authorized appropriation fund support for shore based recreation activities.
  - Station Hospitals, Medical and Dental Clinics direct and indirect health care costs for Health Care Facilities not under the financial control of the Naval Medical Command.
  - Human Goals provides support for programs which focus on improving organizational and individual effectiveness and the administrative support of the Alcohol and Drug programs.
- o <u>Base Operations Mission</u> Support for those base operations functions which are required in direct support of the mission of the base. Expenses are included for the following functions:

- Retail Supply Operations In addition to standard supply functions, this item includes the procurement, receipt, storage and issue of bulk liquid fuel, including operating aircraft fuel servicing facilities. Additionally, waterfront operations such as handling incoming and outgoing cargo are included.
- Maintenance of Installation Equipment provides for maintenance of major shore based equipment including services and miscellaneous craft, construction equipment (non-deployable), weapons, electronics, electronic engineering, and fleet moorings.
- Other Base Services provides for the maintenance and operation of vehicles/other transportation equipment, port services (includes navigational assistance to ships, operation of service craft, degaussing operations, and oil spillage cleanup).
- o <u>Base Operations Ownership</u> Support required at shore bases, regardless of type of mission being performed, which must be sustained to have a functional base. Expenses are included for the following functions:
  - Other Engineering Support Public Works Department Administration, engineering services, custodial services, refuse/garbage collection and disposal, snow removal, rental and leasing of real property, and fire protection and firefighting for Navy activities and their tenants.
  - Administration provides support related to financial/resource management, civilian manpower management, and maintaining military personnel records.
  - Automated Data Processing provides analysis programming, equipment rental, operations and maintenance, contractual services and supplies.
  - Hazardous Waste Material Handling includes personnel, supplies and training associated with the identification and disposal of hazardous wastes.
  - Audiovisual provides supplies and services required for audiovisual support.
  - <u>Physical Security</u> provides personnel and resources to ensure physical security of Naval bases and stations.

0&M,N 9-112 14

2) Additional janitorial services are required due to relocation of three Naval Civilian Personnel command regional offices from Navy bases to

commercial buildings.

### B. Reconciliation of Increases and Decreases (cont'd)

3) An increase in utilities costs represents annualization of costs for Navy Manpower Engineering Center (NAVMEC) detachments established in FY 1985.

23

4) Increase in base communications represents full year funding for the NAVMEC detachments including WATS or FTS lines in areas where AUTOVON is not available, increased number of instruments due to staffing increases, and additional requirements associated with the Federal Equal Opportunity Recruiting Programs.

468

 Increase in civilian salaries and fringe benefit costs associated with a classified program. (8 end strength)

375

6) Additional resources are required to implement an internal control program to conduct in-house reviews to ensure integrity, efficiency and responsive handling of reported abuse. (4 end strength)

62

7) Military personnel will be replaced with civilian at three Personnel Support Activities to maintain the necessary continuity at those activities and ensure optimal use of military personnel resources.

211

### 4. Program Decreases

-38

A. Other Program Decreases in FY 1986

(-38)

1) Anticipated savings of 2 end strength due to establishment of a more efficient organization based on efficiency reviews.

- 31

2) Savings in utilities costs due to energy conservation efforts.

### Department of the Navy Operation and Maintenance, Navy

International Headquarters and Agencies Activity Group:

Budget Activity: Ten - Support to Other Nations

1906g/1-2

### I. Description of Operations Financed.

The Support to Other Nations program provides resources for the Latin American Cooperation Program, and emergency medical travel for Navy personnel and their families at Military Assistance Advisory Groups (MAAGS), Missions, and Defense Attache Offices worldwide.

This activity group also supports the Technology Transfer Program. goal of this program is to control the export of technology, goods and services which could contribute to the military potential of other countries to ensure that such exports are consistent with the national security interests of the United States. These funds provide for review and evaluation of munitions cases, strategic trade cases, technical data exchange agreements, science and technology agreements, reciprocal Memoranda of Understanding, and similar agreements. Efforts are conducted by the Naval Research Lavoratory, Naval Ocean Systems Center, Naval Weapons Center, Naval Air Development Center, Naval Underwater Systems Center and Pacific Missile Test Center.

A. Other Program Growth in FY 1986

(50)

1) Inter-American Naval Intelligence Conference. An increase in resources is required to support this five day, Chief of Naval Operations hosted conference in Norfolk, Virginia. The conference will be attended by 19 delegations (4 people per delegation) from Argentina, Bolivia, Brazil, Canada, Chile, Columbia, Dominican Republic, Ecuador, El Salvador, Guatemala, Honduras, Mexico, Panama, Paraguay, Peru, Uruguay, Venezuela, United States, and the Inter-American Defense Board. The purpose of the conference is to discuss mutual concerns in Naval intelligence and foster a cooperative environment for any future operations.

| Supplemental Appropriations Request | -                 | -230,800            | -                  |
| Appropriation                       | \$22,249,628      | \$25,116,241        | \$25,797,700       |

The FY 1986 request for the Operation and Maintenance, Navy appropriation is \$25,797.7 million. This appropriation finances the day-to-day costs of operating naval forces, including fuel, supplies, and maintenance costs of ships, aircraft (including Marine aircraft), and other weapons systems, as well as the support establishment ashore for naval forces. The FY 1986 request represents an increase over the current estimate for FY 1985 of \$463 million. Major changes between the years include transfers related to proposed revisions to the Department's expense/investment criteria (+\$210.7 million) and the Administration's proposed 5 percent decrease in civilian pay rates (-\$116.3 million). Other major changes between FY 1985 and FY 1986 are discussed in the budget activity summaries below:

Strategic Forces. The Strategic Forces budget activity provides for the financial requirements for the Navy's Fleet Ballistic Missile Force. This range of activities covers the operating costs of the nuclear submarines, supporting submarine tenders, launch area support ships and other craft, their maintenance and base operation support, as well as weapon systems and missile overhaul, repair, and maintenance. The Naval Space Command is also included in this activity.

For Budget Activity 1, the Ship Maintenance and Modernization program decreases in FY 1986, reflecting the impact of one fewer FBM submarine and one fewer support ship in the overhaul program. The Trident program increases, reflecting an additional number of operational submarines and the Kings Bay development.
